## Revenue from continuing operations increased by 9% (4% CER\*) to R38,6 billion

Commercial Pharmaceuticals delivered satisfactory growth of 6% (1% CER) to R31,1 billion, led by Regional Brands, despite the negative influence on overall demand from the effects of COVID-19 and the associated lockdowns. Manufacturing revenue recorded solid growth of 22% (14% CER) to R7,5 billion, favourably impacted by strong performances from both heparin and non-heparin API sales.

## Normalised EBITDA from continuing operations increased by 7% (3% CER\*) to R11,0 billion

Normalised EBITDA from continuing operations comprises operating profit before depreciation and amortisation adjusted for specific non-trading items. Operating expense efficiencies coupled with the benefit of the weaker ZAR positively impacted growth.

## Normalised headline earnings per share from continuing operations increased by 9% (5% CER\*) to 1 464,6 cents

Normalised headline earnings per share from continuing operations comprises headline earnings per share from continuing operations adjusted for specific non-trading items and is a measure which provides clear comparability of the financial performance of Aspen's ongoing underlying business. Normalised headline earnings benefitted from lower net financing costs.

## Headline earnings per share from continuing operations increased by 9% (6% CER\*) to 1 268,0 cents

## Operating cash flow conversion rate from continuing operations of 142%

\* The constant exchange rate ("CER") restatement has been calculated by adjusting the prior year's reported results at the current year's reported exchange rate. This provides illustrative comparability with the current year's reported performance.  
\*\*Continuing operations exclude the following: Asia Pacific non-core pharmaceutical portfolio, Nutritionals Business, Japanese Business and SA public sector ARVs.

## Earnings per share from continuing operations increased by 175% (195% CER\*) to 1 010,2 cents

The comparison of earnings per share from continuing operations has been positively impacted by significantly lower intangible and tangible asset impairments in the current year.

## Earnings per share decreased by 28% (-29% CER\*) to 1 021,8 cents

The comparison of total earnings per share has been negatively impacted by the gain on the disposal of the Nutritionals Business in the prior year.

## Net borrowings reduced to R35,2 billion (from R39,0 billion in June 2019)

Strong operating cash flows, supported by a working capital inflow, and proceeds received from the disposal of the Japanese Business were diluted by unfavourable currency movements arising from the weakening of the ZAR relative to the EUR and the AUD which inflated the ZAR value of Aspen's debt denominated in those currencies.

## Agreement concluded with Mylan for the divestment of assets relating to the commercialisation of the Thrombosis products in Europe

This divestment is a pivotal step towards reshaping Aspen's foundation with an increased weighting to growing Emerging markets.

## No dividend has been declared for the year ended 30 June 2020 (June 2019: no dividend declared)
