Operation	SHEQ certification	LTIFR					Awards/Achievements in F2018
		F2018	F2017	F2016	F2015	F2014	
Ferrous division							
Beeshoek Mine	ISO 9001, ISO 14001, OHSAS 18001, SANS 16001	0.07	0.15	0.07	0.07	–	Completed 3.8 million fatality-free shifts. Completed 16 000 fatality-free production shifts over 14 years and 11 months. Completed 365 consecutive days without a Lost Time Injury on 7 March 2018. Received a certificate from the DMR for an outstanding safety achievement as the Most Consistent Surface Mine in the 2017 Northern Cape Mine Safety Competition. Awarded first prize for the most improved safety performance and the second prize for the best safety performance in its class at the 2018 Mine Safe Conference.
Black Rock Mine	ISO 9001, ISO 14001, SANS 16001	0.20	0.24	0.35	0.35	0.44	Completed 6.3 million fatality-free shifts. Black Rock Mine has completed the pre-certification assessment in terms of ISO 45001, the revised international standard on health and safety management. The final certification audit is scheduled for November 2018.
Cato Ridge Works	ISO 9001, ISO 14001, OHSAS 18001	–	0.19	0.17	0.38	0.12	Completed 2.3 million fatality free shifts. Completed 704 days without a Lost Time Injury at 30 June 2018.
Khumani Mine	Integrated certification of ISO 9001, ISO 14001 and OHSAS 18001. Also SANS 16001 certified	0.10	0.1	0.17	0.29	0.10	Completed 2.1 million fatality-free shifts.
Machadodorp Works	ISO 9001, ISO 14001, OHSAS 18001	–	–	0.55	–	0.32	Completed 1 million fatality free shifts and 875 days without a Lost Time Injury at 30 June 2018.
Platinum division							
Modikwa Mine	ISO 14001	0.72	0.58	0.64	0.73	0.87	Achieved 1.1 million fatality-free shifts.
Nkomati Mine	ISO 9001, ISO 14001, OHSAS 18001	0.30	0	0.09	0.23	0.03	Completed 6.4 million fatality-free shifts.
Two Rivers Mine	OHSAS 18001, ISO 14001. Training Centre is ISO 9001 certified	0.39	0.31	0.41	0.24	0.28	Completed 4.5 million fatality-free shifts.
Copper Division							
Lubambe Mine	Aligning SHEQ systems with ISO 14001 and OHSAS 18001. Training Centre is ISO 9001 certified	0.26	0.14	0.21	0.21	0.19	Completed 4 million fatality-free shifts. Remained fatality-free since the start of the project in October 2010.

* Lubambe Mine was disposed of effective 22 December 2017. Safety statistics are included to that date.

SAFETY DEFINITIONS

Employees

ARM considers contractors as employees from a health and safety point of view and statistics include contractor hours worked, as well as injuries sustained, in line with legislation and industry standards.

Lost Time Injuries (LTIs)

Any work-related injury that results in a worker being unable to perform their normal duty or similar work on the calendar day following the day of the injury is reported as a Lost Time Injury (LTI). If a suitably qualified medical professional advises that the injured person is unable to perform their normal duties or similar work on the next calendar day after the injury, regardless of the injured person's next rostered shift, a Lost Time Injury is deemed to have occurred.

Restricted Work Injuries (RWIs)

An RWI is defined as a work-related injury which results in the worker being able to work, but unable to perform one or more of their routine functions for a full working day, from the day after the injury occurred as certified by advice from a suitably qualified healthcare provider. Although RWIs are reported separately in some industry forums in which ARM participates, all RWIs are classified as LTIs and included in our reporting of LTIs.

Recordable Injuries (RIs)

A recordable injury case is a work-related injury of sufficient severity that it requires medical treatment beyond first aid or results in the worker's inability to perform their normal duty or similar work on the calendar day following the day of the injury. Medical treatment beyond first aid refers to treatment regardless of the professional status of the person providing the treatment. At a minimum, it includes wounds that need suturing, fractures, bruising that requires drainage of blood, second and third degree burns and cases where prescription drugs or non-prescription drugs at prescription dosage are prescribed to manage symptoms. Recordable injuries include non-LTI injuries that require medical treatment, Lost Time Injuries and fatalities.

Reportable accident (Mine Health and Safety Act)

For the mining operations to which the Mine Health and Safety Act applies; in terms of Chapter 23, reportable accidents refer to any accident that results in:

- a) the death of an employee;
- b) an injury to any employee, likely to be fatal;
- c) unconsciousness, incapacitation from heatstroke or heat exhaustion, oxygen deficiency, the inhalation of fumes or poisonous gas, or electric shock or electric burn accidents of or by any employee and which is not reportable in terms of paragraph (d);

d) an injury which either incapacitates the injured employee for performing that employee's normal or similar occupation for a period totaling 14 days or more, or which causes the injured employee to suffer the loss of a joint, or part of a joint, or sustain a permanent disability;

e) an injury, other than injuries referred to in paragraph (d), which incapacitates the injured employee from performing that employee's normal or similar occupation on the next calendar day.

Reportable accident (Occupational Health and Safety Act)

For the smelters to which the Occupational Health and Safety Act 85 of 1993 applies, reportable accidents are defined in Sections 24 and 25 of the Act, as follows:

Each incident occurring at work or arising out of or in connection with the activities of persons at work, or in connection with the use of plant or machinery, in which, or in consequence of which:

- a) any person dies, becomes unconscious, suffers the loss of a limb or part of a limb or is otherwise injured or becomes ill to such a degree that he/she is likely either to die or to suffer a permanent physical defect or likely to be unable for a period of at least 14 days either to work or to continue with the activity for which he/she was employed or is usually employed;
- b) a major incident occurred; or
- c) the health or safety of any person was endangered and where:
 - i. a dangerous substance was spilled;
 - ii. the uncontrolled release of any substance under pressure took place;
 - iii. machinery or any part thereof fractured or failed resulting in flying, falling or uncontrolled moving objects; or
 - iv. machinery ran out of control.

Section 54 of the Mine Health and Safety Act

Provides for an Inspector of Mines, who has reason to believe that any occurrence, practice or condition at a mine endangers or may endanger the health or safety of any person at the mine, to give any instruction necessary to protect the health or safety of persons at the mine, including an instruction that operations at the mine or a part of the mine be halted.

Section 55 of the Mine Health and Safety Act

Allows for an Inspector of Mines, who has reason to believe that an employer has failed to comply with any provision of the Mine Health and Safety Act, to instruct that employer in writing to take any steps that the Inspector considers necessary to comply with the provision.
