

NEWS RELEASE

Release Time IMMEDIATE
Date 20 January 2016
Release Number 2/16

BHP BILLITON OPERATIONAL REVIEW FOR THE HALF YEAR ENDED 31 DECEMBER 2015

- Further productivity improvements supported the robust production performance across our operated assets during the period.
- Full year production guidance maintained for Petroleum, Copper and Coal.
- Guidance at Western Australia Iron Ore (WAIO) maintained at 270 Mt (100% basis) as continued productivity is expected to offset one-off operational issues from the December quarter. Total iron ore guidance reduced by 10 Mt to 237 Mt due to the suspension of production at Samarco.
- Four major projects under development are tracking to plan. The North West Shelf Greater Western Flank-A petroleum project was completed under budget and ahead of schedule. The Greater Western Flank-B project was approved during the period.
- Underlying attributable profit⁽¹⁾ in the December 2015 half year is expected to include additional charges in a range of approximately US\$300 million to US\$450 million (detail presented on page 2).

Production	Dec H15	vs Dec H14	
Petroleum (MMboe)	125	(5%)	Lower gas volumes reflect deferral of development activity in Onshore US and natural field decline in our Conventional assets.
Copper (kt)	762	(6%)	Increased throughput enabled by the ramp up of the Escondida Organic Growth Project 1 and strong operating performance across the business partially offset expected lower grades at Escondida.
Iron ore (Mt)	118	4%	Record WAIO volumes for the half year as the Jumblebar mining hub operated at full capacity following ramp-up in the prior year.
Metallurgical coal (Mt)	21	(3%)	Record production at four Queensland Coal mines partially offset a convergence event at Broadmeadow and planned closure of Crinum.
Energy coal (Mt)	19	(3%)	Unfavourable weather conditions at NSWEC and Cerrejón.

BHP Billiton Chief Executive Officer, Andrew Mackenzie, said: "Our operated assets continued to perform well over the last six months. The strong performance of our conventional petroleum assets has offset lower shale volumes following a reduction in investment to preserve the value of our acreage in current market conditions. Increased throughput at Escondida helped mitigate the impact of expected grade decline and better productivity supported production at Queensland Coal. These efforts have allowed us to maintain production guidance for Petroleum, Copper, Coal and Western Australia Iron Ore.

"Commodity prices fell substantially in the first half of the 2016 financial year putting pressure on the whole resources sector. We continue to cut costs and remain focused on safely improving our operational performance to enhance the resilience of our business. In this environment, we are also committed to protecting our strong balance sheet so we have the financial flexibility to manage further volatility and take advantage of the expected recovery in copper and oil over the medium term."

Summary

Operational performance

Production for the December 2015 half year and quarter and guidance for the 2016 financial year are summarised in the table below.

Production	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15	Previous FY16 guidance	Current FY16 guidance
Petroleum (MMboe)	124.7	60.2	(5%)	(5%)	(7%)	237	237
Onshore US (MMboe)	58.4	28.5	(5%)	(9%)	(4%)	112	109
Copper (Mt)	0.8	0.4	(6%)	(9%)	2%	1.5	1.5
Escondida (kt)	452	221	(18%)	(22%)	(4%)	940	940
Iron ore (Mt)	118	57	4%	1%	(7%)	247	237
WAIO (100% basis) (Mt)	131	64	6%	5%	(4%)	270	270
Metallurgical coal (Mt)	21	10	(3%)	(6%)	0%	40	40
Energy coal (Mt) ⁽²⁾	19	10	(3%)	(6%)	(3%)	40	40

Major development projects

During the December 2015 quarter, BHP Billiton approved an investment of US\$314 million (BHP Billiton share) for the North West Shelf Greater Western Flank-B petroleum project. This follows the delivery of first production from the North West Shelf Greater Western Flank-A project during the December 2015 quarter, which was completed under budget and ahead of schedule. The Flank-A project will not be reported in future Operational Reviews.

At the end of the December 2015 quarter, BHP Billiton had four major projects under development in Petroleum, Copper and Potash, with a combined budget of US\$6.9 billion over the life of the projects.

Corporate update

BHP Billiton expects Underlying attributable profit in the December 2015 half year to include additional charges in a range of approximately US\$300 million to US\$450 million related to: (1) redundancies largely associated with the simplification of our business, rig terminations in Onshore US and closure of the Crinum coal mine; (2) inventory write-downs reflecting significantly weaker commodity prices; and (3) global royalty and taxation matters.

Additional charges to be recognised in the December 2015 half year (US\$ million)	Underlying EBIT ⁽¹⁾	Underlying attributable profit ⁽¹⁾
Redundancies and closure ⁽ⁱ⁾ : across all businesses	200 to 250	125 to 175
Inventory write-downs: across all minerals businesses	100 to 150	50 to 100
Global royalty and taxation matters	125 to 175	125 to 175
Total charges	425 to 575	300 to 450

(i) Includes rig termination charges in Onshore US

In addition, the Group expects to record a number of exceptional items in the December 2015 half year.

On 15 January 2016, BHP Billiton announced that it expects to recognise an impairment charge of approximately US\$4.9 billion post-tax (or approximately US\$7.2 billion pre-tax) against the carrying value of its Onshore US assets. The impairment reflects changes to price assumptions, discount rates and development plans. This follows significant volatility and much weaker prices experienced in the oil and gas industry which have more than offset our substantial productivity improvements. This impairment will be reported as an exceptional item in the interim financial results to be released in February 2016.

'Global taxation matters' includes potential litigation and tax-related amounts.

**Exceptional items to be recognised in the December 2015 half year
(US\$ billion)**

Attributable profit

Impairment of Onshore US assets	~4.9
Global taxation matters	0.25 to 0.45

On 5 November 2015, the Samarco Mineração S.A (Samarco) iron ore operation in Minas Gerais, Brazil, experienced a breach of the Fundão tailings dam and Santarém water dam. Samarco is continuing to work on quantifying the estimated costs related to the tragedy and, therefore, it is too early to provide an estimate of the financial impact on BHP Billiton. We are continuing to work closely with Samarco and will provide an estimate as soon as we are in a position to do so. BHP Billiton's 50 per cent interest in Samarco is recorded as an equity accounted investment as one line on the balance sheet. Any charges related to the event are expected to be classified as an exceptional item.

The Group's adjusted effective tax rate⁽³⁾ is expected to remain in the range of 33 per cent to 37 per cent in the December 2015 half year.

The above guidance will be updated should material information or events arise as the Group finalises its financial statements.

Marketing update

The average realised prices achieved for our major commodities are summarised in the table below. Iron ore shipments, on average, were linked to the index price for the month of shipment, with price differentials reflecting product quality. The majority of metallurgical coal and energy coal exports were linked to the index price for the month of shipment or sold on the spot market, with price differentials reflecting product quality.

Average realised prices ⁽ⁱ⁾	Dec 2015 Half	Dec 2014 Half	June 2015 Half	FY15	Dec H15 vs Dec H14	Dec H15 vs Jun H15	Dec H15 vs FY15
Oil (crude and condensate) (US\$/bbl)	42	85	52	68	(51%)	(19%)	(38%)
Natural gas (US\$/Mscf) ⁽ⁱⁱ⁾	2.91	4.21	3.29	3.77	(31%)	(12%)	(23%)
US natural gas (US\$/Mscf)	2.35	3.89	2.59	3.27	(40%)	(9%)	(28%)
LNG (US\$/Mscf)	8.24	13.76	9.40	11.65	(40%)	(12%)	(29%)
Copper (US\$/lb)	2.12	2.98	2.61	2.78	(29%)	(19%)	(24%)
Iron ore (US\$/wmt, FOB)	43	70	53	61	(39%)	(19%)	(30%)
Hard coking coal (US\$/t)	82	110	99	105	(25%)	(17%)	(22%)
Weak coking coal (US\$/t)	67	92	85	88	(27%)	(21%)	(24%)
Thermal coal (US\$/t) ⁽ⁱⁱⁱ⁾	49	61	56	58	(20%)	(13%)	(16%)
Nickel metal (US\$/t)	9,926	16,905	13,688	15,301	(41%)	(27%)	(35%)

(i) Based on provisional, unaudited estimates. Prices exclude third party product and internal sales, and represent the weighted average of various sales terms (for example: FOB, CIF and CFR), unless otherwise noted.

(ii) Includes internal sales

(iii) Export sales only; excludes Cerrejón. Includes thermal coal sales from metallurgical coal mines.

At 31 December 2015, the Group had 268 kt of outstanding copper sales that were revalued at a weighted average price of US\$2.14 per pound. The final price of these sales will be determined over the remainder of the 2016 financial year. In addition, 363 kt of copper sales from the 2015 financial year were subject to a finalisation adjustment in the current period. The provisional pricing and finalisation adjustments will decrease earnings before interest and tax by US\$336 million in the December 2015 half year.

Petroleum

Production

	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15
Crude oil, condensate and natural gas liquids (MMboe)	60.5	29.8	(3%)	(4%)	(3%)
Natural gas (bcf)	385.6	182.8	(7%)	(6%)	(10%)
Total petroleum production (MMboe)	124.7	60.2	(5%)	(5%)	(7%)

Total petroleum production – Total petroleum production for the December 2015 half year decreased by five per cent to 124.7 MMboe. Guidance for the 2016 financial year remains unchanged at 237 MMboe, as the strong performance by our Conventional business offset lower volumes following a further reduction in Onshore US activity, a third party gas plant outage in the Permian and the successful divestment of our gas business in Pakistan.

Crude oil, condensate and natural gas liquids – Crude oil, condensate and natural gas liquids production for the December 2015 half year decreased by three per cent to 60.5 MMboe.

Onshore US liquids volumes for the December 2015 half year rose by eight per cent to 26.3 MMboe, underpinned by an increase in liquids production from the Black Hawk and Permian of nine per cent and 78 per cent, respectively. However, a reduction in capital spend of approximately 25 per cent contributed to a three per cent decline in liquids production from the Black Hawk and Permian, relative to the September 2015 quarter. Given a further reduction in development activity, annual liquids volumes from these liquids-rich fields are now expected to show a modest decline year on year.

In our Conventional business, a nine per cent decrease in liquids production reflects the impact of industrial action at Bass Strait and natural field decline across the portfolio.

Natural gas – Natural gas production for the December 2015 half year declined by seven per cent to 386 bcf.

The decline primarily reflects lower Onshore US gas volumes as a result of the decision to defer development activity for longer-term value. This was partially offset by higher seasonal demand at Bass Strait.

Projects

Project and ownership	Capital expenditure (US\$m)	Initial production target date	Capacity	Progress
North West Shelf Greater Western Flank-A (Australia) 16.67% (non-operator)	400	CY16	To maintain LNG plant throughput from the North West Shelf operations.	First production achieved in Q4 CY15. Project completed ahead of schedule and under budget.
Bass Strait Longford Gas Conditioning Plant (Australia) 50% (non-operator)	520	CY16	Designed to process approximately 400 MMcf/d of high-CO ₂ gas.	On schedule and budget. The overall project is 76% complete.
North West Shelf Greater Western Flank-B (Australia) 16.67% (non-operator)	314	CY19	To maintain LNG plant throughput from the North West Shelf operations.	Project approved by all joint venture partners in December 2015.

Conventional capital expenditure of US\$1.5 billion is expected for the 2016 financial year, and remains focused on high-return infill drilling opportunities in the Gulf of Mexico and Western Australia, as well as life extension projects at Bass Strait and North West Shelf.

Onshore US development activity

Onshore US drilling and development expenditure for the December 2015 half year was approximately US\$850 million, less than half the December 2014 half year. Our operated rig count remained at seven in the December 2015 quarter, however, we plan a reduction of two additional rigs from the Black Hawk in the March 2016 quarter as we continue to improve drilling efficiency and defer development activity to preserve value. An update to the drilling and development expenditure budget for the 2016 financial year will be provided with the release of our interim results in February 2016.

December 2015 half year (December 2014 half year)		Liquids focused areas		Gas focused areas		Total
		Eagle Ford	Permian	Haynesville	Fayetteville	
Capital expenditure ⁽ⁱ⁾	US\$ billion	0.6 (1.2)	0.2 (0.4)	0.0 (0.2)	0.0 (0.1)	0.8 (1.9)
Rig allocation	At period end	5 (18)	2 (5)	0 (3)	0 (0)	7 (26)
Net wells drilled and completed ⁽ⁱⁱ⁾	Period total	74 (85)	19 (18)	4 (13)	10 (8)	107 (124)
Net productive wells	At period end	912 (732)	94 (49)	409 (406)	1,085 (1,021)	2,500 (2,208)

(i) Includes land acquisition, site preparation, drilling, completions, well site facilities, mid-stream infrastructure and pipelines.

(ii) Can vary between periods based on changes in rig activity and the inventory of wells drilled but not yet completed at period end.

Petroleum exploration

Exploration and appraisal wells drilled during the December 2015 half year are summarised below.

Well	Location	Target	BHP Billiton equity	Spud date	Water depth	Total well depth	Status
Shenzi North-ST2	Gulf of Mexico GC609	Oil	44% (operator)	15 August 2015	1,309 m	9,332 m	Hydrocarbons encountered; Plugged and abandoned
Shenzi North-ST3	Gulf of Mexico GC609	Oil	72% (operator)	24 October 2015	1,309 m	9,577 m	Hydrocarbons encountered; Evaluation ongoing

Our Petroleum exploration is focused in the deepwater Gulf of Mexico, the Caribbean and the Beagle sub-basin off the coast of Western Australia. We are pursuing high-quality oil plays in these three focus areas and continue to invest opportunistically in future growth options. Since August 2015, BHP Billiton has acquired 26 blocks in the Western Gulf of Mexico Lease Sale with a 100 per cent working interest.

Petroleum exploration expenditure for the December 2015 half year was US\$321 million, of which US\$126 million was expensed. A US\$600 million exploration program remains on plan for the 2016 financial year, largely focused on acreage access, seismic data acquisition across our three key focus areas and increased activity in our exploration drilling program.

Copper

Production

	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15
Copper (kt)	762	385	(6%)	(9%)	2%
Zinc (t)	37,051	16,454	0%	1%	(20%)
Silver (troy koz)	6,056	2,863	36%	37%	(10%)
Uranium oxide concentrate (t)	2,547	1,386	31%	29%	19%

Copper – Total copper production for the December 2015 half year decreased by six per cent to 762 kt as continued strong operating performance across the business was offset by grade decline at Escondida, as anticipated. Guidance for the 2016 financial year remains unchanged at 1.5 Mt.

Escondida copper production for the December 2015 half year decreased by 18 per cent to 452 kt as record material mined, underpinned by improvements in truck availability and utilisation, was more than offset by a 25 per cent decline in grade. Increased ore milled during the period was enabled by a drawdown of historically high-cost, lower grade ore inventory. Production guidance for Escondida remains unchanged at approximately 940 kt for the 2016 financial year, as the ramp up of the Organic Growth Project 1 progresses ahead of plan and is expected to reach full capacity during the year. In the medium term, completion of the Escondida Water Supply project and the potential life extension of Los Colorados will enable utilisation of three concentrators to offset grade decline and support a strong recovery in production⁽⁴⁾.

Pampa Norte copper production for the December 2015 half year was broadly unchanged at 126 kt, as record ore milled and higher grade underpinned record production at Spence and offset lower recoveries at Cerro Colorado. Copper production at Cerro Colorado increased by 37 per cent in the December 2015 quarter relative to the September 2015 quarter as mining progressed through a zone of higher-grade ore. The Spence and Cerro Colorado triennial collective bargaining agreements were successfully concluded in December 2015 and January 2016 respectively. Production at Pampa Norte for the 2016 financial year is now expected to be ahead of the prior year despite a short period of industrial action at Cerro Colorado. In the short to medium term, the Spence Recovery Optimisation project will enable the full utilisation of approximately 200 ktpa of tankhouse capacity.

Olympic Dam copper production increased by 37 per cent from the December 2014 half year to a record 112 kt and reflects record ore milled and improved smelter utilisation following planned maintenance in the prior period. Copper grade increased by 35 per cent in the December 2015 quarter in line with the mine plan. Olympic Dam copper production is now on track to exceed 200 kt for the 2016 financial year.

Antamina copper production for the December 2015 half year increased by 36 per cent to 72 kt as higher grades and recoveries were supported by record material mined and milled. Antamina copper production of 136 kt is forecast for the 2016 financial year.

Project

Project and ownership	Capital expenditure (US\$m)	Initial production target date	Capacity	Progress
Escondida Water Supply (Chile) 57.5%	3,430	CY17	New desalination facility to ensure continued water supply to Escondida.	On schedule and budget. The overall project is 76% complete.

Iron Ore

Production

	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15
Iron ore (kt)	118,275	56,960	4%	1%	(7%)

Iron ore – Total iron ore production for the December 2015 half year increased by four per cent to 118 Mt. Production for the 2016 financial year is now expected to be 237 Mt, four per cent lower than prior guidance, and reflects the suspension of operations at Samarco.

WAIO production increased by six per cent in the December 2015 half year to a record 131 Mt (100 per cent basis), underpinned by the Jimblebar mining hub operating at full capacity and improved ore handling plant utilisation at Newman. This was partially offset by a train derailment and a power outage at the port which reduced volumes in the December 2015 quarter. WAIO guidance for the 2016 financial year remains unchanged at 270 Mt (100 per cent basis) subject to a benign wet season, as continued productivity is expected to offset the one-off operational issues from the December 2015 quarter. The ramp-up of additional capacity at the Jimblebar mining hub and further improvements in the efficiency of the integrated supply chain will deliver an increase in system capacity to 290 Mtpa over time.

Samarco production for the December 2015 half year decreased by 25 per cent to 11 Mt (100 per cent basis). Mining and processing operations at Samarco remain suspended following the breach of the Fundão tailings dam and Santarém water dam on 5 November 2015. Pellets continued to be shipped from port stockpiles during the December 2015 quarter with the final shipment of pellets expected in January 2016.

The sale of BHP Billiton's 100 per cent interest in its Liberia iron ore project to Cavalla Resources was completed in October 2015.

Coal

Production

	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15
Metallurgical coal (kt)	20,934	10,485	(3%)	(6%)	0%
Energy coal (kt)	19,384	9,537	(3%)	(6%)	(3%)

Metallurgical coal – Metallurgical coal production for the December 2015 half year decreased by three per cent to 21 Mt. Guidance for the 2016 financial year remains unchanged at 40 Mt.

Queensland Coal production declined in the December 2015 half year as record production at the Blackwater, Daunia, Caval Ridge and South Walker Creek mines was offset by a convergence event at the Broadmeadow mine, which has since resumed normal operations, and completion of longwall mining at the Crinum mine. The Crinum mine will transition into care and maintenance in the March 2016 quarter.

Energy coal – Energy coal production for the December 2015 half year decreased by three per cent to 19 Mt. Guidance for the 2016 financial year remains unchanged at 40 Mt⁽²⁾.

Lower production for the December 2015 half year reflected continued drought conditions at Cerrejón and the impact of heavy rainfall at New South Wales Energy Coal. A 16 per cent increase in Navajo Coal volumes due to higher customer demand was offset by lower customer requirements for our San Juan product.

On 2 July 2015, BHP Billiton announced that the sale agreement for the San Juan Mine to Westmoreland Coal Company (WCC) had been executed. Regulatory approval has been received and the transaction is now expected to be completed in the March 2016 quarter, following agreement with both parties to ensure all closing conditions are met.

Other

Nickel production

	Dec 2015 Half	Dec 2015 Qtr	Dec H15 vs Dec H14	Dec Q15 vs Dec Q14	Dec Q15 vs Sep Q15
Nickel (kt)	37.3	15.2	(23%)	(36%)	(31%)

Nickel – Nickel West production for the December 2015 half year decreased by 23 per cent to 37.3 kt. Lower volumes reflected planned major outages at the Kalgoorlie smelter and Kwinana refinery during the December 2015 quarter and a reduction in third party ore delivered to the Kambalda concentrator.

Potash project

Project and ownership	Investment (US\$m)	Scope	Progress
Jansen Potash (Canada) 100%	2,600	Investment to finish the excavation and lining of the production and service shafts, and to continue the installation of essential surface infrastructure and utilities.	The project is 54% complete and within the approved budget. Shaft excavation is progressing.

Minerals exploration

Minerals exploration expenditure for the December 2015 half year was US\$89 million, of which US\$73 million was expensed. Greenfield minerals exploration is predominantly focused on advancing copper targets within Chile, Peru and the South-West United States.

Variance analysis relates to the relative performance of BHP Billiton and/or its operations during the December 2015 half year compared with the December 2014 half year, unless otherwise noted. Production volumes, sales volumes and capital and exploration expenditure from subsidiaries are reported on a 100 per cent basis; production and sales volumes from equity accounted investments and other operations are reported on a proportionate consolidation basis.

The following footnotes apply to this Operational Review:

- (1) Underlying attributable profit and Underlying EBIT are used to reflect the underlying performance of BHP Billiton. Underlying attributable profit is Attributable profit excluding any exceptional items. Underlying EBIT is earnings before net finance costs, taxation and any exceptional items.
- (2) Guidance assumes a full year of production from the San Juan mine.
- (3) The Group's adjusted effective tax rate excludes the influence of exchange rate movements and exceptional items.
- (4) Subject to Escondida Owners Council approval.

The following abbreviations may have been used throughout this report: barrels (bbl); billion cubic feet (bcf); cost and freight (CFR); cost, insurance and freight (CIF); dry metric tonne unit (dmu); free on board (FOB); grams per tonne (g/t); kilograms per tonne (kg/t); kilometre (km); metre (m); million barrels of oil equivalent (MMboe); million cubic feet per day (MMcf/d); million tonnes (Mt); million tonnes per annum (Mtpa); ounces (oz); pounds (lb); thousand barrels of oil equivalent (Mboe); thousand ounces (koz); thousand standard cubic feet (Mscf); thousand tonnes (kt); thousand tonnes per annum (ktpa); thousand tonnes per day (ktpd); tonnes (t); and wet metric tonnes (wmt).

- (1) LPG and ethane are reported as natural gas liquids (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe). Total boe conversions are based on 6 bcf of natural gas equals 1 MMboe.
- (2) Metal production is reported on the basis of payable metal.
- (3) Shown on a 100% basis. BHP Billiton interest in saleable production is 57.5%.
- (4) Includes Cerro Colorado and Spence.
- (5) Iron ore production is reported on a wet tonnes basis.
- (6) Shown on a 100% basis. BHP Billiton interest in saleable production is 85%.
- (7) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (8) Shown on a 100% basis. BHP Billiton interest in saleable production is 80%.
- (9) Shown on a 100% basis. BHP Billiton interest in saleable production is 75%.
