Socio-economic landscape

Impact on our clients

Socio-economic landscape

Swift recovery from pandemic, but long-term impact still uncertain

Positive

- Global commodity boom
- Current account surplus widened, low inflation and interest rates
- Improved collaboration between government and private sector
- Resilience of South African companies and individuals
- Community involvement during July 2021 civil unrest

Uncertainty

- Vaccination rate and possible next COVID-19 wave
- Exit and shortage of critical skills - Education system
- Inequality exacerbated by COVID-19
- Social grants versus culture of entrepreneurship and ownership
- Government's role – confidence, clarity and execution
- Long-term impact of COVID-19 and July 2021 civil unrest

Socio-economic landscape

Impact of July 2021 civil unrest

Impact on Capitec

Retail credit

Granting
Diversification
Performance
Economic uncertainty
Provisions

Credit granting

Recovery driven by proactive management of credit granting during pandemic

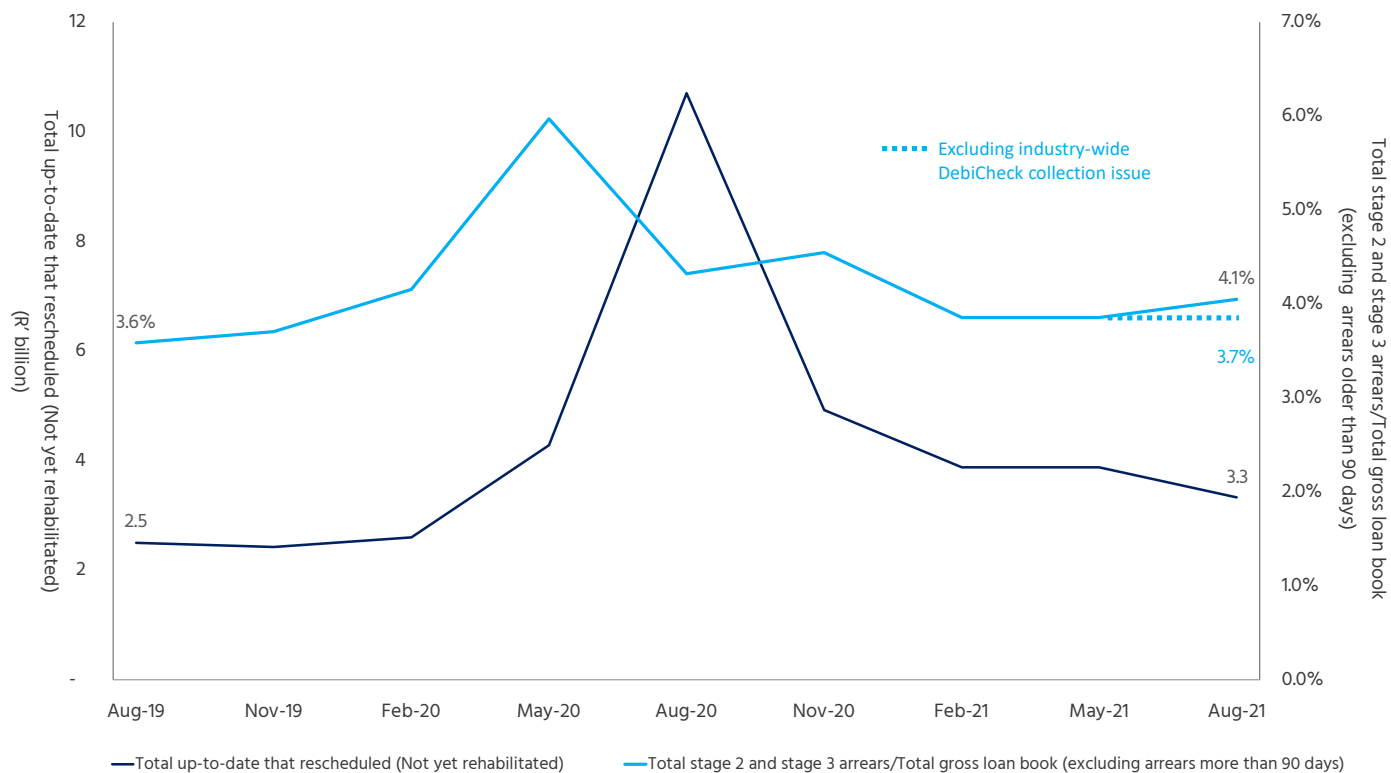

Main drivers

- Agile risk approach to granting as restrictions eased
- Competitive pricing: Global One clients on average received 16% lower term loan interest rates and fees than the market *
- Interest rates from 7%

Note: Statement is based on bureau information for Capitec clients

Credit book performance

Improvement in arrears and unrehabilitated reschedules to pre-COVID-19 levels

- Improvement in arrears and unrehabilitated reschedules
- Positively impacted by our COVID-19 client payment relief plan. This behavioural incentive led to good repayment performance (H1 2022: R197 million payout)
- COVID-19 third wave and civil unrest rescheduling impact were R40 million

Diversified portfolio

New Access Facility grew to 32% of total credit disbursed

Flexible features

- No use, no monthly fees
- Once-off application and initiation fee R100 to R300 (max)

Attractive facility pricing

- Credit Card priced from 7%
- Access Facility priced from 12.15%
- Lower ROE than term loans to drive quality sales

Correct behaviours

- Conservative utilisation (H1 2022: 49% | FY 2021: 59%)
- <11% of clients consolidated their Term Loan with an Access Facility

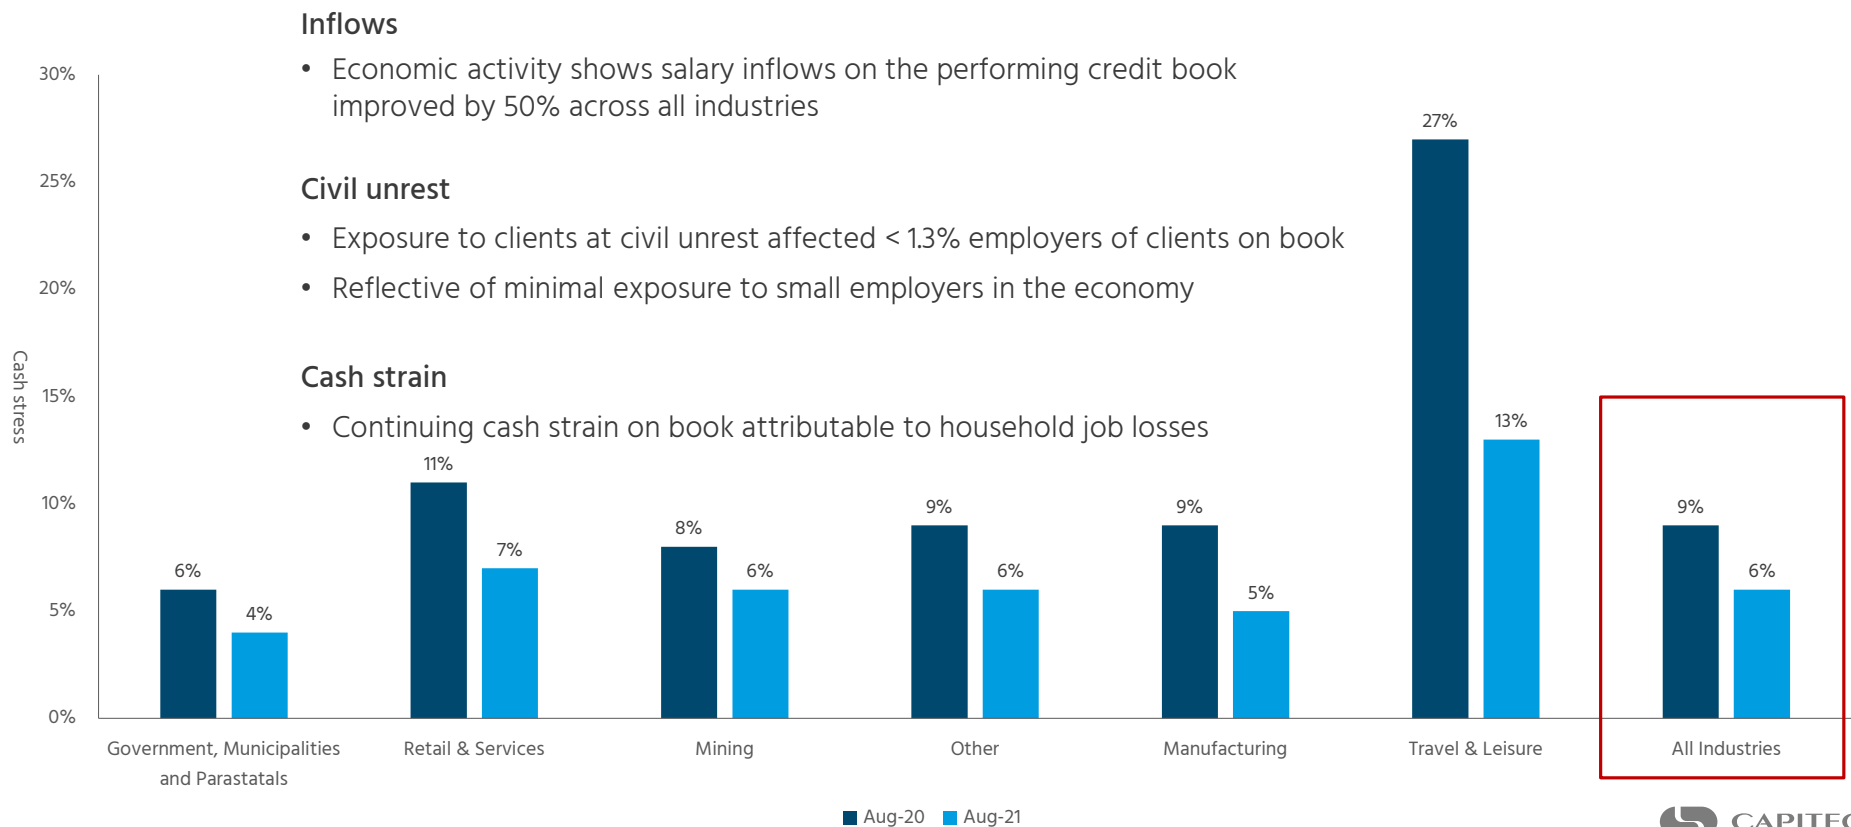

Continuous risk management

- Conservative granting (<27% of applications approved)
- Daily risk management - 13% of Access Facility limits decreased in line with cash stress and risk monitoring

Credit book performance

Improved inflows but still cash strain in certain pockets of employed survivors

Credit book performance

Low book debt review roll levels experienced

- Low debt review levels (<0.5% H1 2022)
- Rolls into debt review largely attributable to increased unemployment levels in SA, adding additional household cash stress to employed clients

Economic uncertainty

Household stress in the last 3 years

Household Adult Dependants

Other Dependants (Other Than Children): The sharp increase in adult dependants seen in 2020 has been maintained and it is notable that Gen Z (those aged 25 years and younger in 2021) have the highest incidence of adult dependants.

Sandwich Generation

The term '**Sandwich Generation**' has been coined to describe those who are supporting not only children but also parents and/or other older dependants. 2020 saw a significant increase which has been maintained in 2021.

- **Now** - employed individuals supporting a wider base/family support
- **Future** - additional household strain anticipated in future (rising interest rates, electricity and petrol prices)

Retail credit provisions

Expected credit loss (ECL) coverage ratio remained prudent at 26.5%

(Total provision for credit impairments/Total gross loans and advances)

Impairment charge

- At pre-COVID-19 levels
- Employment stability

ECL coverage ratio

- Remains prudent at 26.5%
- Economic uncertainty
- Household stress

Business bank

Building the future

Business bank

Headline earnings for the 6-month period was R126 million

Total active clients increased by 16% to 104 777

- +/- 1 300 new business clients per month

Key financial performance indicators

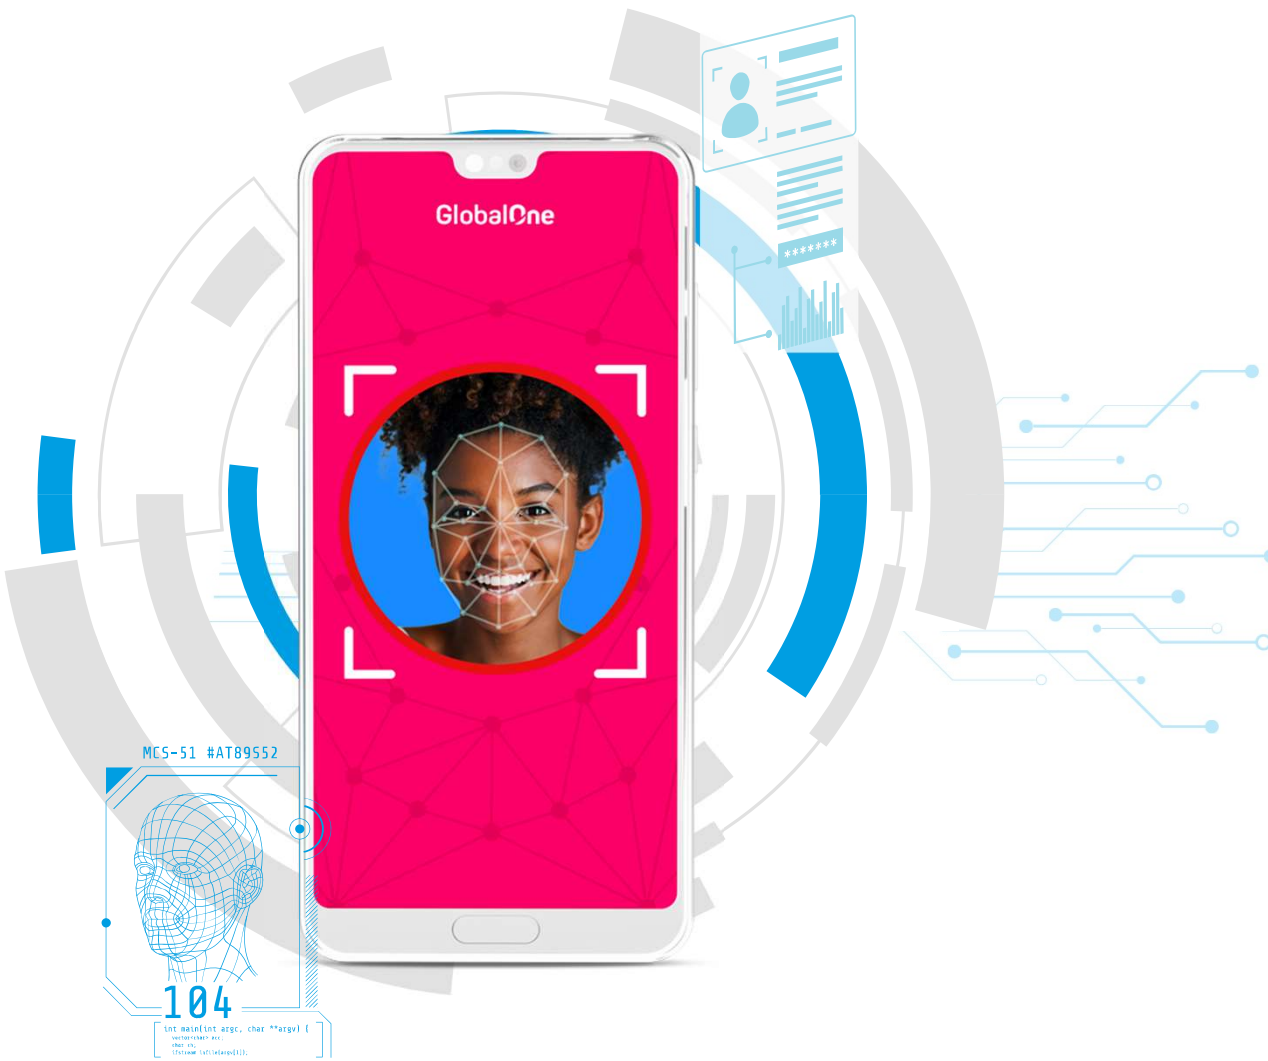

- Robust transactional recovery as a result of eased lockdown restrictions
- Excellent foreign exchange performance on the back of strengthening Rand
- Higher operating expenses due to continued business development

Loan book and prudent provisioning

- Stable book growth over the last 6 months
- ECL coverage at 6.1% (Feb 2021: 5.9% | Aug 2020: 5.5%)

Rebranding of Business bank offering still on track for Q3 of next year.
