## ROE decomposition unpacks drivers of operational performance

ROE (%)	22.3	21.2	15.6	20.1
Gearing (times)	13.0	12.8	13.7	12.4

## Speed of ROE recovery demonstrates sustainability of structural underpins

- Relative size of:
  - Transactional franchise (contributes approximately half of gross revenue)
  - Deposit franchise and resultant lower reliance on institutional funding
- Relative advances mix delivers higher risk-adjusted margins
- Credit appetite, underwriting and pricing anchored to preserve return profile
- Disciplined allocation and pricing of financial resources (capital, funding and liquidity, and risk capacity) and ALM strategies
- Market-leading private equity franchise has remained consistent generator of high returns, moving into a realisation cycle
- Executing on strategies to diversify NIR given pressure on transactional revenue from increased competition and potential regulatory intervention
  - Scaling insurance and investment management key to maintaining return profile – these activities already contribute c. R5.6 billion to NIR annually
  - Also growing other sources of NIR (e.g. FNB Connect and »nav)

## Insurance activities continue to scale and already a meaningful contributor to NIR

- Insurance income averaged R3.9 billion per annum (c. 9% of NIR) over the last five financial years
- Organic strategy has delivered impressive returns and dividends to group well ahead of expectations
- Group now offers full suite of retail life and short-term insurance products
- R7.1 billion life claims paid to date
- 6.8 million lives covered
- FNB Life now the third-largest insurer in the retail customer base

FNB Life market share of retail debit orders

## Investment management activities starting to see benefits of strategic repositioning in 2019

Group assets under management  
R billion

FNB WIM accounts  
Thousands

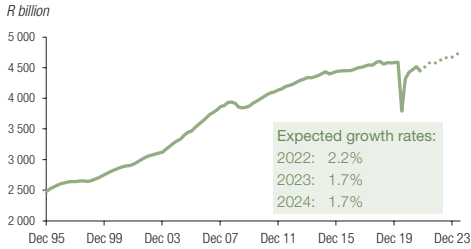

- Investment activities contributed c. R1.7bn of revenue in FY21
- Ashburton – asset manager focused on institutional and intermediary market
  - Fixed-income funds continued to perform well
  - Equities – strong turnaround in investment performance in restructured multi-asset funds
- Net inflows of R15.3 billion (Dec 20: R4.3 billion)
- FNB WIM continues to focus on expanding market share in the FNB retail base – currently at 8% penetration

## RMB's PBT benefited from diversified portfolio

Normalised PBT

R million

- Banking benefited from normalisation of credit cycle and lower impairments
  - Performing coverage remained conservative
  - Lower NII reflects reduction in average advances and ongoing margin pressure due to competitive pricing
  - Increase in origination activities and working capital facility utilisation in key sectors drove core advances growth of 6%
  - Average core deposits grew 9%, reflecting new primary-banked relationships, positive impact of commodity cycle and corporates' liquidity positions
  - R240 million realisations from principal investments business
- Solid markets contribution driven by exchange rate volatility, offset by softer fixed income performance
- Private equity performance reflects lower credit provisioning compared to prior period, and annuity income grew 5%
- Cost growth contained at 4% – investment into modernisation of core platform and rest of Africa business continues

## FNB rest of Africa PBT rebounded strongly

30

Normalised PBT

R million

- Significant reduction in credit impairments
- Good growth in deposits of 10% driven by ongoing customer acquisition
- Muted advances growth reflects cautious origination approach
- Continued negative endowment impact
- Cost containment was aided by increased digital migration
- Cash Plus continues to scale, adding 492 agents since June 2021 to 2 260 in total

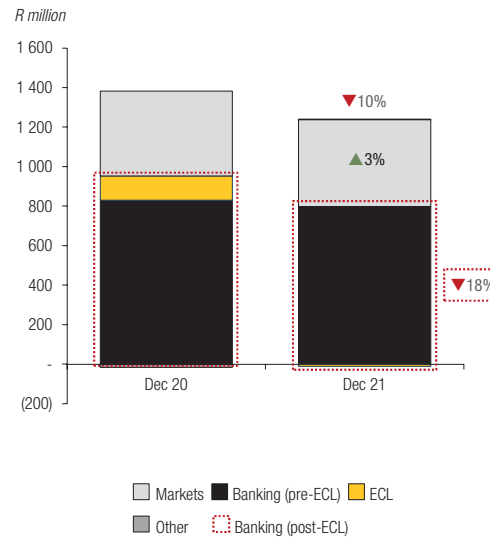

\* Mature subsidiaries: Botswana, Namibia, Eswatini (mature subsidiaries' performance shown gross of minority interests).

\*\* Growth-phase subsidiaries: Lesotho, Mozambique, Zambia, Ghana and support (including Tanzania).

## RMB's rest of Africa portfolio benefited from strong in-country performance, despite credit provision releases in base

Rest of Africa\* normalised PBT

### Banking

- New clients contributed to transactional volume growth
- Good in-country advances growth and margin expansion, notably in Zambia
- Results negatively impacted by a swing of >R130 million in cross-border credit provisions
- Ongoing deposit margin compression related to multiple rate cuts over the last 18 months in various jurisdictions
- Cautious origination and exchange rate moves continue to weigh on cross-border advances growth

### Markets

- Strong performance from Zambia and Nigeria in-country business
- Cross-border performance impacted by roll-off of structured deals

\* Strategy view including in-country and cross-border activity.

## UK operations delivered a resilient performance

33

- Reduction in credit loss ratio reflects more positive UK macroeconomic outlook and improved collections and customer management
- Grew deposit franchise with focus on diversifying funding mix
- Origination activity managed to support returns in line with financial resource management strategies
- Margin improved through deposit pricing and mix change
- Ongoing investment in business
- Aldermore continues to maintain strong capital and liquidity positions

looking  
ahead

## Looking forward, the group remains well positioned to deliver growth and superior returns

- Advances growth should accelerate as SA credit cycle gains momentum
- Deposit growth anticipated to slow as consumers draw down precautionary savings
- Steady improvement expected in the rest of Africa with continued benefit from commodity cycle
- UK economic rebound expected to be maintained – absolute growth in earnings for the full year is now expected to be stronger than previously guided
- ROE expected to remain in the stated range of 18% to 22% for the full year despite capital generation exceeding demand
- Earnings growth for the full year expected to exceed group’s long-term target of real growth in earnings (defined as real GDP plus CPI) – benefiting from last tailwinds of pandemic recovery
