

Sustainability Complementary
Data Report 2021

Life Healthcare

Sustainability complementary data report

Introduction

We are delighted to present our first 2021 Sustainability complementary data report as part of our Sustainable Development report. The aim of this report is to supplement the 2021 Integrated Annual report. This document provides our stakeholders with detailed data tables that reflect the sustainability performance for Life Healthcare.

In this report

- IFC Our approach to sustainability
- IFC Scope and boundary
- 1 Sustainability Governance Framework
- 2 Our contribution to United Nations – Sustainable Development Goals
- 4 Intellectual capital
- 6 Natural capital
- 9 Human capital
- 12 Social and relationship capital
- IBC Glossary

Life Healthcare's new corporate head office in Johannesburg delightfully attained a significant milestone with the awarding of the 5-Star Green Star Office Design certification from the Green Building Council of South Africa.

OUR APPROACH TO SUSTAINABILITY

At Life Healthcare we recognise Sustainable Development as a key strategic focus for the long-term sustainability of our business. Sustainable Development is a strategic tool that enables us to incorporate the creation of social, environmental and economic value into our strategy and day-to-day operations for long-term sustainability. We believe that Sustainable Development makes business sense while also being good for our people and our planet.

We understand that for our business to grow sustainably, we have a duty to develop our people, enhance stakeholder value and minimise the impact of our operations on the environment. We are aware that it is critical in today's world to identify, understand, and manage material environmental, social and governance (ESG) impacts.

While as a Group we are in the early phase of our sustainability journey, we are delighted to have attained a significant milestone with the awarding of the 5-Star Green Star Office

Design certification from the Green Building Council of South Africa for our new head office. This internationally recognised award is an indication to our commitment to protecting our people and our planet.

We also received a 'AAA' rating from MSCI ESG Research (2020: 'A') placing Life Healthcare in a best-in-class category within the global healthcare sector.

Our approach to sustainability as an international corporate citizen is guided by the United Nations Global Compact (UNGC) requirements and the United Nations – Sustainable Development Goals (SDGs), which are integrated within our Global Code of Conduct.

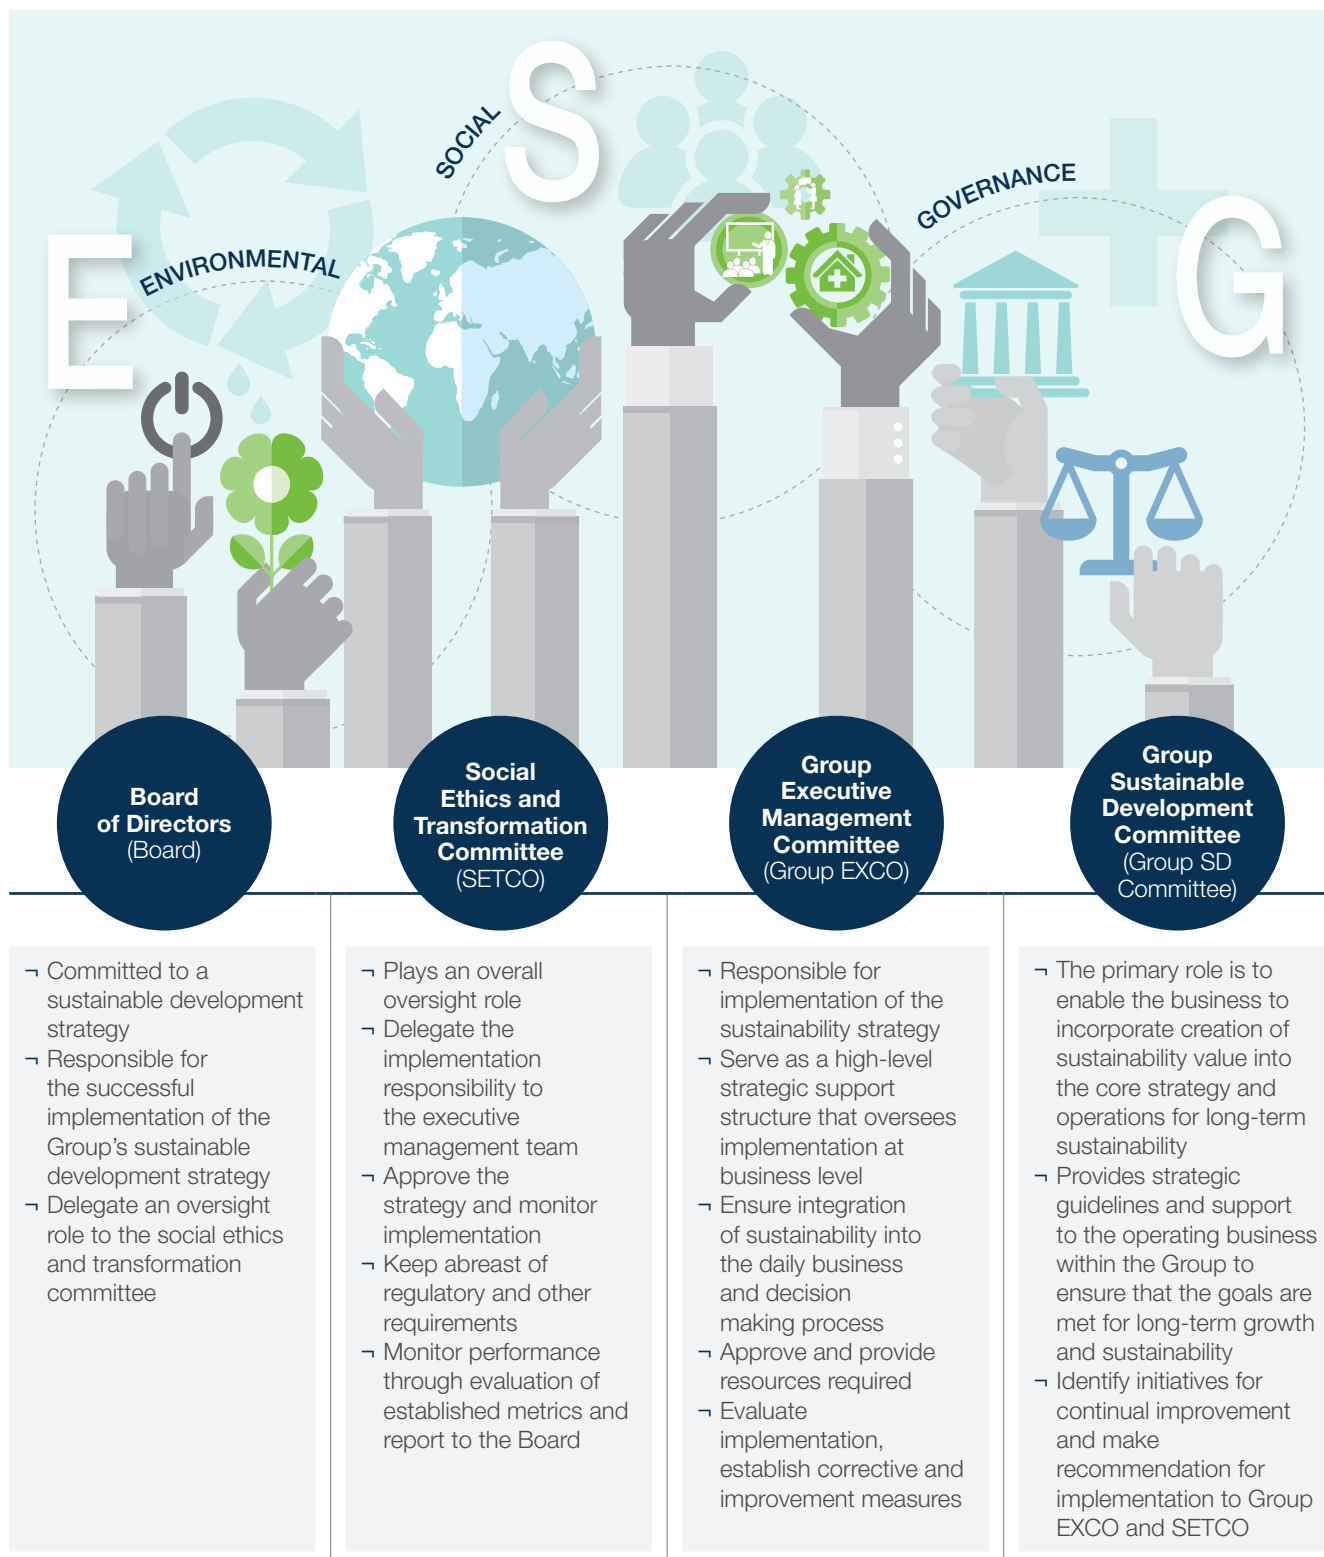

Life Healthcare intends to set sustainability targets for the Group during 2022. The targets will be based on the material issues relevant to the nature of our business and our operating environment. The sustainability targets will become the driving tool for our business to attain strategic Group ESG goals.

SCOPE AND BOUNDARY

The information contained in this sustainability complementary data report includes our South African (SA) and the international operations. The SA operations exclude Botswana. The natural capital data only include data from our South African business.

Sustainability Governance Framework

Environment, Social and Governance (ESG) for part of the suitability framework detailed below:

Sustainability complementary data report continued

Our contribution to United Nations – Sustainable Development Goals

GOAL

Life Healthcare Contribution

- Food Relief Project for vulnerable communities
- Application of statutory minimum wage or Living Wage in all regions
- Regional employment growth in all regions

GOAL

Life Healthcare Contribution

- Life Healthcare has performed over 200 cataract surgeries and eye care services to state indigent patients
- Life Healthcare has contributed to 17 268 cataract surgeries, issued 15 000 spectacles and screened over 65 000 patients in partnership with the South African National Council for the Blind (SANCB) since the inception of the project
- Employee wellness programme in place through Life Employee Health Solutions
- Employee Assistance Programme in operation
- Regional employee wellbeing initiatives at Alliance Medical Group (AMG)
- Distribution of sanitary pads to high school girls

GOAL

Life Healthcare Contribution

- Masters of Science research funding into product development for Rheumatic Heart Disease
- AMG Research Committee lead the development of new imaging agents and technologies to broaden the evidence-based application of PET-CT to other diseases
- AMG medical team work closely with multiple universities throughout Europe. The nature of their activities includes research support, provision of formal and elective clinical placement opportunities, provision of lecture support and graduate recruitment support

GOAL

Life Healthcare Contribution

- *Women in Life* project
- Transformation agenda in southern Africa
- Diversity strategy initiative
- Diversity policies in operation
- Appointment of two additional women to the Board adding to Board diversity

GOAL

Life Healthcare Contribution

- 5-Star Green Star Office Design certification for head office building
- Solar PV installed at 15 hospitals
- Introduction of electric vehicles into AMG's UK fleet
- ISO 14001:2015 certification

Our approach to sustainability as an international corporate citizen is guided by the United Nations Global Compact (UNGC) requirements and the United Nations – Sustainable Development Goals (SDGs), which are integrated within our Global Code of Conduct.

<p>GOAL</p> 	<p>Life Healthcare Contribution</p> <ul style="list-style-type: none"> → Environmental impact studies integrated into project management → Environmental impact assessment studies are conducted to evaluate the environmental impact and mitigating controls are implemented
<p>GOAL</p>  	<p>Life Healthcare Contribution</p> <ul style="list-style-type: none"> → Invest, maintain and upgrade hospital facilities on an ongoing basis → Specialised product development division created, focusing on healthcare product innovation to take to market → AMG Research Committee lead the development of new imaging agents and technologies to broaden the evidence-based application of PET-CT to other diseases. Trial topics include various aspects of dementia, lymphoma, endometrial, lung and liver cancers. → Alongside National Health Service (NHS) England, AMG has also initiated what will possibly be the largest study on early diagnosis of Alzheimer's disease
<p>GOAL</p>  	<p>Life Healthcare Contribution</p> <ul style="list-style-type: none"> → Three play pumps installed to provide access to water for three villages in EmaMpondweni (Pondoland) in the Eastern Cape. → Six school sites have been identified for additional play pumps in KwaZulu-Natal, with three installations to commence in December 2021 and three in early 2022. → Water consumption reduction initiative at business operations → Compliance with regional environmental agency legislation
<p>GOAL</p> 	<p>Life Healthcare Contribution</p> <ul style="list-style-type: none"> → Pondoland conservation trust → Life Healthcare is supporting the development of a rural village in the Eastern Cape, including sponsorship for the building of a community centre. In addition, a three-year sponsorship of running costs which including a Wi-Fi hub, health centre on selected days and the salaries of employees at the adjoining school
<p>GOAL</p> 	<p>Life Healthcare Contribution</p> <ul style="list-style-type: none"> → Employee reward and recognition programme → Compliance with regional employment legislation → Structured employee reward policies and procedures → Regional employment growth in all regions

INTELLECTUAL CAPITAL

We differentiate ourselves through excellent service offerings, responsible corporate governance and adherence to quality standards – the intangibles of our business that contribute to our competitive advantage

Life Healthcare conducts business across multiple international territories and acknowledges its obligation to understand and comply with applicable legal and regulatory requirements wherever it does business. We will endeavour to meet these requirements and will engage with regulatory authorities openly and honestly.

Our Global Code of Conduct covers the following sustainability governance issues among others:

Anti-bribery and corruption	Life Healthcare public policy: donations to governments prohibited	Anti-competitive behaviour
Compliance with regulatory requirements	Grievance mechanisms for impacts on society	Non-discrimination
Abolition of child labour	Human rights grievance mechanisms	Forced or compulsory labour

An Ethics Office has been set up and the Tip-Off line is widely advertised across the business to ensure that employees feel free to anonymously report matters.

CONDUCTING OUR BUSINESS IN A RESPONSIBLE MANNER

NATURAL CAPITAL – only SA included in the scope

We make use of both renewable and non-renewable natural resources in the delivery of services to our patients. While our business has an unavoidable impact on the environment, we endeavour to reduce negative impacts by measuring and managing our activities.

Some of the data presented here has not previously been collected, measured and/or published. Consequently, only 2021 data points are presented.

CLIMATE CHANGE

Total water withdrawn – borehole	Kl	214 345	n/a	n/a

NATURAL CAPITAL continued

Healthcare risk waste (HCRW) data provided below includes newly measured and disclosed data points in 2021. Consequently, prior data was not available.

The COVID-19 operating environment has led to an increase in HCRW generated, particularly due to the increased use of personal protective equipment. In addition, our facilities have seen reduced paid patient days (PPDs) as a result of COVID-19. This has resulted in an increase in the HCRW per PPD ratio for both 2020 and 2021.

WASTE MANAGEMENT

KPI	UOM	2021	2020	2019
