## Cautionary Statement

This report may contain certain forward looking statements with respect to certain of Old Mutual Limited's plans and its current goals and expectations relating to its future financial condition, performance and results and, in particular, estimates of future cash flows and costs. By their nature, all forward looking statements involve risk and uncertainty because they relate to future events and circumstances which are beyond Old Mutual Limited's control including amongst other things, domestic conditions across our operations as well as global economic and business conditions, market related risks such as fluctuations in equity market levels, interest rates and exchange rates, the policies and actions of regulatory authorities, the impact of competition, inflation, deflation, the timing and impact of other uncertainties of future acquisitions or combinations within relevant industries, as well as the impact of tax and other legislation and other regulations in the jurisdictions in which Old Mutual Limited and its affiliates operate. As a result, Old Mutual Limited's actual future financial condition, performance and results may differ materially from the plans, goals and expectations set forth in Old Mutual Limited's forward looking statements. Old Mutual Limited undertakes no obligation to update the forward looking statements contained in this report or any other forward looking statements it may make. Nothing in this report shall constitute an offer to sell or the solicitation of an offer to buy securities.

## Notes to Editors

A webcast of the presentation of the 2019 Annual Results and Q&A will be broadcast live at 11.00 am South African time on 16 March 2020 on the Company's website [www.oldmutual.com](http://www.oldmutual.com). Analysts and investors who wish to participate in the call can do so using the numbers below:

South Africa	+27 10 500 4108
UK	+44 203 608 8021
Australia	+61 73 911 1378
USA	+1 412 317 0088
International	+27 10 500 4108
Replay Access Code	31029

Pre-registration to participate in the call is available at the following link: <http://78449.themediaframe.com/links/oldmutual200316.html>

## About Old Mutual Limited

Old Mutual is a premium African financial services Group that offers a broad spectrum of financial solutions to retail and corporate customers across key market segments in 14 countries. Old Mutual's primary operations are in South Africa and the Rest of Africa, and we have a niche business in China. With over 175 years of heritage across sub Saharan Africa, we are a crucial part of the communities we serve and broader society on the continent.

For further information on Old Mutual Limited, and its underlying businesses, please visit the corporate website at [www.oldmutual.com](http://www.oldmutual.com).

## SEGMENT DELIVERY

Rm	FY 2019	FY 2018	% change
Mass and Foundation Cluster	3,527	3,129	13%
Personal Finance	1,730	2,021	(14%)
Wealth and Investments	1,447	1,611	(10%)
Old Mutual Corporate	1,816	1,703	7%
Old Mutual Insure	233	670	(65%)
Rest of Africa <sup>1</sup>	496	430	15%
Net expenses from central functions	(277)	(425)	35%
<b>Results from Operations</b>	<b>8,972</b>	<b>9,139</b>	<b>(2%)</b>

Segment contribution to Results from Operations

1. Both periods exclude the operating results of Zimbabwe

7

Notes:

## DEFEND AND GROW SA MARKET SHARE IN MASS MARKET

### Sales growth impacted by tough macro environment

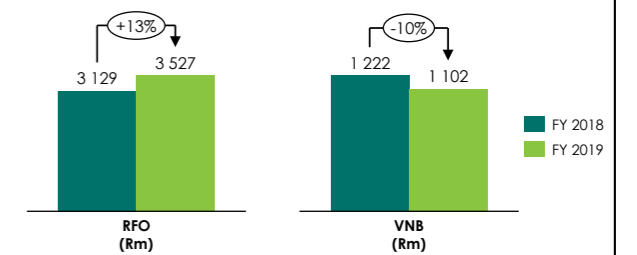

- Life APE sales **down 4% due to lower productivity** and deliberate actions to improve quality of group funeral business and lower credit life sales
- VNB decline due to lower volumes and value proposition enhancements to savings product

### Higher credit losses due to faster than anticipated deterioration in credit quality, deliberate slowdown of growth in loans in Q4 2019

RFO boosted by **positive impact of mortality basis change**, partially offset by negative impact of **poor persistency**

Serviced **more than 3.2 million customers** across 368 branches in South Africa

9

Notes:

## BASIS CHANGES IN 2019

Rm	Group	FY 2019				FY 2018
		Mass and Foundation Cluster	Personal Finance	Old Mutual Corporate	Rest of Africa	Group
1 Non-economic basis changes	(81)	1,330	(1,447)	74	(38)	43
2 Economic basis changes	1,013	-	772	217	24	(1)
<b>Total basis changes</b>	<b>932</b>	<b>1,330</b>	<b>(675)</b>	<b>291</b>	<b>(14)</b>	<b>42</b>

- Net non-economic basis change not materially different to 2018 at a Group level
  - Mainly mortality and persistency basis changes, partially offset by future expected premium increases
- Release of investment guarantee reserve due to improved and recalibrated economic scenario generator which is aligned to our hedging methodology

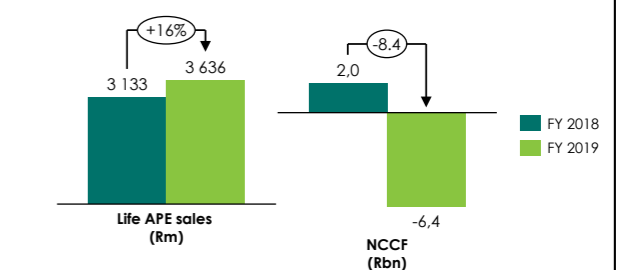

8

Notes:

## DEFEND AND GROW SA MARKET SHARE IN CORPORATE MARKET

### Robust performance of umbrella offering drives growth

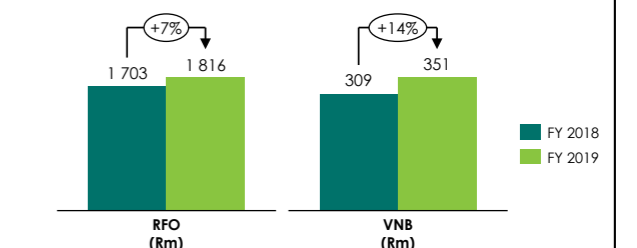

- Life APE sales up 16% with strong **growth in recurring premiums driven by umbrella fund sales**. VNB increase of 14% driven by positive basis changes and higher sales volumes
- Decline in NCCF due to higher benefit payments and lower single premium inflows

RFO up 7% due to **positive basis changes** and improved underwriting experience in Group Income Protection

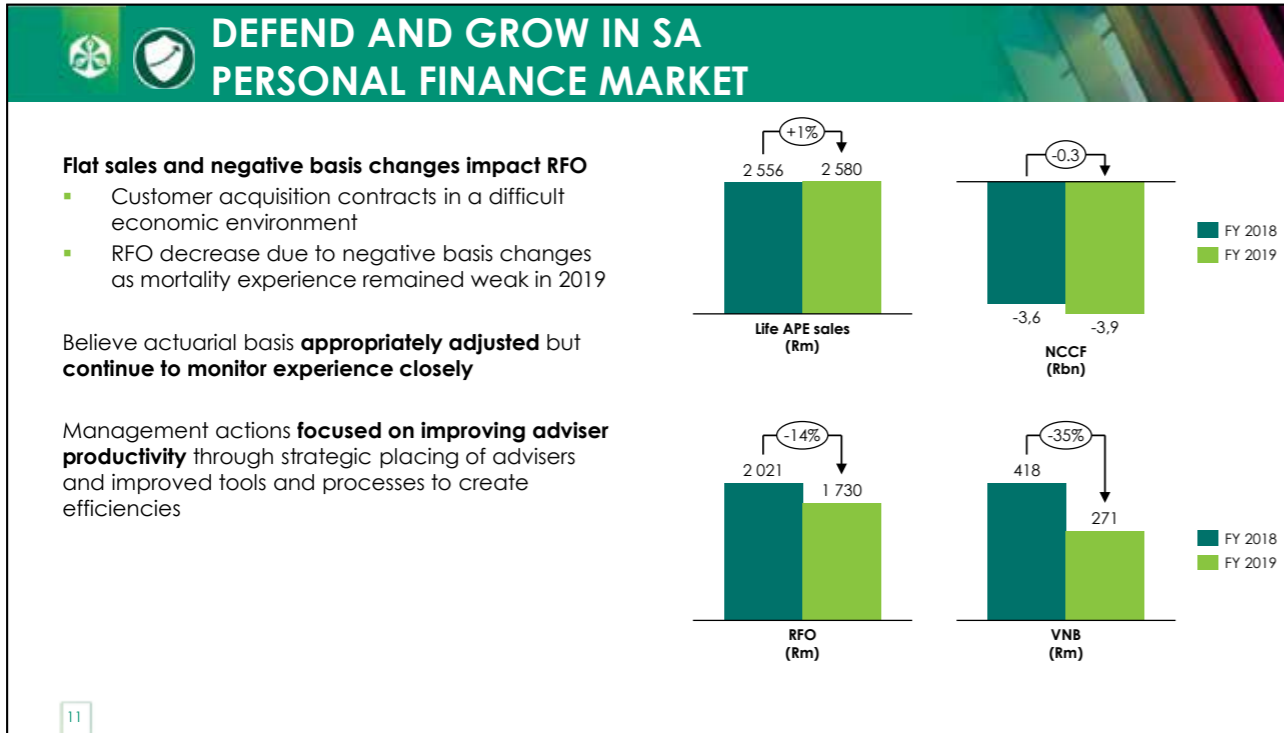

Continued to **expand our customer base and attract** new recurring premiums through Superfund

**Good pipeline of deals** however weak economic outlook could negatively impact employee benefits industry

Casper Troskie

Notes:

## FINANCIAL DELIVERY IN 2019

Notes:

## ADJUSTED HEADLINE EARNINGS

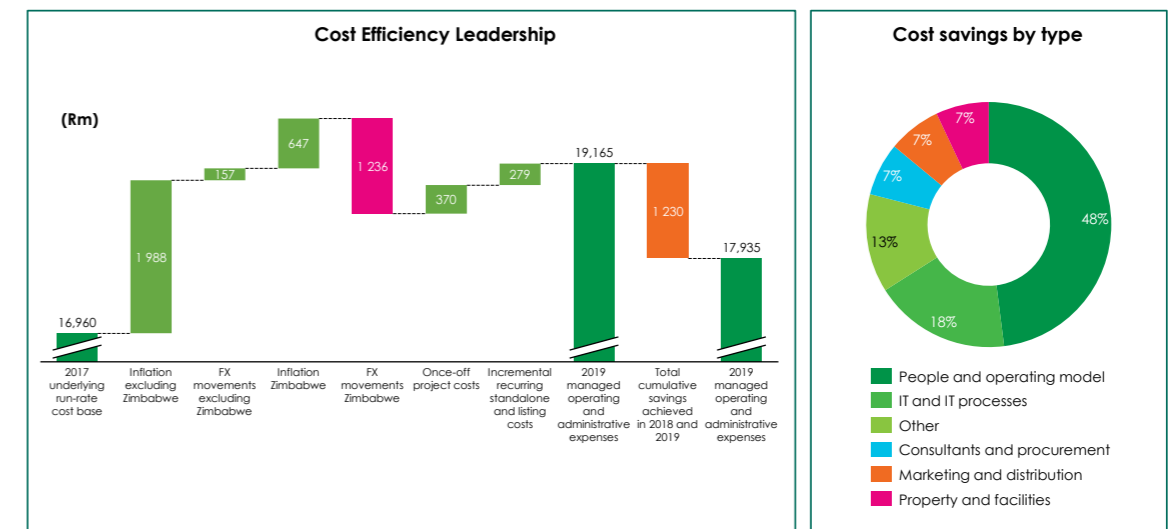

Rm	FY 2019	FY 2018	% change
Operating segments	9,249	9,564	(3%)
1 Net expenses from central functions	(277)	(425)	35%
<b>Results from Operations</b>	<b>8,972</b>	<b>9,139</b>	<b>(2%)</b>
2 Shareholder investment return	2,102	1,188	77%
3 Finance costs	(737)	(601)	(23%)
4 Income from associates	2,528	2,593	(3%)
<b>Adjusted Headline Earnings before tax and NCI</b>	<b>12,865</b>	<b>12,319</b>	<b>4%</b>
Shareholder tax	(2,874)	(2,686)	(7%)
Non-controlling interests	(135)	(237)	43%
<b>Adjusted Headline Earnings</b>	<b>9,856</b>	<b>9,396</b>	<b>5%</b>

- 1 Full run rate of standalone cost base, offset by interest income on net cash held during the year
- 2 Driven by strong Q4 market performance in South Africa, partially offset by reduction in fair value of property assets in East Africa
- 3 Inclusion of finance costs in East Africa
- 4 Decrease in Nedbank headline earnings partially offset by profits from China

17

Notes:

## R1 BILLION COST SAVINGS TARGET EXCEEDED

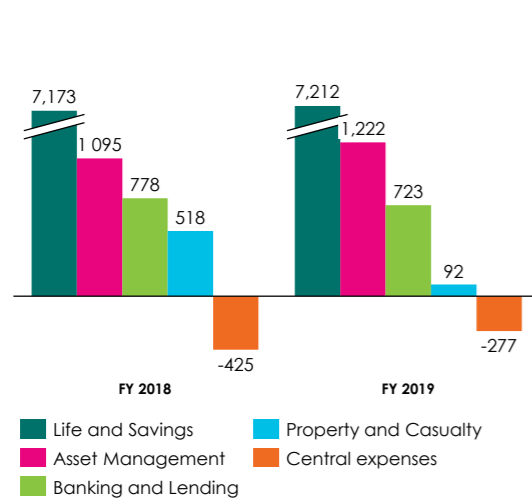

18

Notes:

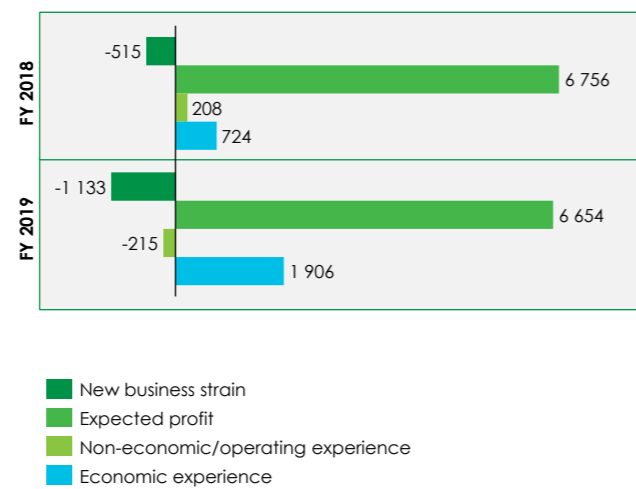

## SOURCES OF EARNINGS

### RFO by line of business (Rm)

### Life and Savings RFO (Rm)

19

Notes:

## GROUP SOLVENCY POSITION

Rm	FY 2019	FY 2018 <sup>1</sup>	% change
<b>OMLACSA</b>			
Eligible own funds	79,168	76,080	4%
Solvency capital requirement	36,685	33,362	10%
<b>1 Solvency ratio</b>	<b>216%</b>	228%	(1 200 bps)

- 1** Driven by:
- Inclusion of policyholder participations at tangible net asset value
  - Higher prescribed equity shocks combined with basis changes
  - Partially offset by net increase in subordinated debt

Rm	FY 2019	FY 2018 <sup>1</sup>	% change
<b>Group</b>			
Eligible own funds	98,877	100,959	(2%)
Solvency capital requirement	61,298	60,039	2%
<b>2 Solvency ratio</b>	<b>161%</b>	168%	(700 bps)

- 2** Driven by:
- Decrease in OMLACSA
  - An increase in the effective Nedbank holding
  - A higher prescribed equity shock applied to unregulated entities

1. Amounts differ from reported numbers to align to the final submission to the Prudential Authority

21

Notes:

## IFRS PROFIT IMPACTED BY DISTRIBUTION OF QUILTER AND NEDBANK

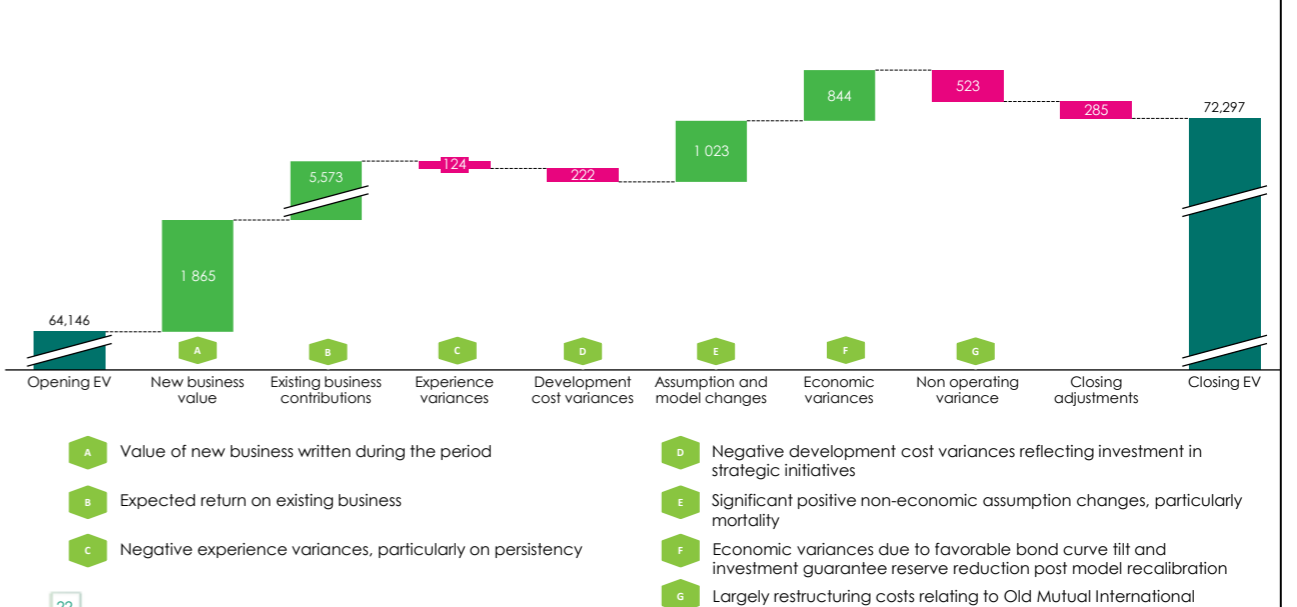

- Consolidated profits in respect of Quilter and Nedbank, classified as profit from discontinued operations, and the profit recognised on distribution of Quilter and Nedbank included in 2018 IFRS profits
- Residual plc profit due to non recurring head office costs and release of a provision for tax risk related to Managed Separation

20

Notes:

## ANALYSIS OF EMBEDDED VALUE

## Results Commentary

Our business was resilient against significant headwinds in 2019. We faced challenging macroeconomic conditions in South Africa, our largest market, and many of our operating countries in the Rest of Africa. This put pressure on the disposable income levels of our customers and on the ability of our businesses to grow value for our customers and investors. We remain confident that our diversified business allows us to protect value for stakeholders in tough economic times.

**We remain confident that our diversified business allows us to protect value for stakeholders in tough economic times.**

After careful consideration of the relevant facts and actions, our Board took the difficult decision to dismiss our former chief executive, Peter Moyo. We remained focused on reassuring our customers, investors and employees during the heightened media attention and scrutiny that followed, through transparent and regular communication. The Board remains confident that the decision made was in the best interests of our stakeholders and that their duties were discharged in line with the high standard of governance and ethics expected of an established and respected organisation like ours.

Our financial results were resilient after taking into account the impact of external factors in our operating environment. Results from Operations (RFO) decreased by 2% reflecting positive assumption changes offset by a decrease in Old Mutual Insure's underwriting result. Adjusted Headline Earnings (AHE) was up 5% mainly due to stronger shareholder investment returns in South Africa, partially offset by reductions in the fair value of properties in East Africa. We delivered positive Net Client Cash Flow (NCCF) which is commendable in the tough macroeconomic environment and Funds under Management (FUM) increased by 2% in line with the increase in average market levels.

Our business in China showed good growth in 2019 and is well positioned to penetrate the life insurance market which is relatively new and underpenetrated.

Previously, we offered primarily investment products, but have since expanded our offering to include protection solutions such as life, disability and critical illness.

Despite tough external factors, we have made great strides to be more operationally efficient so we remain relevant to our customers of the future. Since listing in 2018, we have been deliberate and focused on making what we believe to be essential culture shifts to champion positive futures for our customers every day and to attract top talent. We have been working relentlessly to become a digitally enabled business. We have made good progress on simplifying our legacy systems and processes, transforming the business to be more agile and able to meet our customers' needs and expectations.

2019 was a year in which our customers and communities were vulnerable and we remained dedicated to make an impact to their everyday lives through our responsible business efforts. Embedding a culture of being a responsible business has been a key focus since listing. We continue to create awareness amongst our employees to act responsibly, as we believe this will positively impact our ways of working and interactions with customers and the communities we serve. We have organised ourselves to make an impact through specific focus areas which align with the needs of our stakeholders and we are in the process of refining targets to track desired outcomes in each focus area.

**Despite tough external factors, we have made great strides to be more operationally efficient so we remain relevant to our customers of the future.**

We returned significant levels of capital to our shareholders, including share buybacks totalling R4.9 billion and total ordinary dividends of 120 cents per share, an increase of 3% from last year.

We continue to monitor the impact COVID-19 (Coronavirus) is having on global markets and remain confident that our solvency and liquidity levels will remain resilient in this environment.

## Results Commentary

### Operating Environment

Global economic growth slowed down in 2019 due to trade tensions between the United States and China. Emerging Markets, being sensitive to global growth and heavily reliant on exports, were affected by this. Even though phase one of the trade agreement between the world's biggest economies was signed early in 2020, the global economy still faces significant growth challenges including rising debt levels around the world and sluggish productivity growth, evidenced by China's GDP growth of 6.1% in 2019, the lowest since 1990.

The equity markets in South Africa showed improved levels with the JSE SWIX up 5.7%, although average market levels remained below the prior year for most of the year. Economic growth was negatively impacted by rising public debt, inefficient state owned entities and rising unemployment levels.

In Zimbabwe, the rapid increase in inflation continued and at the end of 2019 inflation was 512%, compared to 42% at the end of 2018. This impact, combined with, severe currency shortages, drought conditions, high unemployment, increasing fuel prices and prolonged power outages contributed to further economic decline in this region. These severe economic conditions continue to increase the cost of living for our customers and create a difficult trading environment for businesses operating in this country.

Namibia's economy continued to contract in 2019. Absent structural reforms, growth is expected to converge to a long term level of about 3%, which is too low to deliver meaningful improvements in per capita income and reduced unemployment. Malawi's growth was robust in the first half of 2019, supported by improved agricultural performance. GDP growth prospects for the next few years are positive, due to the rebound in agriculture and improved electricity supply from the Zambia-Malawi interconnector.

The stable macroeconomic environment and positive investor confidence in Kenya is placing it as one of the fastest growing economies in Sub Saharan Africa. Growth is expected to be 6% for 2020, with business activity receiving a boost from the loan rate cap removal and recent central bank easing. Nigeria's GDP grew by 2.3% in 2019, after the crude oil production in Q3 2019 rose to a three-year high. Nigerian equity markets were down 15% due to negative investor sentiment as a result of poor growth prospects.

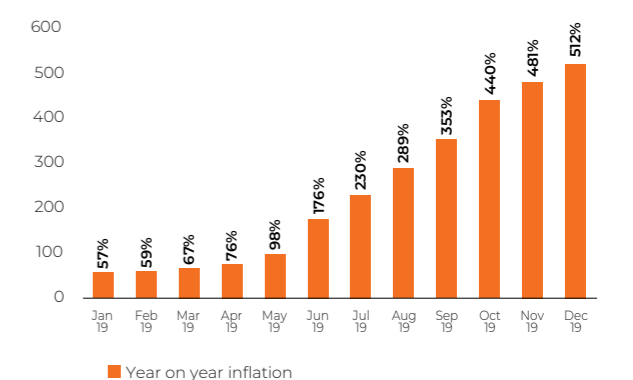

South Africa – Equity market levels (SWIX)

Zimbabwe – Equity market levels (ZSE Industrial Index)

Zimbabwe – Inflation rate (%)

Group Highlights

Rm (unless otherwise stated)	FY 2019	FY 2018	% change
Gross flows	170,689	175,509	(3%)
Life APE sales	12,268	11,898	3%
NCCF (Rbn)	2.2	9.0	(76%)
FUM (Rbn)	1,048.5	1,026.0	2%
Results from Operations (RFO)	8,972	9,139	(2%)
Adjusted Headline Earnings (AHE)	9,856	9,396	5%
Adjusted Headline Earnings per share (cents) <sup>1</sup>	209.3	195.1	7%
Profit after tax attributable to equity holders of the parent <sup>2</sup>	9,386	36,566	(74%)
Basic Earnings per share (cents) <sup>2</sup>	208.3	788.1	(74%)
Headline Earnings (HE) <sup>2</sup>	10,641	14,241	(25%)
Headline Earnings per share (cents) <sup>2</sup>	236.1	306.9	(23%)
Return on Net Asset Value (RoNAV) (%)	15.2%	16.2%	(100 bps)
Free Surplus Generated from Operations	6,794	6,585	3%
% of AHE converted to Free Surplus Generated	69%	70%	(100 bps)
Group Solvency ratio (%)	161%	168%	(700 bps)
Final dividend per share (cents)	75	72	4%

<sup>1</sup> WANS used in the calculation of the Adjusted Headline Earnings per share is 4,709 million (FY 2018: 4,815 million).  
<sup>2</sup> These metrics include the results of Zimbabwe. All other key performance indicators have been re-presented to exclude Zimbabwe.

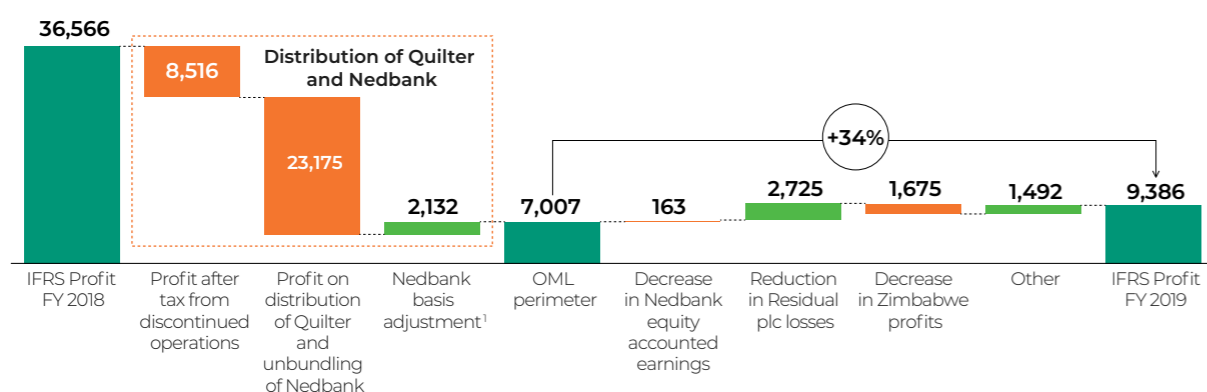

IFRS Profit After Tax

IFRS profit after tax for the comparative period includes the accounting impacts of the transactions executed to complete the Managed Separation. These included the distribution of Quilter plc and the unbundling of Nedbank. IFRS profit after tax for the comparative period therefore included the consolidated profits in respect of Quilter plc and Nedbank, both of these were classified as profit from discontinued operations. IFRS profits for the comparative period also included the profit recognised on the distribution of Quilter plc and Nedbank of R23,175 million. IFRS profit after tax for the current period no longer includes the impact of these items, which is the main driver of the decrease. IFRS profit after tax attributable

to equity holders of the parent on a comparable basis increased by 34% from the prior year. IFRS profit after tax attributable to equity holders on a comparable basis is derived by adjusting the comparative to remove the impact of Managed Separation transactions and to reflect Nedbank as if it had been accounted for as an associate for the full year in 2018.

The increase of 34% is driven by material Residual plc losses in 2018 which did not recur, partially offset by a decrease in Zimbabwe earnings.

IFRS Profit Impacted by the distribution of Quilter and Nedbank (R million)

<sup>1</sup> This adjustment aligns the IFRS profit for FY 2018 to what it would have been if Nedbank was accounted for as an associate for the full year as it is in 2019.

Actuarial Basis Changes

Rm	FY 2019					FY 2018				
	Group	Mass and Foundation Cluster	Personal Finance	Old Mutual Corporate	Rest of Africa	Group	Mass and Foundation Cluster	Personal Finance	Old Mutual Corporate	Rest of Africa
Non economic basis changes	(81)	1,330	(1,447)	74	(38)	43	363	(355)	(21)	56
Economic basis changes	1,013	-	772	217	24	(1)	-	(1)	-	-
<b>Total basis changes</b>	<b>932</b>	<b>1,330</b>	<b>(675)</b>	<b>291</b>	<b>(14)</b>	<b>42</b>	<b>363</b>	<b>(356)</b>	<b>(21)</b>	<b>56</b>

During the year we concluded several experience reviews across our life business in South Africa, the results of which were captured in our year end basis change process. We have also implemented several model and methodology improvements.

Overall, the net impact of these basis changes to our life profits were R932 million. Although positive at a total level, there were some significant impacts due at a segment level to the differing outcomes of the experience reviews.

The non-economic basis change reflects the net impact of changes to morbidity, mortality, persistency and expense assumptions and associated modelling. In Mass and Foundation Cluster, where we have experienced recent periods of mortality profit, this resulted in a release of reserves, partially offset by an allocation of a portion of the value to our customers, consistent with our historic treatment of similar releases. In Personal Finance, the mortality basis change was negative, reflecting both poor mortality experience in certain cohorts over recent periods

and the impact of removing worsening cross subsidies across cohorts.

Changes were also made to the persistency basis to recognise observed changes in persistency. In Mass and Foundation Cluster there was a negative impact from increasing lapse assumptions, while in Personal Finance there was a negative impact from reducing longer duration lapse assumptions in our Greenlight product.

The Personal Finance mortality and persistency impact was partially offset by the positive impact of reserving for expected future premium increases on policies that reach the end of their premium guarantee term.

The economic basis changes mostly reflect the impact of a release from our investment guarantee reserves, supported by the introduction of an improved and recalibrated economic scenario generator (ESG), which is a key component in the modelling of our investment guarantee reserves.

## Supplementary Income Statement

Rm	Note	FY 2019	FY 2018 <sup>1</sup>	% change
Mass and Foundation Cluster		3,527	3,129	13%
Personal Finance		1,730	2,021	(14%)
Wealth and Investments		1,447	1,611	(10%)
Old Mutual Corporate		1,816	1,703	7%
Old Mutual Insure		233	670	(65%)
Rest of Africa		496	430	15%
Net expenses from central functions	A	(277)	(425)	35%
<b>Results from Operations</b>		<b>8,972</b>	<b>9,139</b>	<b>(2%)</b>
Shareholder investment return	B	2,102	1,188	77%
Finance costs	C	(737)	(601)	(23%)
Income from associates <sup>2</sup>	D	2,528	2,593	(3%)
<b>Adjusted Headline Earnings before tax and non-controlling interests</b>		<b>12,865</b>	<b>12,319</b>	<b>4%</b>
Shareholder tax		(2,874)	(2,686)	(7%)
Non-controlling interests		(135)	(237)	43%
<b>Adjusted Headline Earnings</b>		<b>9,856</b>	<b>9,396</b>	<b>5%</b>

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

<sup>2</sup> Income from associates includes our remaining stake in Nedbank and our investment in China.

## Net Expenses from Central Functions

Rm	FY 2019	FY 2018	% Change
Shareholder operational costs	(792)	(532)	(49%)
Interest income earned on shareholder bank accounts	445	167	>100%
Net income or expense from charitable structures	70	(60)	>100%
<b>Net expenses from central functions</b>	<b>(277)</b>	<b>(425)</b>	<b>35%</b>

### A Net expenses from central functions

Central expenses of R277 million decreased by 35% from R425 million in the prior year. Shareholder operational costs have increased in line with our expectation, reflecting the full run rate of the standalone cost base. Interest income earned on shareholder bank accounts increased largely due to cash from the sale of our Latin America business and dividends remitted from Residual plc, that earned interest prior to being utilised for share buybacks and dividend payments during the year. We generated net income of R70 million from charitable structures due to higher investment return earned while donation expenses remained in line with the prior year.

### B Shareholder investment return

Shareholder investment return of R2,102 million increased by 77% from R1,188 million in the prior year. Stronger equity market performance in South Africa, where the majority of the shareholder assets are held, and a higher average invested shareholder asset base compared to the prior year assisted these returns. Shareholder investment return in Rest of Africa decreased by 63% from the prior year largely due to a reduction in the fair value of investment properties in East Africa in the second half of the year. This was more than offset by strong returns generated in Namibia on certain listed and unlisted equities and improved performance of the property sector when compared to the prior year.

### C Finance costs

Finance costs on long term debt increased by 23% to R737 million from R601 million in the prior year. The increase is largely due to finance costs in East Africa that have been designated to support the capital structure of the business and therefore reported as finance costs. Old Mutual Life Assurance Company South Africa (OMLACSA) issued additional unsecured subordinated debt of R2 billion during the year which contributed to an increase in finance costs, with a repayment of R1 billion that took place towards the end of the year. This was partially offset by higher fair value gains on derivative instruments related to borrowed funds.

### D Income from associates

Income from associates decreased by 3% to R2,528 million from R2,593 million in the prior year, mostly due to the decrease in earnings from Nedbank. Nedbank's headline earnings decreased by 7%, reflecting the challenging macroeconomic environment, the impact of applying hyperinflation accounting for their operations in Zimbabwe and the cost of exercising their option to increase their stake in Banco Único.

Associate earnings in China were R99 million compared to a loss of R88 million in the prior year. The increase in earnings is largely attributable to an increase in fair value gains on financial assets, supported by growth in equity markets in Shanghai.

## Reconciliation of AHE to IFRS Profit After Tax

Rm	Note	FY 2019	FY2018	% change
<b>Adjusted Headline Earnings<sup>1</sup></b>		<b>9,856</b>	9,396	5%
Investment return for Group equity and debt instruments in life funds		474	(219)	>100%
Impact of restructuring	A	(580)	(700)	17%
Discontinued operations	B	74	8,129	(99%)
Income from associates <sup>2</sup>		-	(2,132)	100%
Operations in hyperinflationary economies	C	441	2,116	(79%)
Residual plc	D	376	(2,349)	>100%
<b>Headline Earnings</b>		<b>10,641</b>	14,241	(25%)
Impairment of goodwill, other intangible assets and property, plant and equipment		(395)	(627)	37%
Impairment of associated undertakings		(869)	(265)	(>100%)
Profit on disposal of property, plant and equipment		-	51	(100%)
Profit on disposal of subsidiaries, associated undertakings and strategic investments		9	23,166	(100%)
<b>Profit after tax for the financial period attributable to ordinary equity holders of the parent</b>		<b>9,386</b>	36,566	(74%)

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

<sup>2</sup> This adjustment is no longer required due to the fact that there is no longer a mismatch in the presentation of our stake in Nedbank between AHE and Profit after tax attributable to ordinary equity holders of the parent.

### A Impact of restructuring

Restructuring costs largely relate to the completion of the migration of the IT platform and administration processes of Old Mutual International from Quilter plc to Wealth and Investments, a consequence of Managed Separation. The migration project identified potential data differences between the accounting system and underlying administration systems, a provision has been created to cover the potential accounting impacts that could arise as these differences are resolved. The migration costs incurred and the data provision expense have been excluded from the Group's profit measures, and reflected as restructuring costs.

### B Discontinued operations

As disclosed in our interim results, the Group disposed of its Latin American business during 2019 for a cash consideration of R4,144 million, net of transaction costs, realising a profit on disposal after tax of R30 million. Profits from discontinued operations include R91 million of profit from Latin America for the three months ended 31 March 2019. Refer to Note A2 in annual audited financial statements.

### C Operations in hyperinflationary economies

The profit represents the results of our Zimbabwe operations for 2019. Due to the volatility that hyperinflation introduces to Zimbabwe's outlook and the barriers to access capital by way of dividends, we have excluded the results of our Zimbabwe business from Adjusted Headline Earnings.

### D Residual plc

We continue to successfully unwind the operations of Residual plc. Residual plc generated a profit of R376 million compared to a loss of R2,349 million in the prior year. The profit in 2019 is largely due to the release of a provision for tax risk associated with Managed Separation which is no longer required.

### Accounting Impact of Zimbabwe

Following our conclusion to apply hyperinflation accounting in June 2019, and the subsequent confirmation by the Zimbabwe Public Accountants and Auditors Board during the second half of the year, we have used the Zimbabwe Consumer Price Index (CPI) to adjust reported numbers for inflation. The impact of applying hyperinflation accounting resulted in an increase in profit after tax of R187 million, with a corresponding increase in the net asset value. The results, net assets and cash flows of our business in Zimbabwe have been translated at the closing exchange rate of 1 ZWL \$ to 0.835 ZAR, in line with the requirements of the provisions of IAS 21 for the translation of hyperinflationary economies. The translation of the results of Zimbabwe at closing rate rather than average rate has reduced the profit after tax by R312 million. As the presentation currency of the Group is that of a non-hyperinflationary economy, comparative amounts in the Group financial statements have not been restated.

As reported in our interim results, due to high inflation levels, rapidly deteriorating economic conditions and lack of ability to access capital by way of dividends, we

have decided to manage Zimbabwe on a ring fenced basis. We removed the results of this business from Adjusted Headline Earnings, effective 1 January 2019, and we have re-presented our comparatives to reflect this decision. Separate targets have been set for our executive management and the management team in Zimbabwe in respect of the performance of the business.

We have focused on preserving value for our customers and employees through this challenging economic cycle. We tried to relieve our employees from the pressures of these economic conditions through the grant of special allowances. Reviews of our product offerings were conducted to ensure they remain relevant and allow more flexibility for customers in the current environment. We reviewed our investment strategy and weighted our portfolio towards asset classes that have been observed to better preserve value during periods of hyperinflation, and we continue to invest and transact in foreign currency where permissible as a natural hedge to the fast depreciating Zimbabwe dollar.

### Free Surplus Generated from Operations

Rm	FY 2019			FY 2018		
	Free Surplus Generated	AHE	%	Free Surplus Generated	AHE	%
Gross operating segments	6,826	7,338	93%	6,926	6,715	103%
Capital requirements	(1,432)	-	-	(1,682)	-	-
Net operating segments	5,394	7,338	74%	5,244	6,715	78%
Nedbank	1,400	2,518	56%	1,341	2,681	50%
<b>Free Surplus Generated from Operations</b>	<b>6,794</b>	<b>9,856</b>	<b>69%</b>	6,585	9,396	70%

Operating segments generated gross free surplus of R6,826 million, representing 93% of AHE for the period. Our operating segments continue to generate high levels of cash earnings despite the free surplus conversion decreasing from a conversion rate of 103% in the prior year. The cost of the platform migration in Old Mutual International has contributed to lower free surplus which drove the lower conversion rate as this cost is excluded from AHE.

The reduction in capital requirements from the prior year was mainly due to capital optimisation initiatives implemented during the year. Initiatives related to pooling of credit assets have improved our overall risk profile and therefore reduced capital requirements.

The lower cash conversion rate in respect of Nedbank earnings is in line with dividends received in respect of 2019 earnings, further reducing our conversion rate to 69% of AHE.

### Capital Management

We have made good progress in managing our balance sheet to create shareholder value. We focused on the continuous optimisation of the capital structure through new debt issuances and repayments and active management of excess shareholder assets.

We concluded share repurchase programmes to the value of R4.9 billion during 2019. A total of 4.7% of the Group's issued share capital, which amounts to 233 million shares, was repurchased. Following the total share repurchase we have 4,708,553,649 ordinary shares in issue.

OMLACSA successfully completed the issuance of unsecured subordinated debt to the value of R2 billion at improved rates (floating rate of 155 bps above the 3 month JIBAR). The subordinated debt is guaranteed by Old Mutual Limited. R1 billion of OMLACSA's subordinated debt matured in November 2019 and was repaid. A further R2.3 billion will be redeemed in tranches in March and September of 2020.

The execution of our asset allocation strategy has resulted in a deliberate allocation to lower risk asset classes in an effort to reduce regulatory capital requirements and thereby support our strong solvency capital levels. Whilst regulatory uncertainty has constrained our ability to manage capital levels more deliberately, we seek to maximise our return on capital which in conjunction with operational results will enable us to achieve our RoNAV target, being cost of equity plus 4%.

Our dividend cover range was amended from 1.75x to 2.25x to 1.5x to 2.0x to more closely reflect cash generated by our operations, after the exclusion of Zimbabwe earnings from AHE. In line with this policy we have declared a final dividend of 75 cents per share. The dividends, share buybacks and bond issuances have been in line with reducing equity and increasing our debt levels to move closer to our optimal capital structure.

We implemented the Three Manager Model framework effective 1 January 2020. We expect this model to consolidate related risks to improve risk management and resource allocation. Under this framework, the Middle Manager function, reported as part of Other Group Activities, will manage market and liquidity risk for OMLACSA's guaranteed product set. The Middle Manager will not aim to generate profit but rather to mitigate the risk as effectively as possible, with no material market risk impact expected due to the existing hedging programs in place. Specialised Finance in the Wealth and Investments segment will be responsible for managing the assets that were previously managed by the segments. We expect this to result in lower investment variances reported in RFO of Old Mutual Corporate and Personal Finance. These profits will now emerge in Wealth and Investments.

## Balance Sheet Metrics

Rbn (unless otherwise stated)	Note	FY 2019	FY 2018	% change
Operating Segments <sup>1</sup>		<b>48.3</b>	43.7	11%

<b>Invested Shareholder Assets<sup>5</sup></b>	<b>B</b>	<b>37.5</b>	31.0	21%
<b>Gearing ratio<sup>7</sup></b>	<b>C</b>	<b>13.6%</b>	13.0%	60 bps
<b>Interest cover (times)<sup>5</sup></b>		<b>18.5</b>	21.5	(14%)

- Comprises of the net asset value of the operating segments of the Group. This net asset value forms the basis for key balance sheet metrics on which the Group is managed from a capital perspective, and is the same perimeter on which AHE is presented.
- Comprises the net asset value of Residual plc of R3.0 billion at 31 December 2019 (R4.9 billion at 31 December 2018) and Old Mutual Bermuda of R33 million at 31 December 2019 (R50 million at 31 December 2018).
- Per IFRS requirements, we recorded our remaining stake in Nedbank at fair value on the date of unbundling. For purposes of calculating RoNAV, our stake in Nedbank is included at net asset value in Closing Adjusted IFRS equity.
- No assets classified as held for sale in FY 2019. Nedbank, Quilter and Latin America's net asset values are included in the comparative period.
- Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.
- Consolidation adjustments reflect own shares held by consolidated investment funds, which are treated as treasury shares under IFRS.
- Gearing ratios are calculated based on the IFRS equity attributable to operating segments.

## A RoNAV

RoNAV decreased by 100 bps to 15.2% from 16.2% in 2018. RoNAV in South Africa decreased 150 bps to 16.3% from 17.8% in the prior year. AHE attributable to South Africa increased marginally by 2% from the prior year, with higher shareholder investment return from improved equity markets partially offset by negative RFO growth. The increase of 11% in Average Adjusted IFRS Equity, calculated on a three point average, is driven by large cash inflows in H1 2019 related to the sale of our Latin American business and dividends received from Residual plc and retained profits. The increase in equity was in excess of amounts utilised to pay dividends and share buybacks during the year.

RoNAV in Rest of Africa increased by 310 bps to 6.6% from 3.5% in the prior year. AHE for Rest of Africa increased 117% to R512 million mainly as a result of a tax income position of R75 million compared to a tax expense of R254 million in the prior year. The increase of 15% in Average Adjusted IFRS Equity was mainly driven by operating profits earned during 2019 and a capital injection into the Rest of Africa business from the South African business.

## B Invested shareholder assets

Invested shareholder assets of R37.5 billion increased by 21% from R31.0 billion in the prior year. The asset base in South Africa increased by R6.3 billion or 27% during the period, reflecting growth in shareholder investment returns earned on a higher average invested shareholder asset base compared to the prior year and improved performance of local equity markets. Cash proceeds from the new debt issuance in OMLACSA net of repayments, as well as cash from operations and Residual plc that was in excess of dividend payments and share buybacks further contributed to the increase in shareholder assets. Invested shareholder assets of R8 billion for Rest of Africa (excluding Zimbabwe), was up 3% from the prior year due to the inclusion of certain shareholder properties in East Africa not previously included. This was partially offset by impairments to shareholder properties in East Africa recognised in the current year.

For South African listed equities in the shareholder portfolio, excluding Nedbank, we aim to limit capital losses through the use of a hedged equity strategy. The hedging strategies are executed in the form of zero cost collars where the exposure is limited to 5% – 15% of the investment value whilst underlying equities track the SWIX40 index. The interest bearing assets aim to outperform the STEFi 3 month NCD index.

## C Gearing ratio

The gearing ratio of the Group is calculated with reference to IFRS equity attributable to operating segments. The increase in equity of R4.6 billion or 11% reflects net retained profits earned and cash inflows in excess of amounts utilised to pay dividends and share buybacks during the period. The gearing ratio increased by 60 bps from the prior year mainly due to the issuance of unsecured subordinated debt to the value of R2 billion issued in the first half of the year, partly offset by existing subordinated debt of R1 billion maturing during the second half of the year.

Interest cover decreased to 18.5 times, mainly driven by the inclusion of finance costs in Rest of Africa not previously included and the new debt issuance in the second half of the year.

## Embedded Value

Rm (unless otherwise stated)	FY 2019	FY 2018	% change
Adjusted net worth (ANW)	<b>38,248</b>	32,789	17%
Value in force (VIF)	<b>34,049</b>	31,357	9%
<b>Embedded value</b>	<b>72,297</b>	64,146	13%
Operating EV earnings	<b>8,115</b>	7,364	10%
Return on embedded value (%)	<b>12.7%</b>	12.5%	20 bps
Value of new business (VNB)	<b>1,865</b>	2,123	(12%)

The return on embedded value increased to 12.7% from 12.5% in the prior year, supported by the increase in Operating EV earnings. Operating EV earnings increased by 10% to R8,115 million from R7,364 million in the prior year due to basis and other methodology changes, partly offset by a reduction in experience variances and lower levels of new business.

A review of mortality assumptions across the retail book had a positive impact on Operating EV earnings, partly offset by a strengthening of persistency assumptions. The reduction in experience variances was mainly due to higher one off expenses, partly offset by improved claims experience in Mass and Foundation Cluster, and although this remained negative, persistency improved as a result of strengthening the basis at the end of the prior year.

The value of new business reduced by 12% to R1,865 million from the prior year as a result of a shift towards lower margin business, as well as sales volumes not keeping pace with distribution expense inflation. VNB margin accordingly reduced to 2.6% from 3.2% in the prior year.

Overall embedded value benefitted from improved economic variances mainly due to improvements made in the investment guarantee reserve calculations, partly offset by actual shareholder investment returns for the year being below the expected returns. Embedded value was negatively impacted by migration costs and a data provision incurred in Wealth and Investments, relating to the Old Mutual International platform migration.

## Solvency

Rm (unless otherwise stated)	Optimal target range	FY 2019	FY 2018 <sup>1</sup>	% change
<b>OMLACSA</b>				
Eligible own funds		<b>79,168</b>	76,080	4%
Solvency capital requirement (SCR)		<b>36,685</b>	33,362	10%
Solvency ratio (%)	175% to 210%	<b>216%</b>	228%	(1 200 bps)
<b>Group</b>				
Eligible own funds		<b>98,877</b>	100,959	(2%)
Solvency capital requirement (SCR)		<b>61,298</b>	60,039	2%
Solvency ratio (%)	155% to 175%	<b>161%</b>	168%	(700 bps)

<sup>1</sup> Amounts differ from the previously reported Solvency Ratio of 170% to align to the final submission made to the Prudential Authority.

The solvency ratio for OMLACSA decreased to 216% from 228% in the prior year, mainly due to the decrease in the Nedbank share price and the write down of policyholder participations from fair value to tangible net asset value, as prescribed by the Prudential Standards. The latter treatment is inconsistent with the valuation of related

policyholder liabilities which are measured at fair value, and the economic approach followed in the calculation of the solvency capital requirements. These negative adjustments were partially offset by the net impact of the issuance and redemption of subordinated debt during the year.

The Group Solvency ratio decreased to 161% from 168% in the prior year, due to the requirement to include the stake in Nedbank held through policyholder funds when calculating the Group's Solvency ratio on the more onerous Basel III basis. The higher prescribed equity shocks applied to the net asset value of our unregulated entities and the decrease in the OMLACSA solvency ratio further contributed to the decrease from the prior year.

The difference between the Group and OMLACSA solvency ratios is driven by the basis of inclusion for Nedbank and fungibility restrictions in respect of the surpluses arising in Residual plc and Zimbabwe. The Group Solvency ratio is presented on a basis consistent with the prior year. The process of confirming our insurance group designation and obtaining methodology approvals with the Prudential Authority for the Group's proposed basis remains ongoing. As at 31 December 2019, the Group was and is expected to remain financially sound on a regulatory basis for the foreseeable future.

## Outlook

South Africa GDP is projected to be 0.8% in 2020 as electricity supply constraints are expected to continue to impact investor sentiment and suppress economic activity. Growth remains very dependent on the government's ability to address high unemployment rates as well as the remediation of state owned enterprises, and the implementation of structural reforms.

In Sub Saharan Africa, the economy is expected to continue strengthening to 3.5% in 2020 despite relatively subdued economic activity that will persist in the region's largest and resource rich economies of Nigeria and South Africa. Significant downside risks weighing on the outlook include weak external demand, growing public debt vulnerabilities, food security challenges and extreme weather events.

### GDP forecast for 2020 (%)

South Africa	0.8%
Zimbabwe	2.7%
Nigeria	2.5%
Kenya	6.0%
Sub Saharan Africa	3.5%
East Africa	6.1%

Source: International Monetary Fund and African Development Bank.

On 11 March 2020, COVID-19 (coronavirus) was declared as a pandemic due to the rising rate and scale of infection observed. The rapid spread of this virus since the start of 2020, and particularly in recent weeks, has caused significant disruption in global equity markets. The volatility of movements on global exchanges such as NYSE and FTSE is comparable to previous crises. In South Africa, the JSE SWIX has decreased by 23% since the start of the year to date. In China and Italy, significant proportions of the populations have been quarantined to prevent the spread of the virus, with other countries responding to the risk with increased screenings and travel restrictions.

We are monitoring this situation on a daily basis. We have established a dedicated committee to ensure that our employees in all of our locations can continue to work safely, whether that is from our premises or from their homes. We have placed restrictions on all cross border business and personal travel to ensure we limit the risk of infection to our employees and customers. We also model the impact of 'perfect storm' scenarios on our solvency capital and liquidity levels. These stress tests have shown we remain sufficiently capitalised with appropriate liquidity levels through these scenarios. We remain confident that the benefits of our well diversified business, strong balance sheet and stable cash generating ability will stand us in good stead, in what is anticipated to be a difficult year.

The achievement of our RFO target of nominal GDP+2% CAGR is dependent on an improvement in the macroeconomic environment in South Africa, which remains our largest operating country, and higher equity market levels. Given the anticipated disruption in global equity markets and significant downward pressure on GDP growth rates we do not anticipate being able to achieve this target for the 2020 financial year.

KPI	Financial target	Performance FY 2019	Outlook
<b>RETURNS</b> RoNAV	<b>Average COE + 4%</b> (weighted average COE of 13.4% for 2019)	<b>15.2%</b>	Challenging
<b>GROWTH</b> Results from Operations	<b>CAGR of Nominal GDP + 2% over the three years to 2020</b> (average nominal GDP growth for 2019: 4.3%)	<b>R8,972 million</b> ▼ 2%	Challenging
<b>EFFICIENCY</b> Cost efficiencies	<b>R1 billion by the end of 2019</b> Pre-tax run rate cost savings, net of costs to achieve. Based off 2017 IFRS operating and administrative cost base. ### Final Dividend Declaration

The Board of directors has approved and declared a final dividend of 75 cents per ordinary share.

The final dividend of 75 cents per share, results in a full dividend cover of 1.74 times for the 2019 year which is in line with Old Mutual Limited's dividend cover target of 1.5 times to 2.0 times. The final dividend will be paid out of distributable reserves and is payable on 04 May 2020 to all ordinary shareholders recorded on the record date.

Shareholders on the London, Malawian, Namibian and Zimbabwean registers will be paid in the local currency equivalents of the final dividends.

Old Mutual Limited's income tax number is 9267358233. The number of ordinary shares in issue in the company's share register at the date of declaration is 4,708,553,649.

Declaration date	Monday, 16 March 2020
Transfers suspended between registers	Close of business on Monday, 23 March 2020
Exchange rates announced	Monday, 23 March 2020 by 11.00 am SA
Last day to trade cum dividend for shareholders on the South African Register and Malawi, Namibia and Zimbabwe branch registers	Tuesday, 31 March 2020
Ex-dividend date for shareholders on the South African Register and Malawi, Namibia and Zimbabwe branch registers	Wednesday, 01 April 2020
Last day to trade cum dividend for shareholders on the UK register	Wednesday, 01 April 2020
Ex-dividend date for shareholders on the UK register	Thursday, 02 April 2020
Record date (all registers)	Close of business on Friday, 03 April 2020
Transfers between registers restart	Opening of business on Monday, 06 April 2020
Payment date	Monday, 04 May 2020

Share certificates for shareholders on the South African register may not be dematerialised or rematerialised between Wednesday, 01 April and Friday, 03 April 2020, both dates inclusive. Transfers between the registers may not take place between Tuesday, 24 March and Friday, 03 April 2020, both dates inclusive. Trading in shares held on the Namibian section of the principal register through Old Mutual (Namibia) Nominees (Pty) Limited will not be permitted between Monday, 23 March and Friday, 03 April 2020, both dates inclusive.

Shareholders that are tax resident in jurisdictions other than South Africa may qualify for a reduced rate under a double taxation agreement with South Africa. To apply for this reduced rate, non-SA taxpayers should complete and submit a declaration form to the respective registrars. The declaration form can be found at:

<https://www.oldmutual.com/investor-relations/dividend-information/dividend-tax-considerations>

# SEGMENT REVIEWS

DO GREAT THINGS EVERY DAY

## Segment Reviews

### MASS AND FOUNDATION CLUSTER

#### DEFEND AND GROW OUR SHARE OF THE SOUTH AFRICAN MASS MARKET

2019 was characterised by muted economic activity, high unemployment rates, retrenchments, social unrest and load shedding which continued to affect our already financially constrained customers. These factors had a negative impact on sales volumes and persistency in our Life and Savings business, and led to worsening credit losses and collections in our Banking and Lending business.

We have improved the value to customers through enhancements to our savings proposition, which includes better early surrender terms. One of the key features remains the ability for customers to save through smoothed bonus funds which protects their investment from market volatility. Old Mutual Protect expected to be launched for this segment in 2020, will be a more flexible and comprehensive risk offering giving customers a more personalised experience as their needs change over time. We believe that this will improve the competitiveness of our risk offering, both in terms of sales and customer retention. We have made good progress on our funeral services offering aimed at providing customers with an end to end service experience, in an effort to meet their needs for more than just a funeral claim payout.

Our branch network and related ATM infrastructure remains a key priority for us to ensure we are able to interact with and serve our customer base effectively. During 2019 we interacted with 3.2 million customers in our branches. We opened 20 new branches and installed 57 new branded ATMs, bringing our physical footprint to 368 branches and 132 ATMs in total.

Active Money Accounts have grown by 41% to 296,387. We continue to enhance the Money Account proposition, the latest feature being the addition of Easiplus funeral plans. This addition increases the range of platforms through which our customers can access products. Old Mutual Rewards members are now able to redeem rewards points for cash deposited directly into their Money Accounts, in addition to vouchers at selected retail partners.

Rm (except where otherwise indicated)	FY 2019	FY 2018	% change
Results from Operations	3,527	3,129	13%
Gross flows	13,336	12,668	5%
Life APE sales <sup>1</sup>	4,191	4,348	(4%)
NCCF (Rbn)	7.0	6.5	8%
FUM (Rbn)	13.3	12.7	5%
VNB	1,102	1,222	(10%)
VNB margin (%)	8.7%	10.3%	(160 bps)
Loans and advances	18,491	16,518	12%
Net lending margin (%)	10.7%	13.7%	(300 bps)
Credit loss ratio (%)	8.9%	5.9%	300 bps

<sup>1</sup> We have identified a portion of our book where cancellations were not treated in line with our Group policies. Life APE sales for the comparative period have been adjusted to reflect this.

### PERFORMANCE HIGHLIGHTS

Gross flows of R13,336 million increased by 5% from the prior year largely due to growth in the life in-force book following annual premium increases which more than offset lower sales and worse persistency during the year. Growth in gross flows contributed to positive NCCF of R7 billion, an increase of 8% from the prior year.

Life APE sales of R4,191 million decreased by 4% from the prior year due to lower sales largely driven by the negative impact of the contracting economy which adversely affected the purchasing power of our customers in our retail market. Management actions taken in the second half of the year to slow down loan disbursements adversely affected credit life sales and more stringent take on criteria for our group business in the foundation market also contributed to lower life sales.

Gross loans and advances increased by 12% to R18,491 million, despite price increases implemented in the third quarter, which will lead to a slowdown of growth in our loan book in 2020. We continue to deliberately reduce our credit risk exposure to mitigate the impact of deteriorating credit experience in the current economic environment.

Net lending margin of 10.7% decreased by 300 bps from the prior year due to the slowdown in the growth of disbursements and faster than anticipated pace of credit deterioration for certain cohorts of customers, leading to more loans being fully impaired. New loans advanced typically carry lower impairment charges than older vintages of the book. Our credit loss ratio increased by 300 bps to 8.9% due to worse collection experience, partly a function of pricing too aggressively in certain risk cohorts in the depressed macroeconomic environment. We have deliberately slowed growth of disbursements through pricing changes in the third quarter of 2019 to mitigate risk in these cohorts. Even though we expect these actions to improve our experience going forward, the deterioration in the current book is not yet fully reflected in our results.

RFO of R3,527 million increased by 13% from the prior year. Growth of 16% in Life and Savings profit, reflecting the net

## Segment Reviews

positive impact of higher assumption changes relative to assumption changes in prior years. This is mainly due to a significant positive mortality assumption change, partially offset by a negative persistency assumption change to reflect the deterioration in the retention experience which is expected to continue over the short term. Growth in RFO was partially offset by lower new business profits as a result of lower sales volumes and the enhancements to our savings product resulting in lower margins.

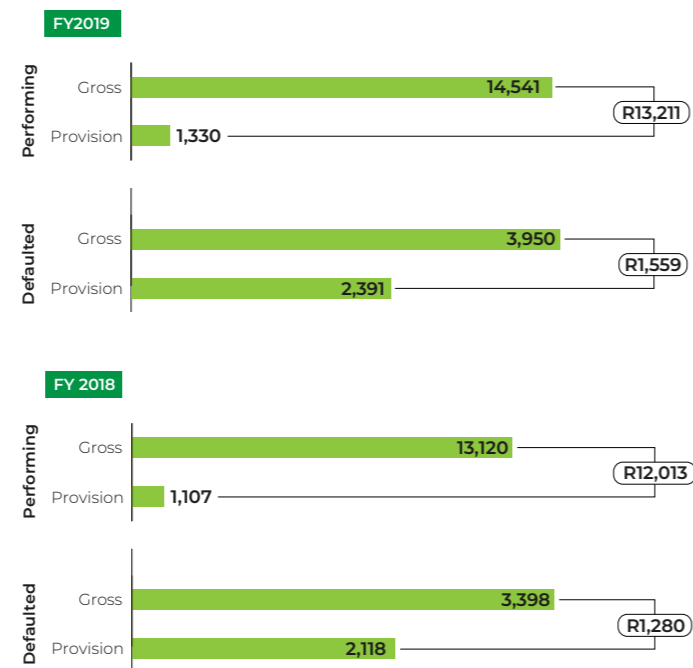

Banking and Lending profits decreased by 7% mainly due to lower net lending margins in the poor macroeconomic environment and the underperformance of certain cohorts of the loan book. This was partially offset by the one off benefit of the sale of a portion of loans previously written off.

VNB decreased by 10% to R1,102 million from the prior year with a VNB margin of 8.7%, a decline of 160 bps. The decrease in margin is largely attributable to lower sales volumes and enhancements made to our savings product that created better value for customers, partially offset by the positive impact of mortality basis changes on the risk margin. Under the methodology for the previous savings product, 2-IN-ONE, the short term portion of this product was excluded in the calculation of PVNBP (Present value of new business premiums). In the replacement product, launched in 2019, all flows are included in the calculation of PVNBP.

## Segment Reviews

### OUTLOOK FOR 2020

In our Banking and Lending business we will continue to cautiously manage our credit exposure in the tough economic environment. We expect the tail effect of the lower net lending margin and the difficult economic environment to weigh on short term outcomes, but we are confident that the necessary management actions have been taken to ensure medium to long term growth. Life and Savings RFO in 2019 benefitted from significantly higher levels of positive assumption changes, which is not expected to recur in 2020.

Despite a competitive environment, we believe growth opportunities still exist in the transactional market as we continue to expand our reach and offering. We will continue to leverage and scale initiatives like Old Mutual Rewards rewards to incentivise customers for good financial behaviour, in an effort to improve growth and retention that will remain under pressure in the current economic and competitive environment. We saw strong growth in our underwritten product set, which remains an underpenetrated market opportunity in this segment. The launch of Old Mutual Protect featuring improved underwriting capability and increased flexibility, will help us grow our share of this market segment.

We expect some VNB margin decrease as we increase the competitiveness and scope of our risk offering through the deployment of Old Mutual Protect.

## PERSONAL FINANCE

### DEFEND AND GROW IN THE SOUTH AFRICAN PERSONAL FINANCE MARKET

Continued pressure on the disposable income of our customers had an impact on adviser productivity, resulting in flat sales during the year. The total adviser headcount decreased in 2019, a consequence of lower activity and volumes in a challenging macroeconomic environment compounded by the impact of a change in remuneration structure to incentivise improved persistency.

Adviser headcount in Old Mutual Finance branches and worksites has grown by 29%, the result of a specific strategy to place experienced advisers in areas of high customer concentration to compensate for the anticipated slowdown in traditional channels. Growth of 88% in iWYZE risk sales coupled with the addition of an online retirement annuity at the end of the year that expanded our digital product offering, highlights the diversification of our distribution channels.

Our distribution channels remain a significant contributor to the Group's gross flows. During 2019 approximately R68.0 billion of gross flows were generated with a contribution of R35.9 billion to Wealth and Investments and R5.2 billion to Corporate. To ensure these channels are able to continue to effectively serve our customers we invested in uninterrupted power supply infrastructure to protect our branches from power interruptions.

Rm (except where otherwise indicated)	FY 2019	FY 2018	% change
Results from operations	1,730	2,021	(14%)
Gross flows	26,890	26,165	3%
Life APE sales	2,580	2,556	1%
NCCF (Rbn)	(3.9)	(3.6)	(8%)
FUM (Rbn)	188.6	181.4	4%
VNB	271	418	(35%)
VNB margin (%)	1.7%	2.6%	(90 bps)

### PERFORMANCE HIGHLIGHTS

Gross flows increased by 3% to R26,890 million due to stable recurring premium risk flows and strong single premium flows from annuity sales, up 38% from the prior year.

Life APE sales of R2,580 million increased marginally as our customers' disposable income levels continued to contract and customer acquisition slowed in a difficult economic environment. Strong single premium annuity sales continued in the

second half of the year, partially offset by lower sales on recurring premium savings products.

NCCF decreased by R0.3 billion from the prior year due to higher disinvestments, despite lower maturities reflecting the run-off of the legacy book. Legacy NCCF was negative R8.7 billion (R1.1 billion better than the prior year) while NCCF related to new generation products was R4.8 billion (R1.4 billion behind the prior year). FUM of R188.6 billion was up 4% from the prior year, the improvement in local equity markets largely contributed to the increase, partially offset by lower NCCF.

RFO of R1,730 million decreased by 14% from the prior year. Although we noted some improvements in mortality experience in the first half of the year, this experience weakened in the second half and the occurrence of large claims increased. After monitoring the mortality experience closely for the last two years, we made a basis change that has strengthened the actuarial basis, particularly for our largest rating group. Changes were also made to the persistency basis to recognise an observed reduction in lapse rates for longer duration Greenlight policies. These changes were partially offset by the positive impact of reserving for expected future premium increases on certain policies where those policies have reached the end of their premium guarantee term. Profits also benefitted from a reduction in the investment guarantee reserve, which was supported by the introduction of an improved economic scenario generator, a key input into the modelling of our investment guarantee risk.

Profits were further impacted by lower sales levels and one off costs which had a negative impact on distribution channel efficiency. One off costs included the investment in uninterrupted power supply infrastructure, and cost of transitioning advisers to the new remuneration basis, which is expected to result in operational efficiencies going forward.

VNB of R271 million decreased by 35% with a corresponding decrease of 90 bps in the VNB margin. Our risk margins were adversely affected by lower sales volumes and the impact of risk basis changes, which more than offset increased volumes of high margin guaranteed annuities sales.

Claims experience (%)<sup>1</sup>

<sup>1</sup> Calculated as actual claims over expected claims in absolute values.

RFO split by product (R million)

The RFO by product for 2019 is distorted by the impact of basis changes. We have shown the RFO split by product before basis changes. In this view, risk profits are flat year on year whilst profits from savings and income products have improved. Legacy profits have reduced, reflecting the run-off of this book.

### OUTLOOK FOR 2020

Our key focus will be to improve productivity levels by increasing adviser time in the market to drive new business sales. We have tactically started placing more trainee advisers in worksites and branches, where productivity rates are higher and could create larger pools of leads. We continue to enhance data sources to allow for increased use of data driven leads that will improve our advisers' experience and efficiency. We will continue to identify opportunities to free up sales management from administrative tasks to allow them to focus on customer acquisition. We are using platforms like Old Mutual Rewards and 22seven to attract potential customers and drive engagement with them.

The deployment of Old Mutual Protect will offer online advice tools which are simple and easy to use, and this coupled with seamless customer application and faster underwriting with the use of technology will shorten the sales process. The flexibility of the proposition is market leading and provides an enhanced opportunity for cross and upsell.

We will closely monitor our actuarial basis relative to experience. While the ongoing review of our basis may result in periodic material positive or negative impacts, we believe that our revised risk product basis is appropriate for the foreseeable future.

## WEALTH AND INVESTMENTS

### IMPROVE THE COMPETITIVENESS OF WEALTH AND INVESTMENTS

Muted growth in the economy, lower average equity market levels and continued weak investor sentiment made for a challenging operating environment in 2019. Despite this, we managed to deliver positive NCCF, driven largely by retail inflows.

Initiatives to increase operational efficiencies and improve our customer and intermediary value propositions remained a key priority. We revamped the Wealth Integrator tool to enhance ease of doing business and facilitate more targeted customer conversations that will improve their overall experience. The Old Mutual Unit Trust shopper went live during the year, targeting younger customers by offering a seamless digital offering free of the hassle of uploading signed documents. Customer inflows through advice tools was 51% in 2019 compared to 28% in 2018.

We have substantially completed the migration of the IT platform and administration processes of Old Mutual International from Quilter plc to our Wealth business, a consequence of Managed Separation. The migration project identified potential data differences and as result a provision has been created to cover the potential accounting impacts. The migration costs incurred and the data provision expense have been excluded from RFO and AHE as part of the restructuring costs adjusting item. Despite the challenges of a large and complex migration, we remain positive about leveraging this market leading proposition in our Wealth business.

Rm (except where otherwise indicated)	FY 2019	FY 2018	% change
Results from Operations	1,447	1,611	(10%)

Non-annuity	503	515	(2%)

<sup>1</sup> AUM comprises FUM as defined for the Group, as well as funds managed on behalf of other entities in the Group, which is reported as FUM of these respective segments. Assets under administration that are managed externally is not included in AUM.  
<sup>2</sup> AuMA is AUM including assets under administration.

### PERFORMANCE HIGHLIGHTS

AUM grew 6% from the prior year, with the average AUM increasing by 2.5% during the year.

Gross flows of R81,439 million decreased by 9% from the prior year as tough economic conditions persisted, impacting investor sentiment and leading to lower institutional and retail inflows. NCCF of R3.5 billion remained positive despite a decline from the prior year. Lower inflows to the local retail platform and institutional outflows coming under pressure resulted in the decline. Our offshore retail platform continued to show good net inflows and the institutional business finished the year strongly with a solid pipeline of business secured to flow. Investment performance has been disappointing over the past year across our flagship strategies. Whilst market conditions remained volatile and challenging, our funds were positioned for a recovery in South Africa with a preference for local assets over global assets. Over the medium term our relative peer investment performance remains credible with 63% of our funds above median over 3 years.

Annuity revenue recorded an increase of 1% from the prior year. Growth in asset based fees driven by the increase in average AUM was partially offset by lower interest income in Specialised Finance due to lower levels of market credit spreads. Non-annuity revenue delivered a solid result, despite a 2% decrease, due to lower income in Alternatives compared to a high base in 2018. The diversification of our business model again provided protection, as can be seen from the performance of non-annuity revenue which delivered resilient results.

RFO was R1,447 million, a decrease of 10% from the prior year. Marginally flat revenue levels, coupled with one off costs incurred in Asset Management related to the restructuring of subscale boutiques and the rationalisation of funds contributed to the decline in profit.

### Wealth and Asset Management

RFO for the Wealth and Asset Management business decreased by 10% from the prior year. The Asset Management business was mostly affected by one off costs incurred to finalise the restructure of their boutiques and rationalisation of the fund structure. Excluding these costs RFO was 7% down from the prior year. These changes will drive expense efficiencies going forward. The decline in RFO of our Wealth business is largely due to lower revenue, a consequence of weak investor markets.

### Alternatives

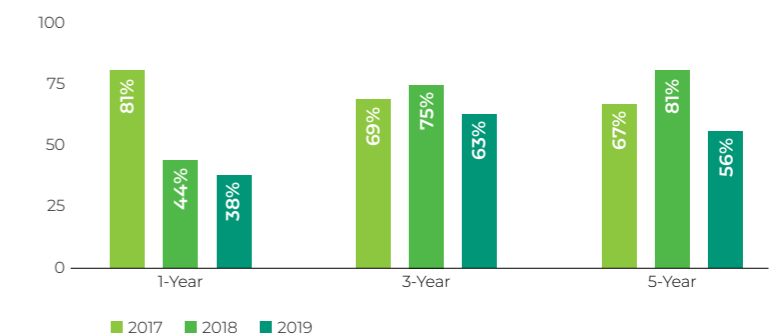

A commendable performance in 2019 when considering the exceptional results of 2018, with RFO marginally decreasing by 1%. Growth in annuity revenue of 6% was a result of the conclusion of fund raising for African Infrastructure Investment Fund 3 (AIIF 3). Non-annuity revenue declined by 17% mainly due to the non-recurrence of fair value gains in the prior year. NCCF outflows that were less than the prior year, largely represents asset realisations, demonstrating value realisation and distribution to investors.

### Specialised Finance

Specialised Finance originated R8.6 billion of credit assets during the period despite increased transaction complexity and elevated levels of demand for limited credit assets. RFO declined by 17% due to the contraction of market credit spreads and an increase in the cost of funding as the result of revisions to the internal funds pricing methodology by the Group.

Funds Above Median – 31 December 2019 (%)

Funds Above Benchmark – 31 December 2019 (%)

### OUTLOOK FOR 2020

The weak macroeconomic environment coupled with poor investor sentiment is likely to create challenges given intense competition for flows. Subdued economic activity and lower credit spreads are likely to put further pressure on valuations and non-annuity revenue in weak investment markets.

The completion of the platform migration of Old Mutual International was a key milestone. Management will focus on further operational improvements in 2020 and we are confident that new technology and processes provide an opportunity to improve profitability and attract new business.

## OLD MUTUAL CORPORATE

### DEFEND AND GROW OUR SHARE OF THE SOUTH AFRICAN CORPORATE MARKET

SuperFund, our umbrella offering, delivered a robust performance in 2019, attracting record high new recurring premiums from both standalone fund conversions and transfers from competitor umbrella offerings. We have a healthy pipeline of single premium deals that have been secured and are going through the Section 14 of the Pensions Funds Act transfer process. These are in respect of umbrella fund deals for which future service recurring premiums have already been recognised in the 2019 reporting period, but there is uncertainty on when the asset transfer processes will be completed.

Old Mutual Corporate Consultants (OMCC) expanded its client base by securing new consulting appointments. It also launched OnTrack®, a tool that assists trustees and employers with fund design and helps to improve the retirement outcomes for their members, which will further strengthen our customer proposition. It has already been rolled out to more than 40 of our largest customers.

We continue to build a strong value proposition that is well recognised in the industry, demonstrated by best practice certificates awarded by the Institute of Retirement Funds. As thought leaders, we provide financial and business content through our Mindspace magazine to corporate customer, leading to two awards at the 2019 SA Publications Forum Awards. This included Best Publication Cover for a special Mindspace edition called AfricaSpace in celebration of Old Mutual anchoring in Africa.

Rm (except where otherwise indicated)	FY 2019	FY 2018	% change
Results from Operations	<b>1,816</b>	1,703	7%
Gross flows	<b>39,699</b>	42,669	(7%)
Life APE sales	<b>3,636</b>	3,133	16%
NCCF (Rbn)	<b>(6.4)</b>	2.0	(>100%)
FUM (Rbn)	<b>267.3</b>	254.6	5%
VNB	<b>351</b>	309	14%
VNB margin (%)	<b>1.0%</b>	1.1%	(10 bps)

### OUTLOOK FOR 2020

We continue to invest in our SuperFund umbrella offering to improve customer experience and strengthen our proposition in the institutional retirement fund market. Investment in robotics process automation and other operating model improvements have enabled us to increase the speed of service delivery and improve customer experience. The processes that we are optimising include customer communication and claims processes.

We have a healthy pipeline of deals, however the weak macroeconomic outlook negatively impacts employment prospects in South Africa and therefore the growth outlook in the employee benefits industry. This will continue to put pressure on growth of asset based revenue and place strain on withdrawals as customers try to meet their immediate financial needs.

The FSCA published the 2nd draft Conduct Standard for Smoothed Bonus funds in December 2018. We are well prepared to comply with these changes as soon as the regulations become effective.

### PERFORMANCE HIGHLIGHTS

Gross flows decreased by 7% to R39,699 million mainly due to a decline in pre-retirement single premium flows. Life APE sales increased by 16%, largely driven by strong recurring premium umbrella fund sales, despite the decrease in single premium sales compared to the prior year.

Negative NCCF of R6.4 billion is largely a function of terminations, higher retrenchment benefits in the mining industry and lower single premiums.

FUM of R267.3 billion, representing an increase of 5% from the prior year, is due to the improvement in local equity markets and offshore assets, which more than offset the negative NCCF.

VNB improved substantially in the second half of the year, resulting in an increase of 14% from the prior year. The growth is primarily attributable to persistency assumption changes and higher sales volumes.

RFO of R1,816 million increased by 7% from the prior year, largely due to the positive impact of basis changes that mainly related to a release of discretionary margins for reserves held in respect of investment guarantees following modelling improvements. Improved underwriting experience in the Group Income Protection book following continued management actions was partially offset by worse claims experience in larger schemes in the Group Life Assurance book due to an increase in the number of claims from high income earners. We continue to strengthen our Group Risk underwriting, pricing and claims management processes to improve underwriting performance.

## OLD MUTUAL INSURE

### CONTINUED TURNAROUND OF OLD MUTUAL INSURE

Our total gross loss ratio has improved significantly over the last 3 years, the outcome of ongoing remediation efforts across our book and the optimisation of our claims processes across most of our lines of business. Despite catastrophe losses reaching the highest levels since 2015, the number of large losses decreased significantly as a result of prudent risk selection through skilled underwriting and improved pricing methodologies implemented over the past few years. The remediation of our Specialty book yielded a large gross underwriting profit in 2019 resulting in a total gross underwriting margin of 6.2% compared to 1.8% in the prior year.

We have focused on improving our customer experience through the roll out of behavioural training to call centre agents, strengthening broker and key account relationships and enhancements to the MyOMInsure digital platform. These efforts led to significant improvements in our customer satisfaction metrics, recognised by the 2019 SA Customer Satisfaction Index awarding us with the highest Net Promoter Score rating for the short term insurance segment. Product enhancements to existing products in personal and commercial lines, ensure that we remain competitive and aligned with market practices. Other sales and service enhancements include the implementation of an Electronic Communication Module to improve engagement and formal communications to business partners.

iWYZE became the first South African insurer to use drone technology for assessing accident damage. After a rigorous two year planning and pre registration process, iWYZE recently passed the operational audit and demonstration flights, required by the South African Civil Aviation Authority (SACAA) and obtained the final certification for a remotely piloted aircraft systems (RPAS) operator licence. Commercial drone use is revolutionary for the South African insurance industry and Old Mutual iWYZE is proud to be at the forefront of this innovation and new 'flight path'.

### PERFORMANCE HIGHLIGHTS

Gross written premiums increased by 11% to R14,699 million, delivering strong growth in a challenging economic environment. Most of our business lines showed double digit growth, further benefitting from premium growth in strategic partnerships concluded in 2018 in the Commercial and Specialty divisions. CGIC delivered 5% growth despite the tough trading environment experienced in the credit and bond insurance market during 2019.

Gross underwriting result of R904 million increased by 281% from the prior year due to a large gross underwriting profit in the Specialty division, the result of continued remediation of this book. This was partially offset by a high volume of catastrophe losses in Personal and Commercial, with a spike in crop claims due to severe frost and hail. Attritional claims, although higher than 2018 due to a benign claims environment, were well below our 10 year average. The optimisation of the claims process throughout the value chain resulted in continued efficiency improvements. Expenses increased from the prior year driven by costs incurred related to the relocation of our head office premises and policy administration costs that can no longer be recovered from customers after a change in regulation.

Net underwriting result of R35 million decreased by 93% from the prior year, with the large number of catastrophe losses below the reinsurance threshold being the significant driver of this decrease. The cost of reinsurance in 2019 was R350 million driven by a number of claims falling below the reinsurance threshold. Despite seeing improved risk selection in Specialty premiums during the year, high facultative reinsurance costs had a negative impact on the net underwriting result. These factors had an adverse impact on the net underwriting margin of 0.4%, a decrease of 490 bps from the prior year and well below the target range of between 4% and 6%.

RFO of R233 million decreased by 65% following poor underwriting experience and lower shareholder investment returns on insurance funds due to alignment with Group policies.

Our Personal division recorded gross written premium growth of 8%, driven by product enhancements to existing products and the launch of the Elite product in the prior year. Although attritional losses increased when compared to 2018, the experience is still better than the 10 year average. Net underwriting profit of R79 million, a decrease of 79% from the prior year, was largely due to heightened levels of catastrophe losses. iWYZE delivered a resilient performance in a challenging economic environment with weather related losses, with an increase of 16% in gross written premiums and 9% in net underwriting margin.

The performance of our Commercial division was significantly affected by high levels of catastrophe losses in the agriculture portfolio with severe hail and frost claims during the year. Higher attritional losses were experienced compared to the prior year largely due to the benign claims environment in 2018. This led to a net underwriting loss of R138 million and negative margin of 3.8%, a decrease of more than 100% from the prior year. Management continues to assess the sustainability of this division taking into account scale and diversification of our offering.

Our Specialty division delivered a strong performance in 2019 with an increase of 15% in gross written premiums enabled

## Segment Reviews

by strategic partnerships that were formed to mitigate contraction in the construction industry and general economic downturn. Deliberate focus to reduce exposure to corporate property has changed the underlying risk profile of the book to more acceptable risk appetite levels, which led to a significant improvement in the large loss experience within the corporate property portfolio. As a result the net underwriting margin was 6.5% in 2019, a material improvement from the negative 12.9% in the prior year. Despite the impact of improved risk selection in Specialty premiums during the year higher reinsurance cost negatively impacted net underwriting result.

The direct correlation between the state of the South African economy, deteriorating credit environment and CGIC's performance continues to be visible in our results. A volatile claims environment and increased catastrophe losses continue to place pressure on the net underwriting result of R48 million, a decrease of 53% from the prior year despite management actions taken in the second half of the year resulting in an underwriting profit following the loss reported in H1 2019.

Rm (except where otherwise indicated)	FY 2019	FY 2018	% change

Insurance margin (%)	2.3%	7.4%	(510 bps)

### OUTLOOK FOR 2020

In 2019 we focused on extracting growth from strategic partnerships, initiated in 2018. These partnerships strongly contributed to premium generation, exceeding the planned growth by large margins. Despite a well diversified portfolio of insurance businesses, opportunities to expand still exist and areas targeted for growth include the direct distribution business, iWYZE, and Specialty insurance. Growth in these channels will see the business becoming less dependent on the more traditional insurance classes and intermediary distribution channels.

In our Speciality division, we will develop customer unique solutions through strong underwriting practices and optimal reinsurance structures. In our Personal division, we will focus on improving our operational excellence to improve our customer offering and profitability.

Our continued investment in new generation product administration systems will enable us to develop and deploy digital solutions that will make it easier for our customers and intermediaries to engage and manage their portfolios.

The effects of climate change have made the prediction and modelling of weather patterns as well as resultant catastrophe losses extremely unreliable. We remain focused on finding a balance between the cost of reducing this volatility through reinsurance and the impact thereof on margins.

We are committed to delivering on the turnaround and growth of Old Mutual Insure through continued focus on building strong relationships with key stakeholders throughout the value chain as well as the execution and delivery of our business imperatives with a highly skilled and experienced team.

## Segment Reviews

### REST OF AFRICA

#### TURNAROUND EAST AFRICAN BUSINESS AND IMPROVE RETURNS ACROSS THE REST OF AFRICA

Southern Africa remains a strong contributor to profits with solid performance in Namibia and Malawi showing improvement in most financial KPIs. Our journey to turn around our business in East Africa was hampered by adverse claims experience in the medical business and lower premium growth in the general insurance business as a result of increased competition. Our businesses in West Africa delivered strong RFO growth, with good corporate sales and cost management in Ghana, while Nigeria benefitted from better claims experience in 2019.

We have made notable strides in our digital transformation journey as part of our effort to continuously improve our customers' experience. In this regard we launched the following digital tools in many of the countries we operate in:

- TNM Mpamba, a mobile money service in Malawi that customers can use to pay their premiums.
- A mobile money payment platform in Ghana that expedites the receipt of claims proceeds by customers.
- Use of network initiated USSD for customer consent in Namibia to reduce the paper trail and simultaneously improve our customers' experience.
- Online travel insurance enabling customers to buy cover wherever they are
- Launched new public websites that enable E-commerce in Botswana and Nigeria that has enhanced customer journeys.

Clement Chinaka, former Managing Director of Old Mutual Corporate, was appointed as the new Managing Director for Rest of Africa effective 1 November 2019, replacing Jonas Mushosho who retired from the Group after 30 years of service. The Board has commissioned a strategic review of our Rest of Africa business, which will inform its strategic ambition and objectives over the next decade.

	LIFE AND SAVINGS	ASSET MANAGEMENT	BANKING AND LENDING	PROPERTY AND CASUALTY
Botswana	✓			✓
Malawi	✓	✓		
Namibia	✓	✓	✓	✓
eSwatini	✓	✓		

#### PERFORMANCE HIGHLIGHTS

Gross flows increased by 8% to R12,948 million due to strong unit trust inflows from retail and corporate customers in Namibia, as the tough economic environment increased the demand for liquid investments, and strong growth in eSwatini's income product offering. NCCF increased by 77% to R2.3 billion largely due to improved gross flows and the non repeat of large outflows that occurred in the prior year when the Namibian government underwent a portfolio rebalancing following regulatory changes. This more than offset the impact of higher outflows from Malawi's corporate business.

Life APE sales increased marginally by 1% due to good corporate and retail sales in Malawi and strong credit life sales in Namibia. These increases were partially offset by lower single premium sales in Namibia and a decline in corporate sales in Botswana. VNB decreased by 8% to R119 million due to a less profitable mix of business sold in Namibia with a move towards lower margin products to meet customers' needs in a tough economic environment. Malawi's VNB was lower than the prior year, due to a large single premium flow in 2018 that did not repeat in 2019. This was partially offset by positive assumption changes and the closing down of an unprofitable retail tied channel in eSwatini, which contributed positively to VNB.

Loans and advances increased by 34% to R1,285 million as Old Mutual Finance Namibia continues to penetrate low risk state owned enterprises offering payroll linked disbursements to employees. We continue to pay close attention to the quality of the loan book, especially in the tough macroeconomic conditions that have now plagued the Namibian economy for over 3 years. This focus on building a quality book has resulted in an improvement in non-performing loans to 3.2% from 3.4%.

Gross written premiums increased by 6% to R927 million driven by good performance in Namibia as a result of growth in risk finance sales, annual premium increases and good growth in personal lines driven by sales campaigns. Botswana was 9% up on prior year driven by higher renewals in the second half of the year. Underwriting margin of 7.7% decreased by 100 bps due to an adverse claims experience and an increase in reinsurance in Namibia, partly offset by improved margins in Botswana due to cost efficiencies.

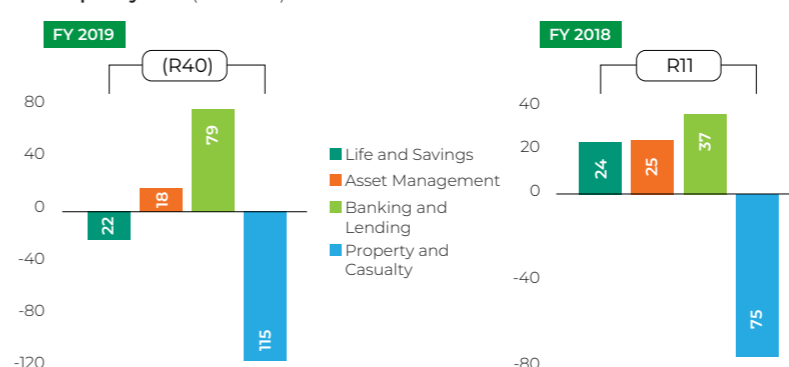

RFO increased by 13% to R866 million driven by a strong contribution from our Banking and Lending and Asset Management businesses. The Banking and Lending performance in Namibia was a result of higher interest income from the increased loan book, a 120 bps improvement in the net lending margin, an increase in non-interest revenue and lower credit losses. RFO for the Asset Management business showed strong growth driven by improved investment performance in Malawi. The growth in Life and Savings profits in Namibia was mainly due to a fee correction in the corporate business. The decrease in Property and Casualty RFO was driven by adverse claims experience in Namibia, partly offset by lower expenses in Botswana.

## Segment Reviews

### East Africa

#### PERFORMANCE HIGHLIGHTS

Gross flows increased by 31% to R4,255 million driven by higher unit trust inflows in the Asset Management business in Uganda and large inflows of new pension scheme business. These strong inflows were partially offset by the increase in maturities from an ageing retail book, disinvestments and death claims in Kenya leading to NCCF of R1.2 billion, an increase of 71%.

Life APE sales increased by 3% to R127 million, this was mainly as a result of the Kenyan shilling's appreciation against the rand during the year. On a constant currency basis, life sales were 5% down from prior year due to lower new business in South Sudan, whose economy continues to suffer from the effects of the political turmoil and lower endowment sales in Uganda as a result of product changes made during the year.

Gross written premiums increased by 6% to R2,224 million mostly due to favourable impact of foreign exchange movements. On a constant currency basis, gross written premiums decreased by 2% due to lower new business volumes and renewal rates in our general insurance businesses across most markets in the region. This adverse performance was partly offset by good retention in our medical insurance business and new business growth in Kenya and Uganda. Higher claims in the medical business and increased central costs had an adverse impact on net underwriting margin which decreased by 420 bps to a negative 6.0%.

Loans and advances increased by 8% to R2,908 million driven by higher disbursements in the retail and community loan books. Credit quality has improved due to better early stage and post default collections, together with improved underwriting through tightened credit criteria. The net lending margin decreased by 60 bps as a result of reduced pricing in the retail space necessitated by competitive pressures.

East Africa recorded a loss of R40 million for the full year after a disappointing performance in the second half of the year. The adverse performance was driven largely by the lower new business volumes in the general insurance business and the adverse claims experience in the medical business. RFO in our Life and Savings business decreased from the prior year due to lapse and interest rate assumption changes which more than offset good claims due to low mortality in Uganda. Asset Management profits declined from prior year as a result of lower asset based fees in the unit trust business due to uncompetitive money market yields. Our Banking and Lending business recorded strong RFO growth due to higher net interest income earned from growth in the Faulu loan book, as well as an increase in commission fees earned on transactional banking. Higher holding company costs in East Africa in 2019 also contributed to the adverse performance against prior year.

VNB and VNB margin remained negative and in line with the prior year as the mix of products sold continue to be weighted to retail products, where sufficient scale does not yet exist to offset high initial expenses.

	LIFE AND SAVINGS	ASSET MANAGEMENT	PROPERTY AND CASUALTY
Ghana	✓	✓	
Nigeria	✓		✓

#### OUTLOOK FOR 2020

The Namibian economy is expected to recover in 2020, however growth will remain too low to stimulate meaningful per capita income and reduce unemployment. We expect the nullification of 2019 election results in Malawi to impact the economy negatively. The economic outlook is positive in East Africa, however a recent locust outbreak could adversely impact agriculture. The recent agreement between the key parties in South Sudan to form a transitional government is a meaningful step towards lasting peace and should positively impact the economy as funding becomes accessible to the country. Growth in Ghana is expected to continue although the risk of fiscal slippage clouds the outlook and modest growth is expected in Nigeria driven by quickening activity in the non oil economy.

Management have initiated certain actions to address the challenges that have slowed down the turnaround of East Africa, most notably exploring the underwriting of specialist risk by leveraging the Group's underwriting capabilities, as there is less competition in this class of business. In the medical business, the Go Plus reward program has been launched to drive behavioural lifestyle changes in an effort to reduce claims. The business will also be partnering with hospitals and other insurers to better manage claims.

#### PERFORMANCE HIGHLIGHTS

Gross flows increased by 23% to R390 million due to growth in the life in-force book and good inflows in the pension administration business in Ghana that supported NCCF growth. Life APE sales increased by 22% to R111 million as a result of higher value savings products sold to retail customers and increased credit life sales as we expanded our offering to other banks in Nigeria.

Gross written premiums of R84 million are 19% below the prior year primarily due to the suspension of specialist aviation and oil and gas risk business. Oil and gas risk is the largest contributor to premiums written in the Nigerian market. This business took significant strain due to adverse industry wide claims experience in 2018 and a decision was made in 2019 to suspend the writing of new business in these classes of risk. During the year we bolstered our underwriting capabilities, improved our control environment and put in place improved reinsurance treaties. Early in 2020, we started underwriting this class of business again.

A reserving methodology review resulted in long outstanding claims reserves being released during the year. This, coupled with the catastrophic oil and gas claims experience in the prior year which did not repeat in 2019, led to a significant improvement in underwriting margin in our Property and Casualty business in Nigeria. In Ghana good corporate sales, change in the commission rates and cost savings drove the improvement in RFO. As a result, West Africa's RFO loss of R124 million in 2019 is significantly lower than the loss in the prior year. The impact of leadership changes and ongoing cost rationalisation in both of our markets in West Africa are expected to contribute positively to the turnaround of these businesses.

Negative VNB reduced to R29 million, an improvement of 38% from the prior year, due to a decline in sales of low margin savings products in Nigeria and the associated expenses, as well as prudent expense management and increased sales in Ghana.

# SUMMARY CONSOLIDATED FINANCIAL STATEMENTS

DO GREAT THINGS EVERY DAY

## Independent auditors' report on summary consolidated financial statements

### TO THE SHAREHOLDERS OF OLD MUTUAL LIMITED

#### Opinion

The summary consolidated financial statements of Old Mutual Limited, contained in the accompanying abridged report, which comprise the summary consolidated statement of financial position as at 31 December 2019, the summary consolidated income statement, the summary consolidated statement of comprehensive income, the summary consolidated statement of changes in equity and the summary consolidated statement of cash flows for the year then ended, and related notes (including the summary consolidated supplementary income statement), are derived from the audited consolidated financial statements of Old Mutual Limited for the year ended 31 December 2019.

In our opinion, the accompanying summary consolidated financial statements are consistent, in all material respects, with the audited consolidated financial statements of Old Mutual Limited, in accordance with the requirements of the JSE Limited Listings Requirements for abridged reports, set out in Note A1 to the summary consolidated financial statements, and the requirements of the Companies Act of South Africa as applicable to summary financial statements.

#### Other Matter

We have not audited future financial performance and expectations by the directors included in the accompanying summary consolidated financial statements and accordingly do not express any opinion thereon.

#### Summary Consolidated Financial Statements

The summary consolidated financial statements do not contain all the disclosures required by the International Financial Reporting Standards and the requirements of the Companies Act of South Africa as applicable to annual financial statements. Reading the summary consolidated financial statements and the auditor's report thereon, therefore, is not a substitute for reading the audited consolidated financial statements of Old Mutual Limited and the auditors' report thereon.

#### The Audited Consolidated Financial Statements and Our Report Thereon

We expressed an unmodified audit opinion on the audited consolidated financial statements in our report dated 15 March 2019. That report also includes the communication of key audit matters. Key audit matters are those matters that in our professional judgement, were of most significance in our audit of the financial statements for the current year.

#### Directors' Responsibility for the Summary Consolidated Financial Statements

The directors are responsible for the preparation of the summary consolidated financial statements in accordance with the requirements of the JSE Limited Listings Requirements for abridged reports, set out in note A1 to the summary consolidated financial statements, and the requirements of the Companies Act of South Africa as applicable to summary financial statements.

The Listings Requirements require abridged reports to be prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and to also, as a minimum, contain the information required by IAS 34, Interim Financial Reporting.

#### Auditors' Responsibility

Our responsibility is to express an opinion on whether the summary consolidated financial statements are consistent, in all material respects, with the consolidated audited financial statements based on our procedures, which were conducted in accordance with International Standard on Auditing (ISA) 810 (Revised), *Engagements to Report on Summary Financial Statements*.

## Summary consolidated statement of cash flows

For the year ended 31 December 2019

Rm	Notes	2019	2018
<b>Cash flows from operating activities</b>			
Profit before tax		13,796	8,450
Non-cash movements in profit before tax		(12,905)	21,841
Net changes in working capital		15,405	(787)
Taxation paid		(4,144)	(3,979)
<b>Net cash inflow from operating activities – continuing operations</b>		<b>12,152</b>	<b>25,525</b>
<b>Cash flows from investing activities</b>			
Acquisition of financial investments		(7,924)	(5,196)
Acquisition of investment properties		(1,072)	(2,352)
Proceeds from disposal of investment properties		35	427
Dividends received from associated undertakings		1,513	29
Acquisition of property, plant and equipment		(935)	(550)
Proceeds from disposal of property, plant and equipment		150	209
Acquisition of intangible assets		(989)	(53)
Acquisition of interests in subsidiaries, associated undertakings and joint ventures		(149)	(1,213)
Proceeds from the disposal of interests in subsidiaries, associated undertakings and joint ventures		4,258	4,206
<b>Net cash outflow from investing activities – continuing operations</b>		<b>(5,113)</b>	<b>(4,493)</b>
<b>Cash flows from financing activities</b>			
Dividends paid to			
Ordinary equity holders of the parent	C3	(5,383)	(9,965)
Non-controlling interests and preferred security interests		(69)	(272)
Interest paid (excluding banking interest paid)		(804)	(899)
Proceeds from issue of ordinary shares		-	251
Net disposal of treasury shares – ordinary shares		289	1,137
Share buyback transactions		(4,900)	-
Proceeds from issue of subordinated and other debt		5,739	5,736
Subordinated and other debt repaid		(3,211)	(8,625)
<b>Net cash outflow from financing activities – continuing operations</b>		<b>(8,339)</b>	<b>(12,637)</b>
<b>Net cash (outflow)/inflow – continuing operations</b>		<b>(1,300)</b>	<b>8,395</b>
Net cash outflow from discontinued operations		(375)	(76,420)
Effects of exchange rate changes on cash and cash equivalents		(588)	569
Cash and cash equivalents at beginning of the year		32,878	100,334
<b>Cash and cash equivalents at end of the year</b>		<b>30,615</b>	<b>32,878</b>
<b>Comprising</b>			
Mandatory reserve deposits with central banks		141	145
Cash and cash equivalents		30,474	32,339
Included in assets held for sale and distribution			
Cash and cash equivalents		-	394
<b>Total</b>		<b>30,615</b>	<b>32,878</b>

Cash and cash equivalents comprise cash balances and highly liquid short term funds, mandatory reserve deposits held with central banks, cash held in investment portfolios awaiting reinvestment and cash and cash equivalents subject to the consolidation of funds.

Except for mandatory reserve deposits with central banks of R141 million (2018: R145 million) and cash and cash equivalents consolidated as part of the consolidation of funds of R8,731 million (2018: R7,058 million), management do not consider that there are any material amounts of cash and cash equivalents which are not available for use in the Group's day-to-day operations.

<sup>1</sup> Included in the closing balance for other reserves is a R180 million (2018: R442 million) liability credit reserve on borrowed funds. The Group recognises fair value gains and losses on the borrowed funds designated at fair value through profit or loss. The cumulative fair value gains and losses as a result of changes in the credit risk of the issued bonds are recognised in other comprehensive income and not in profit or loss. The Group released R13 million of the liability credit reserve directly to retained earnings on the repayment of the R1,000 million unsecured subordinated debt. Refer to note A2 for more information.

<sup>2</sup> Other movements in share capital includes a movement in retained earnings of R960 million relating to own shares held by consolidated investment funds, employee share trusts and policyholder funds. These shares are treated as treasury shares in the consolidated financial statements.

<sup>3</sup> The fair value reserve comprises all fair value adjustments relating to investments in debt and equity instruments of equity accounted associated undertakings that are subsequently measured of FVOCI within the financial statements of these associated undertakings.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## A: Significant accounting policies

### A1: Basis of preparation

#### 1.1 Statement of compliance

Old Mutual Limited (the Company) is a company incorporated in South Africa.

The summary consolidated annual financial statements have been extracted from the audited consolidated annual financial statements of the Company and its subsidiaries (the Group) for the year ended 31 December 2019.

The Old Mutual Limited audited consolidated and separate annual financial statements (Consolidated Financial Statements) for the year ended 31 December 2019 are available at <https://www.oldmutual.com/investor-relations/reporting-centre/reports>, at our registered offices and upon request.

The consolidated annual financial statements for the year ended 31 December 2019 have been audited by KPMG Inc and Deloitte & Touche, who expressed an unmodified opinion thereon. The auditors' report does not necessarily report on all information contained in these financial results. Shareholders are therefore advised that in order to obtain a full understanding of the nature of the auditors' engagement they should obtain a copy of that report together with the accompanying financial information from the issuer's registered office.

The summary consolidated financial statements comprise the summary consolidated statement of financial position at 31 December 2019, summary consolidated income statement, summary consolidated statement of comprehensive income, summary consolidated statement of changes in equity and summary consolidated statement of cash flows for the year ended 31 December 2019 and selected explanatory notes (including the summary consolidated supplementary income statement), but do not include the information required pursuant to paragraph 16A(j) of IAS 34.

The summary consolidated financial statements and the consolidated financial statements have been prepared under the supervision of Casper Troskie CA(SA) (Group Chief Financial Officer). The directors take full responsibility for the preparation of the summary consolidated financial statements and that the financial information has been correctly extracted from the underlying consolidated annual financial statements.

The summary consolidated financial statements are prepared in accordance with the requirements of the JSE Limited Listings Requirements and the requirements of the Companies Act, No 71 of 2008 of South Africa. The Listings Requirements require abridged reports to be prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS) and the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by Financial Reporting Standards Council and to also, as a minimum, contain the information required by IAS 34 Interim Financial Reporting.

The accounting policies applied in the preparation of the summary consolidated annual financial statements are in terms of IFRS and are consistent with those applied in the preparation of the 2018 audited consolidated annual financial statements of the Group, except for changes arising from the adoption of IFRS 16, as set out in the notes to the consolidated financial statements.

#### 1.2 Basis of preparation of Adjusted Headline Earnings

##### Purpose of Adjusted Headline Earnings

Adjusted Headline Earnings (AHE) is an alternative non-IFRS profit measure used alongside IFRS profit to assess performance of the Group. It is one of a range of measures used to assess management performance and performance based remuneration outcomes. In addition, it is used in setting the dividend to be paid to shareholders. Non-IFRS measures are not defined by IFRS, are not uniformly defined or used by all entities and may not be comparable with similarly labelled measures and disclosures provided by other entities.

Due to the complexity introduced into IFRS profit by the transactions required to execute Managed Separation and the long term nature of the Group's operating businesses, management considers that AHE is an appropriate alternative basis by which to assess the operating results of the Group and that it enhances the comparability and understanding of the financial performance of the Group. It is calculated as headline earnings in accordance with JSE Listings Requirements and SAICA circular 01/2019 adjusted for items that are not considered reflective of the long term economic performance of the Group. AHE is presented to show separately the Results from Operations, which measure the operational performance of the Group from items such as investment return, finance costs and income from associated undertakings. The adjustments from headline earnings to AHE are explained below.

The Group Audit committee regularly reviews the determination of AHE and the use of adjusting items to confirm that it remains an appropriate basis against which to analyse the operating performance of the Group. The Committee assesses refinements to the policy on a case-by-case basis, and seeks to minimise such changes in order to maintain consistency over time.

The adjustments applied in the determination of AHE are:

##### (a) Investment return on Group equity and debt instruments held in policyholder funds

Represents the shareholder investment returns on policyholder investments in Group equity and debt instruments held by the Group's policyholder funds. This includes investments in the Company's ordinary shares and the subordinated debt and ordinary shares issued by subsidiaries of the Group. These shareholder investment returns are eliminated within the consolidated income statement in arriving at profit before tax, but are added back in the calculation of AHE. This ensures consistency with the measurement of the related policyholder liability.

##### (b) Impact of restructuring

Represents the elimination of non-recurring expenses or income related to material acquisitions, disposals or a fundamental restructuring of the Group. This adjustment would therefore include items such as the costs or income associated with completed acquisitions or disposals and the release of any acquisition date provisions. These items are removed from AHE as they are not representative of the operating activity of the Group and by their nature they are not expected to persist in the long term. For the period ended 31 December 2019 this adjustment includes costs associated with the migration of IT systems and administrative processes of Old Mutual International from Quilter plc to our Wealth and Investments business.

##### (c) Discontinued operations

Represents the removal of the profit after tax associated with discontinued operations. These businesses are not considered part of the Group's principal operations due to the fact they have been or are in the process of being sold or distributed and therefore will not form part of the Group going forward. The profit attributable to these businesses, included the profit or loss recognised on the ultimate distribution or disposal of the business, is removed from AHE. For the period ended 31 December 2019 this adjustment includes the profit attributable to Latin America and Old Mutual Bermuda. The comparative period includes the profit attributable to Quilter plc, Nedbank, Latin America and Old Mutual Bermuda.

##### (d) Share of gains of associated undertakings after tax

This adjustment is no longer required due to the fact that there is no longer a mismatch in the presentation of our 19.9% stake in Nedbank between AHE and IFRS profit after tax attributable to equity holders of the parent.

##### (e) Operations in hyperinflationary economies

Until such time as we are able to access capital by way of dividends from the business in Zimbabwe, we will manage it on a ring fenced basis and exclude its results from AHE. The lack of ability to access capital by way of dividends is exacerbated by the volatility that a hyperinflationary economy and the reporting thereof introduces. This adjustment has been applied from 1 January 2019 and we have restated comparatives to reflect this decision.

##### (f) Non-core operations

Represents the elimination of the results of businesses or operations classified as non-core. This adjustment represents the net losses associated with the operations of the Residual plc. Residual plc is not considered part of the Group's principal operations due to the fact that it is in the process of winding down and therefore the associated costs are removed from AHE.

#### 1.3 Basis of preparation of other non IFRS measures

The Group uses AHE in the calculation of various other non IFRS measures which are used by management, alongside IFRS metrics, to assess performance. Non IFRS measures are not defined by IFRS, are not uniformly defined or used by all entities and may not be comparable with similarly labelled measures and disclosures provided by other entities. The basis of preparation of each is outlined below.

##### (a) AHE per share

AHE per share is calculated as AHE divided by the Adjusted weighted average number of shares. The weighted average number of shares is adjusted to reflect the Group's BEE shares and the shares held in policyholder funds and consolidated investment funds as being in the hands of third parties, consistent with the treatment of the related revenue in AHE. Refer to note C1 for more information.

AHE per share is used alongside IFRS earnings, to assess performance of the Group. It is also used in assessing and setting the dividend to be paid to shareholders.

## A2: Significant corporate activity and business changes during the year

### Disposals completed during the year

#### Disposal of the Latin American businesses

On 1 April 2019, the Group completed the disposal of the Latin American businesses to Lily Bermuda Capital Limited (SPV domiciled in Bermuda), owned by CMIG International Holding Private Limited for a cash consideration of R4,144 million, net of transaction costs. A profit on disposal after tax of R30 million has been recognised in profit or loss, including a gain of R135 million from the recycling of foreign currency translation reserves. Merger reserves of R1,133 million created on the original acquisition of the Latin American businesses was transferred to retained earnings and are no longer classified as non-distributable.

Consistent with prior period reporting, the Latin American businesses have been classified as discontinued operations for the period from 1 January 2019 until disposal on 1 April 2019.

An analysis of assets and liabilities that the Group has disposed of, is presented in note A2 of the Annual Financial Statements:

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## A: Significant accounting policies

### A2: Significant corporate activity and business changes during the year

#### Acquisitions during the year

On 4 July 2019, Old Mutual Real Estate Holding Company (Proprietary) Limited, through its subsidiaries Lions Head Investments E.A.D and Lions Head Romania Holdco EOOD, purchased 100% of the equity of Portland Trust Developments Three s.r.l for a total cash consideration of €10 million (R158 million). The transaction has been accounted for in terms of IFRS 3 'Business Combinations' and a full purchase price allocation will be performed within twelve months.

The fair value of the net assets purchased was €12 million (R191 million). Consequently, a gain on bargain purchase of €2 million (R25 million) has been recognised in profit or loss. Included in the net assets acquired are investment properties with a fair value of €58 million (R923 million), other assets of €6 million (R96 million), cash and cash equivalents of €3 million (R44 million), bank and other loan liabilities of €48 million (R761 million) and other liabilities of €7 million (R111 million).

This acquisition consists largely of investment property that will form part of the Group's long term insurance policyholder investment portfolio, backing linked investments and with profit investment contract liabilities.

#### Share buybacks

During the year ended 31 December 2019, the Company repurchased 233,494,706 of its issued ordinary shares on the Johannesburg Stock Exchange (JSE) as part of two separate share repurchase programmes announced on 11 March 2019 and 2 September 2019 respectively.

The first tranche of share buybacks concluded on 21 May 2019. The aggregate number of shares repurchased amounted to 110,783,507 at prices ranging between 2,118 cents and 2,399 cents per share, resulting in a total cash outflow of R2.5 billion.

The second tranche of share buybacks concluded on 8 October 2019. The aggregate number of shares repurchased amounted to 122,711,199 at prices ranging between 1,767 cents and 2,019 cents per share, resulting in a total cash outflow of R2.4 billion.

The repurchased shares have been cancelled as issued shares and have reverted back to authorised but unissued share capital status.

#### Financing activities during the period

On 11 June 2019, Old Mutual Life Assurance Company (South Africa) Limited (OMLACSA) issued R2 billion floating rate subordinated debt instruments under the R10 billion Unsecured Subordinated Note Programme as guaranteed by Old Mutual Limited dated 23 May 2019. These instruments have a coupon rate of 3 month Johannesburg Interbank Average Rate (JIBAR) plus 155 bps, payable quarterly in arrears. The maturity date of these instruments is 11 June 2024.

On 27 November 2019, OMLACSA repaid a R300 million unsecured subordinated callable fixed rate note, including a final coupon of R16 million and a R700 million unsecured subordinated callable floating rate note, including a final coupon of R14 million. Both these instruments had a first call date of 27 November 2019. The Group released R13 million of the liability credit reserve directly to retained earnings on repayment of this debt.

### A3: Critical accounting estimates and judgements

#### (a) Measurement of policyholder liabilities

The policyholder liabilities are generally calculated using discounted probability weighted projected cashflows, relying on a number of assumptions about future experience (e.g. policyholder mortality and persistency rates). These assumptions are monitored regularly against actual experience, both through the reported variances in the analysis of profits, as well as through more formal experience investigations (based on statistical analysis of historical policyholder data).

Assumptions are set on a long term basis, and are not expected to be changed frequently. Based on the analysis of past experience, and actuarial judgement around likely future trends, a current long term assumption may be an inappropriate representation of future expected experience. In this case a change is made to the long term assumption to set it at a more appropriate level. There may also be instances where a short term change in assumptions is indicated (e.g. if persistency rates over the next 3 years are likely to deviate from the long term assumptions, but is then expected to revert to the assumed long term level). A short term reserve will be created to ensure appropriate total reserves are held over this period of shortfall. This short term reserve will be released to offset the expected short term unusual experience as it emerges. The expected results of any future management interventions will also be taken into account where relevant. There is a strict governance process for making changes to the valuation assumptions (both short and long term). This process runs in the months before and after a valuation date, to ensure that only appropriate assumptions are included in that reporting period's policyholder liability calculations.

During the year we concluded several experience reviews across our life business in South Africa, the results of which were captured in our year end basis change process. We have also implemented several model and methodology improvements. Overall, the net impact of these basis changes to the Group's profits was R932 million. Although positive at a total level, there were some significant segment profit impacts due to the differing outcomes of the experience reviews at a segment level.

The table below summarises the basis and assumption changes made in 2019.

Rm	Year ended 31 December 2019					Year ended 31 December 2018				
	Group	Mass and Foundation Cluster	Personal Finance	Old Mutual Corporate	Rest of Africa	Group	Mass and Foundation Cluster	Personal Finance	Old Mutual Corporate	Rest of Africa
Non economic basis changes	(81)	1,330	(1,447)	74	(38)	43	363	(355)	(21)	56
Economic basis changes	1,013	-	772	217	24	(1)	-	(1)	-	-
<b>Total basis changes</b>	<b>932</b>	<b>1,330</b>	<b>(675)</b>	<b>291</b>	<b>(14)</b>	<b>42</b>	<b>363</b>	<b>(356)</b>	<b>(21)</b>	<b>56</b>

The non economic basis change reflects the net impact of changes in our mortality, persistency and expense assumptions and associated modelling.

We completed a review of our mortality basis across the South African life business. In Mass and Foundation Cluster, where we have seen recent periods of mortality profit, this resulted in a release of reserves, partially offset by an allocation of a portion of the value to our customers, consistent with our historic treatment of similar profits in the past. In Personal Finance, the mortality basis change was negative, reflecting both poor mortality experience in certain cohorts over recent periods and the impact of removing worsening cross-subsidies across cohorts.

Changes were also made to the persistency basis to recognise observed changes in persistency. In Mass and Foundation Cluster there was negative impact from increasing lapse assumptions, while in Personal Finance there was a negative impact from reducing longer duration lapse assumptions in our Greenlight product.

The Personal Finance mortality and persistency impact was partially offset by the positive impact of reserving for expected future premium increases on policies that reach the end of their premium guarantee term.

The economic basis changes mostly reflect the impact of a release from our investment guarantee reserves, supported by the introduction of an improved and recalibrated economic scenario generator (ESG), which is a key component in the modelling of our investment guarantee risk.

#### (b) Accounting matters relating to Zimbabwe

##### Assessment of Zimbabwe as a hyperinflationary economy

During the first half of 2019 the Group concluded that Zimbabwe was a hyperinflationary economy. This decision was made after careful assessment of the relevant factors including the rapid increase in official inflation rates and fuel prices as well as significant deterioration in the interbank ZWL exchange rate during the period. Subsequent to this, the Zimbabwe Public Accountants and Auditors Board have confirmed that Zimbabwe is a hyperinflationary economy, thereby confirming the appropriateness of this treatment.

##### Application of hyperinflationary accounting

The results of our operations with a functional currency of ZWL have been prepared in accordance with IAS 29 - 'Financial Reporting in Hyperinflationary Economies' (IAS 29) as if the economy had been hyperinflationary from 1 October 2018. This date coincided with the date on which the functional currency for our businesses in Zimbabwe changed from a US dollar (as stable currency) to the ZWL and the official inflation rate was low and stable up to that point. Hyperinflationary accounting requires transactions and balances to be stated in terms of the measuring unit current at the end of the reporting period in order to account for the effect of loss of purchasing power during the period. The Group has elected to use the Zimbabwe Consumer Price Index (CPI) of 551.8 at 31 December 2019 as the general price index to restate amounts as CPI provides an official observable indication of the change in the price of goods and services.

The carrying amounts of non-monetary assets and liabilities carried at historic cost have been remeasured to reflect the change in the general price index from 1 October 2018 to the end of the reporting period. An impairment loss has been recognised in profit or loss where the remeasured amount of a non-monetary item exceeds its estimated recoverable amount. No adjustment has been made for those non-monetary assets and liabilities carried at fair value.

Gains or losses on the net monetary position have been recognised in the income statement. All items recognised in the income statement are restated by applying the change in the general price index from the dates when the items of income and expenses were initially earned or incurred unless they relate to items already accounted for at fair value, with the corresponding adjustment presented in the income statement. All items in the statement of cash flows are expressed in terms of the general price index at the end of the reporting period.

Comparative amounts in the Group financial statements have not been restated for changes in the price level from 1 October 2018 as the presentation currency of the Group is that of a non-hyperinflationary economy.

The impact of applying IAS 29 in the current year resulted in an increase in net asset value and profit after tax of R187 million.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## A: Significant accounting policies

### A3: Critical accounting estimates and judgements

#### (b) Accounting matters relating to Zimbabwe

##### Exchange rate applied in translating the results, net assets and cash flows of the Group's businesses in Zimbabwe

In accordance with the provisions of IAS 21 – 'The Effects of Changes in Foreign Exchange Rates' the results, net assets and cash flows have been translated at the closing rate of 1 ZWL to 0.83 ZAR. The closing rate used to translate the December 2018 results was 1 ZWL to 4.35 ZAR.

The Group applied a change in functional currency from the US dollar to the ZWL in respect of our businesses in Zimbabwe on 1 October 2018. This change was applied prospectively and an estimate of 1 ZWL to 4.35 ZAR was used as the exchange rate to translate the results, net assets and cash flows of the Group's businesses in Zimbabwe in the 2018 financial statements. The estimated exchange rate was based on an internal model. On 20 February 2019 the Reserve Bank of Zimbabwe (RBZ) announced that the ZWL would be recognised as an official currency and that an interbank foreign exchange market would be established to formalise trading in ZWL balances with other currencies. This exchange commenced trading on 22 February 2019.

The impact of applying the hyperinflationary provisions of IAS 21 in the current year was a decrease in the Group's profit after tax of R312 million reflecting the difference in applying the average versus the closing exchange rate.

##### Valuation of assets within Zimbabwe

In light of the economic conditions within Zimbabwe, the valuation of assets, in particular, unlisted valuations require significant judgement. The Group has exposure to property assets, unlisted and listed investments. Listed investments comprise equity shareholdings in companies listed on the Zimbabwe stock exchange and other international stock exchanges while our unlisted investment portfolio primarily comprises of private equity investments. The Zimbabwe property portfolio comprises of retail, office and industrial properties. All assets have applied valuation principles as outlined within IFRS.

Due to the subjective nature and complexity of the inputs used in the valuations, the Group has adjusted the valuation to account for uncertainty within these significant judgements.

##### Sensitivities

The table below illustrates the sensitivity of the summary income statement and summary statement of financial position to changes in the general price index:

Rm	As reported	+100% (CPI)	+250% (CPI)	+500% (CPI)
<b>Summary income statement</b>				
<b>Profit after tax for the financial period</b>	<b>489</b>	669	770	940
<b>Summary statement of financial position</b>				
<b>Net assets</b>	<b>432</b>	613	714	884

The table below illustrates the sensitivity of key financial measures to changes in the exchange rates:

Rm	As reported	1 ZWL\$: 0.62 ZAR	1 ZWL\$: 0.42 ZAR	1 ZWL\$: 0.21 ZAR
<b>Profit after tax attributable to equity holders of the parent</b>	<b>442</b>	331	221	110
<b>Equity attributable to the equity holders of the parent</b>	<b>392</b>	295	197	98

#### (c) Fair value of property assets

The Group has exposure to property assets through its investments in investment property and owner occupied properties in South Africa, Rest of Africa and Eastern Europe. The valuation of the Group's property portfolio in East Africa and Zimbabwe, in particular, requires significant judgement due to the current economic conditions prevailing in these regions, especially around reversionary capitalisation rates and rental levels. Methodologies used to determine and assess the fair value of property assets include discounted cash flow and income capitalisation models. The fair value of each property asset is determined based on the most appropriate valuation applicable to the specific market and economy in which it is invested and the particulars of the property itself. All material property asset valuations in the Group are reviewed by the Group and independent external valuation experts on a regular basis. This could result in the Group concluding on a different valuation for the asset.

## B: Segment information

### B1: Basis of segmentation

#### 1.1 Segment presentation

The executive management team of Old Mutual Limited, with the support of the Board, was responsible for the assessment of performance and the allocation of resources of the continuing business operations during the period under review. The Group has identified the Chief Operating Decision Maker (CODM) to be the executive management team of Old Mutual Limited. The Group's operating segments have been identified based on the internal management reporting structure which is reflective of the nature of products and services as well as the target customer base. The Managing Directors of the operating segments form part of the executive team. Therefore, the chief operating decision maker, being the executive team of Old Mutual Limited, is structured in a way reflective of the internal reporting structure.

The Group manages its business through the following operational segments, which are supported by central shareholder activities and enabling functions.

- **Mass and Foundation Cluster:** A retail segment that operates in Life and Savings and Banking and Lending. It provides simple financial services products to customers in the low-income and lower-middle income markets. These products are divided into four categories being (i) risk, including funeral cover, (ii) savings, (iii) lending and (iv) transactional products.
- **Personal Finance:** A retail segment that operates primarily in Life and Savings. It provides holistic financial advice and long-term savings, investment, income and risk products and targets the middle-income market.
- **Wealth and Investments:** Operates across Life and Savings and Asset Management through four distinct businesses: (i) Wealth, a retail segment targeting high income and high net worth individuals, that provides vertically integrated advice, investment solutions and funds, and other financial solutions, (ii) Asset Management comprising eight investment boutiques that provide asset management services to retirement and benefit funds and to the retail market in partnership with Wealth, (iii) Alternatives, an unlisted alternatives investment business, and (iv) Specialised Finance, a proprietary risk and investment capability which manages and supports the origination of assets.
- **Old Mutual Corporate:** Operates in Life and Savings and primarily provides Group risk, investments, annuities and consulting services to employee-sponsored retirement and benefit funds.
- **Old Mutual Insure:** Provides Property and Casualty insurance products through three operational businesses: (i) Personal (ii) Commercial, and (iii) Corporate.
- **Rest of Africa:** Operates in Life and Savings, Property and Casualty (including health insurance), Banking and Lending (including micro-lending) and Asset Management. The segment operates in 12 countries across three regions: Southern Africa, East Africa and West Africa.
- **Other Group Activities:** Comprises the activities related to the management of the Group's capital structure. This includes the management of shareholder investment assets including the associated shareholder investment return and third-party borrowings including the associated finance costs. Also included are net assets and operations of Residual plc and investments in associated undertakings. Subsequent to the Nedbank unbundling, the Group retained a minority shareholding of 19.9%, managed as part of Other Group Activities.

#### 1.2 Presentation and disclosure

Results from Operations measures the operational performance of the Group and together with items such as investment return, finance costs and income from associated undertakings, the Group's profit measure, AHE is derived. AHE by definition excludes discontinued operations and Residual plc, which do not form part of core continuing businesses of the Group, and certain of the discontinued operations are a function of the reorganisation and the application of predecessor accounting.

The Group is in the process of a fundamental multi-year transformation of its finance function, transitioning from a legal entity view to a segment approach to better reflect the statement of financial position economics and levers to drive value.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## Notes to the summary consolidated financial statements

For the year ended 31 December 2019

### C: Other key performance information

#### C1: Earnings and earnings per share

Cents	Source of guidance	Notes	2019	2018
Basic earnings per share	IFRS	C1(a)	208.3	788.1
Diluted earnings per share	IFRS	C1(b)	205.2	778.1
Headline earnings per share	JSE Listing Requirements SAICA Circular 1/2019	C1(c)	236.1	306.9
Diluted headline earnings per share	JSE Listing Requirements SAICA Circular 1/2019	C1(c)	232.6	301.7

#### (a) Basic earnings per share

Basic earnings per share is calculated by dividing the profit for the financial year attributable to ordinary equity shareholders of the parent by the weighted average number of ordinary shares in issue during the year excluding own shares held in policyholder funds, Employee Share Ownership Plan Trusts (ESOP) and Black Economic Empowerment trusts. These shares are regarded as treasury shares.

Rm	2019	2018
Profit for the financial year attributable to equity holders of the parent from continuing operations	9,282	4,875
Profit for the financial year attributable to equity holders of the parent from discontinued operations	104	31,691
<b>Profit attributable to ordinary equity holders of the parent</b>	<b>9,386</b>	<b>36,566</b>

The following table summarises the calculation of the weighted average number of ordinary shares for the purposes of calculating basic earnings per share:

	2019	2018
<b>Weighted average number of ordinary shares in issue (millions)</b>	<b>4,828</b>	<b>4,938</b>
Shares held in charitable foundations and trusts (millions)	(19)	(19)
Shares held in ESOP and similar trusts (millions)	(100)	(104)
<b>Adjusted weighted average number of ordinary shares (millions)</b>	<b>4,709</b>	<b>4,815</b>
Shares held in policyholder and consolidated investment funds (millions)	(192)	(173)
Shares held in Black Economic Empowerment trusts (millions)	(10)	(2)
<b>Weighted average number of ordinary shares used to calculate basic earnings per share (millions)</b>	<b>4,507</b>	<b>4,640</b>
<b>Basic earnings per ordinary share (cents)</b>	<b>208.3</b>	<b>788.1</b>

#### (b) Diluted earnings per share

Diluted earnings per share recognises the dilutive impact of shares and options held in ESOP and similar trusts and Black Economic Empowerment trusts, to the extent they have value, in the calculation of the weighted average number of shares, as if the relevant shares were in issue for the full year.

The following table reconciles the profit attributable to ordinary equity holders to diluted profit attributable to ordinary equity holders and summarises the calculation of weighted average number of shares for the purpose of calculating diluted basic earnings per share:

	Notes	2019	2018
Profit attributable to ordinary equity holders (Rm)		9,386	36,566
Dilution effect on profit relating to share options issued by subsidiaries (Rm)		-	(98)
<b>Diluted profit attributable to ordinary equity holders (Rm)</b>		<b>9,386</b>	<b>36,468</b>
Weighted average number of ordinary shares (millions)	C1(a)	4,507	4,640
Adjustments for share options held by ESOP and similar trusts (millions)		58	45
Adjustments for shares held in Black Economic Empowerment trusts (millions)		10	2
<b>Weighted average number of ordinary shares used to calculate diluted earnings per share (millions)</b>		<b>4,575</b>	<b>4,687</b>
<b>Diluted earnings per ordinary share (cents)</b>		<b>205.2</b>	<b>778.1</b>

#### (c) Headline earnings per share

The Group is required to calculate headline earnings per share (HEPS) in accordance with the Johannesburg Stock Exchange (JSE) Listing Requirements, determined by reference to the South African Institute of Chartered Accountants' circular 01/2019 'Headline Earnings'. The table below sets out a reconciliation of basic EPS and HEPS in accordance with that circular. Disclosure of HEPS is not a requirement of IFRS, but it is a JSE required measure of earnings in South Africa. The following table reconciles the profit for the financial year attributable to equity holders of the parent to headline earnings and summarises the calculation of basic HEPS:

Rm	Notes	2019		2018	
		Gross	Net of tax and non-controlling interests	Gross	Net of tax and non-controlling interests
<b>Profit attributable to ordinary equity holders</b>			<b>9,386</b>		36,566
<b>Adjustments:</b>					
Impairments of intangible assets and property plant and equipment		472	395	1,196	892
Impairment of investment in associated undertakings		869	869	-	-
Profit on disposal of property and equipment		-	-	(103)	(51)
Profit on disposal of subsidiaries, associated undertakings and joint ventures		(307)	(9)	(23,173)	(23,166)
<b>Total adjustments</b>		<b>1,034</b>	<b>1,255</b>	<b>(22,080)</b>	<b>(22,325)</b>
<b>Headline Earnings</b>			<b>10,641</b>		14,241
Dilution effect on earnings relating to share options issued by subsidiaries			-		(98)
<b>Diluted Headline Earnings</b>			<b>10,641</b>		14,143
<b>Weighted average number of ordinary shares (millions)</b>	C1(a)		<b>4,507</b>		4,640
<b>Diluted weighted average number of ordinary shares (millions)</b>	C1(b)		<b>4,575</b>		4,687
<b>Headline Earnings per share (cents)</b>			<b>236.1</b>		306.9
<b>Diluted Headline Earnings per share (cents)</b>			<b>232.6</b>		301.7

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## C: Other key performance information

### C2: Net asset value per share and tangible net asset value per share

Net asset value per share is calculated as total assets minus total liabilities divided by the total number of ordinary shares in issue at year end.

Net tangible asset value per share is calculated as total assets minus goodwill and other intangible assets minus total liabilities divided by the total number of shares in issue at year end.

Rand	2019	2018
Net asset value per share	16.5	16.5
Net tangible asset value per share	15.2	15.3

### C3: Dividends

Year ended 31 December Rm	Ordinary dividend payment date	2019	2018
2017 Second interim dividend paid 3.57p (66.50c) per 11 3/7p share	30 April 2018	-	3,113
2018 Interim dividend and special dividend paid – 45.00c and 100c per share respectively		-	6,852
2018 Final dividend paid – 72.00c per share	29 April 2019	3,334	-
2019 Interim dividend paid – 45.00c per share	31 October 2019	2,049	-
Dividend payments to ordinary equity holders for the year		5,383	9,965

The total dividend paid to ordinary equity holders is calculated using the number of shares in issue at the record date less own shares held in ESOP trusts, life funds of Group entities, Black Economic Empowerment trusts and related undertakings.

As a consequence of the exchange control arrangements in place in certain African territories, dividends to ordinary equity holders on the branch registers of those countries (or, in the case of Namibia, the Namibian section of the principal register) are settled through Dividend Access Trusts established for that purpose.

A final dividend of 75 cents (or its equivalent in other applicable currencies) per ordinary share in the Company has been declared by the directors and will be paid on 4 May 2020 to shareholders on all registers.

## D: Other consolidated income statement notes

### D1: Revenue from contracts with customers

Revenue from contracts with customers are disaggregated by primary segment and type of revenue. The Group believes it best depicts how the nature, amount, timing and uncertainty of the Group's revenue and cash flows are affected by economic factors.

The Group does not apply significant judgements to determine the costs incurred to obtain or fulfil contracts with customers, and no amortisation is required, as income directly matches costs with management charges being applied on an ongoing (or pro-rata) basis.

Year ended 31 December 2019 Rm	Mass and Foundation Cluster	Personal Finance	Wealth and Investments	Old Mutual Corporate	Old Mutual Insure	Rest of Africa	Other Group Activities	Consolidation of funds	Total

<sup>1</sup> The year ended 31 December 2018 has been re-presented to align with 2019 reporting that better reflects management's view of disaggregation of revenue.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## E: Financial assets and liabilities

### E1: Disclosure of financial assets and liabilities measured at fair value

#### (a) Financial assets and liabilities measured at fair value, classified according to fair value hierarchy

The table below presents a summary of the financial assets and liabilities that are measured at fair value in the consolidated statement of financial position according to their IFRS 9 classification:

At 31 December 2019 Rm	Total	Level 1	Level 2	Level 3
<b>Financial assets measured at fair value</b>				
Reinsurers' share of policyholder liabilities	3,227	3,227	-	-
Investments and securities	741,195	340,871	375,984	24,340
Derivative financial instruments – assets	3,221	-	3,221	-
<b>Total financial assets measured at fair value</b>	<b>747,643</b>	<b>344,098</b>	<b>379,205</b>	<b>24,340</b>
<b>Financial liabilities measured at fair value</b>				
Investment contract liabilities	313,109	140,092	173,017	-
Third-party interests in consolidated funds	80,814	-	80,814	-
Borrowed funds	7,122	-	7,122	-
Other liabilities	2,471	651	1,820	-
Derivative financial instruments – liabilities	4,834	-	4,834	-
<b>Total financial liabilities measured at fair value</b>	<b>408,350</b>	<b>140,743</b>	<b>267,607</b>	<b>-</b>
<b>At 31 December 2018</b>				
Rm	Total	Level 1	Level 2	Level 3
<b>Financial assets measured at fair value</b>				
Reinsurers' share of policyholder liabilities	3,007	3,007	-	-
Investments and securities	703,987	386,316	287,252	30,419
Derivative financial instruments – assets	2,779	-	2,779	-
<b>Total financial assets measured at fair value</b>	<b>709,773</b>	<b>389,323</b>	<b>290,031</b>	<b>30,419</b>
<b>Financial liabilities measured at fair value</b>				
Investment contract liabilities	286,710	123,873	162,837	-
Third-party interests in consolidated funds	80,855	-	80,855	-
Borrowed funds	6,581	-	6,581	-
Derivative financial instruments – liabilities	5,327	-	5,327	-
<b>Total financial liabilities measured at fair value</b>	<b>379,473</b>	<b>123,873</b>	<b>255,600</b>	<b>-</b>

During the current year, investment contract liabilities to the value of R661 million were reclassified from level 1 to level 2 to better reflect the valuation technique used to value these liabilities.

For the year ended 31 December 2018, investment contract liabilities to the value of R123,873 million were reclassified from level 2 to level 1 to better reflect the valuation technique used to value these liabilities.

#### (b) Level 3 fair value hierarchy disclosure

The tables below reconcile the opening balances of Level 3 financial assets and liabilities to closing balances at the end of the year.

Year ended 31 December Rm	2019	2018
<b>Level 3 financial assets – Investments and securities</b>		
At beginning of the year	30,419	20,426
Total net fair value gains/(losses) recognised in profit or loss	(7,290)	(662)
Purchases and issues	3,487	3,664
Sales and settlements	(2,993)	(1,311)
Transfers in	1,937	9,458
Transfers out	(830)	(184)
Foreign exchange and other	(390)	(972)
<b>Total Level 3 financial assets</b>	<b>24,340</b>	<b>30,419</b>
Unrealised fair value gains recognised in profit or loss	134	786

At 31 December 2019, Level 3 assets comprised unlisted private company shares, unlisted debt securities and unlisted pooled investments mainly held by policyholder funds for which the majority of the investment risk is borne by policyholders.

During the year Investments and securities to the value of R1,937 million were reclassified from Level 2 to Level 3 in the separate disclosure to better reflect the valuation technique used to value these investments.

During the year Investments and securities to the value of R830 million were reclassified from Level 3 to Level 2 in the separate disclosure to better reflect the valuation technique used to value these investments.

For all reporting periods, the Group did not have any Level 3 financial liabilities.

#### (c)(i) Effect of changes in significant unobservable assumptions to reasonable possible alternatives

Favourable and unfavourable changes are determined on the basis of changes in the value of the financial asset or liability as a result of varying the levels of the unobservable parameters using statistical techniques. When parameters are not amenable to statistical analysis, quantification of uncertainty is judgemental.

When the fair value of a financial asset or liability is affected by more than one unobservable assumption, the figures shown reflect the most favourable or most unfavourable change from varying the assumptions individually.

The valuations of the private equity investments are performed on an asset-by-asset basis using a valuation methodology appropriate to the specific investment and in line with industry guidelines. In determining the valuation of the investment the principal assumption used is the valuation multiples applied to the main financial indicators (such as adjusted earnings). The source of these multiples may include multiples for comparable listed companies which have been adjusted for discounts for non-tradability and valuation multiples earned on transactions in comparable sectors.

The valuations of asset-backed securities are determined by discounted cash flow models that generate the expected value of the asset, incorporating benchmark information on factors such as prepayment patterns, default rates, loss severities and the historical performance of the underlying assets. The outputs from the models used are calibrated with reference to similar securities for which external market information is available.

Structured notes and other derivatives are generally valued using option pricing models. For structured notes and other derivatives, principal assumptions concern the future volatility of asset values and the future correlation between asset values. For such unobservable assumptions, estimates are based on available market data, which may include the use of a proxy method to derive a volatility or correlation from comparable assets for which market data is more readily available, and examination of historical levels.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## E: Financial assets and liabilities

### E1 Disclosure of financial assets and liabilities measured at fair value

#### (c)(i) Effect of changes in significant unobservable assumptions to reasonable possible alternatives

For Level 3 investments and securities, the fair value measurement sensitivity to changes in unobservable inputs are R2,056 million (2018: R1,378 million) favourable and R1,848 million (2018: R1,365 million) unfavourable.

Key inputs and assumptions used in the valuation models include discount rates (with the reasonably possible alternative assumptions calculated by increasing/decreasing the discount rate by 10%) and price earnings ratio (with the reasonably possible alternative assumptions calculated by increasing/decreasing the price earnings ratio by 10%).

Level 2 instruments are valued based on discounted projected cash flows, relative yields, or cost basis with reference to market-related inputs. Main inputs used for level 2 valuations include bond curves, interbank swap interest rate curves, and the forecasted consumer price index.

#### (c)(ii) Analysis of investments and securities classified as Level 3 hierarchy

The following table sets out information about significant unobservable inputs used at year end in measuring financial instruments categorised as Level 3.

Valuation technique	Significant unobservable input	Range of unobservable inputs
Discounted cash flow (DCF)	<b>Risk adjusted discount rate:</b>	
	– Equity risk premium	3.0% – 7.0%
	– Liquidity discount rate	5.0% – 30.0%
	– Nominal risk free rate	6.7% – 9.7%
Price earnings (PE) multiple/embedded value	PE ratio/multiple	1.2 – 11.2 times
Sum of parts	PE ratio and DCF	See PE ratio and DCF

All the business segments have performed an analysis of the impact of reasonable possible assumptions for unobservable inputs based on the specific characteristics of each instrument. As all the changes in assumptions are unique to each instrument, the disclosure of the range of changes in the assumptions would not provide the reader of the financial statements with any additional useful information as this is general information and does not relate to a specific instrument.

### E2: Financial instruments designated as fair value through profit or loss

Certain borrowed funds that would otherwise be categorised as financial liabilities at amortised cost under IFRS 9, have been designated as fair value through profit or loss. Information relating to the change in fair value of these items as it relates to credit risk is shown in the table below.

Rm	Change in fair value due to change in credit risk			
	Fair value	Current financial year	Cumulative <sup>1</sup>	Contractual maturity amount
<b>Borrowed funds at 31 December 2019</b>	<b>7,122</b>	<b>62</b>	<b>180</b>	<b>7,000</b>
Borrowed funds at 31 December 2018	6,581	131	131	6,000

<sup>1</sup> The Group released R13 million of the liability credit reserve directly to the retained earnings on the repayment of R1,000 million unsecured subordinated debt. Refer to note A2 for more information.

The fair values of other categories of financial liabilities designated as fair value through profit or loss do not change significantly in respect of credit risk.

The change in fair value due to credit risk of financial liabilities designated at fair value through profit or loss has been determined as the difference between fair values determined using a liability curve (adjusted for credit risk) and a risk-free liability curve. This difference is cross-checked to market-related data on credit spreads, where available. The basis for not using credit default swaps to determine the change in fair value due to credit risk is the unavailability of reliable market priced instruments.

### E3: Fair value hierarchy for assets and liabilities not measured at fair value

Certain financial instruments of the Group are not carried at fair value, principally investments and securities, loans and advances, certain borrowed funds and other financial assets and financial liabilities at amortised cost. The calculation of the fair value of these financial instruments represents the Group's best estimate of the value at which these financial assets could be exchanged, or financial liabilities transferred, between market participants at the measurement date. The Group's estimate of fair value does not necessarily represent the amount it would be able to realise on the sale of the asset or transfer of the financial liability in an involuntary liquidation or distressed sale.

The table below shows the fair value hierarchy only for those assets and liabilities for which the fair value is different to the carrying value and which is being estimated for the purpose of IFRS disclosure. Additional information regarding these and other financial instruments not carried at fair value is provided in the narrative following the table.

Rm	Carrying value	Fair value			Total
		Level 1	Level 2	Level 3	
<b>Financial liabilities</b>					
<b>Borrowed funds at 31 December 2019</b>	<b>11,867</b>	<b>–</b>	<b>11,867</b>	<b>–</b>	<b>11,867</b>
Borrowed funds at 31 December 2018	10,307	–	10,307	–	10,307

#### Investments and securities

For investments and securities presented within note E1 as amortised cost in terms of IFRS 9 and therefore not carried at fair value, the fair value has been determined based either on available market prices (Level 1) or discounted cash flow analysis where an instrument is not quoted or the market is considered to be inactive (Level 2).

#### Loans and advances

Loans and advances presented at amortised cost in terms of IFRS 9, and therefore not carried at fair value, principally comprise variable rate financial assets and are classified as Level 3. The interest rates on these variable-rate financial assets are adjusted when the applicable benchmark interest rates change.

Loans and advances are not actively traded in most markets and it is therefore not possible to determine the fair value of these loans and advances using observable market prices and market inputs. Due to the unique characteristics of the loans and advances portfolio and the fact that there have been no recent transactions involving the disposals of such loans and advances, there is no basis to determine a price that could be negotiated between market participants in an orderly transaction. The Group is not currently in the position of a forced sale of such underlying loans and advances and it would therefore be inappropriate to value the loans and advances on a forced-sale basis.

#### Borrowed funds

Borrowed funds presented within note F2 as financial liabilities at amortised cost in terms of IFRS 9 are not carried at fair value. The fair value is determined using either available market prices (Level 1) or discounted cash flow analysis where an instrument is not quoted or the market is considered to be inactive (Level 2).

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## F: Analysis of Financial Assets and Liabilities

### F1: Insurance and investment contracts

Policyholder liabilities

The Group's insurance and investment contracts are analysed as follows:

Year ended 31 December Rm	2019			2018		
	Gross	Reinsurance	Net	Gross	Reinsurance	Net
<b>Life assurance policyholder liabilities</b>						
<b>Total life insurance contracts liabilities</b>	<b>141,156</b>	<b>(1,849)</b>	<b>139,307</b>	143,926	(810)	143,116
Life insurance contracts liabilities	139,046	(1,653)	137,393	141,756	(810)	140,946
Outstanding claims	2,110	(196)	1,914	2,170	-	2,170
<b>Investment contract liabilities</b>						
<b>Investment contract liabilities</b>	<b>512,554</b>	<b>(3,140)</b>	<b>509,414</b>	476,129	(3,007)	473,122

#### (a) Transactions with key management personnel, remuneration and other compensation

The Company's key management personnel include all members of the Board, (both executive and non-executive directors) and prescribed officers as defined by the Companies Act. In addition, due to the influence on the planning, direction and control over the activities of the Group, all members of the Executive committee will also be included as key management personnel.

The definition of key management personnel also includes the close family members of key management personnel and any entity over which key management exercises control or joint control. Close family members are those family members who may influence, or be influenced by that person in their dealings with the Group. These may include the person's domestic partner and children, the children of the person's domestic partner, and dependants of the person or the person's domestic partner.

The Directors' Emoluments disclosures required by the Companies Act are set out in note L of the Annual Financial Statements. Disclosures required in terms of King IV™ will be disclosed in the Old Mutual Limited Remuneration Report which will be released on 31 March 2020 and can be accessed on <https://www.oldmutual.com/investor-relators/reporting-centre/reports>.

Compensation paid to the Board of directors is aggregated below, together with the aggregate compensation paid to the Executive committee members (Exco), as well as the number of share options and instruments held.

#### (c) Changes in the status of certain directors

##### Thoko Mokgosi-Mwantembe

On 3 April 2019, the Group announced that the Board of Old Mutual Limited had considered an arms-length transaction by Ms. Mokgosi-Mwantembe in her personal capacity. Given the nature of the transaction the Group resolved that Ms Mokgosi-Mwantembe was no longer classified as an independent director on the Old Mutual Limited Board. This was effective from 3 April 2019 and her status has been reflected as a non-executive director since that date.

##### Peter Moyo

On 24 May 2019 the Board of Old Mutual Limited announced that it had made a decision to suspend the Chief Executive Officer, Peter Moyo and he was not appointed as a director of Old Mutual Limited at the Annual General Meeting held on that date. Subsequent to this, on 17 June 2019, the Board announced that it had given notice to Mr. Moyo to terminate his employment contract on notice. Although Mr. Moyo is currently challenging the termination of his employment contract in court proceedings, he is not required to perform any duties during his notice period.

##### Iain Williamson

Following the suspension of Peter Moyo, the Board of Old Mutual Limited announced that it had appointed Iain Williamson as the Interim Chief Executive Officer of Old Mutual Limited, effective 24 May 2019. Mr. Williamson was also appointed as executive director of Old Mutual Limited on 27 May 2019 and will remain in this position until such time as a suitable successor is announced.

#### (d) Investments in the NMT group of companies

Peter Moyo, previously an executive director of the Company, and also a non-executive director of OMLACSA, a wholly owned subsidiary of the Group, is also a non-executive director of NMT Capital (Pty) Ltd (NMT Capital) and NMT Group (Pty) Ltd (NMT Group), and holds an equity interest in both companies. OMLACSA has provided equity and preference share funding to both NMT Capital and NMT Group as well as related entities. RZT Zelpy 4971 (Pty) Ltd, RZT Zelpy 4973 (Pty) Ltd and STS Capital (Pty) Ltd are ordinary shareholders and related parties of NMT Capital. Amabubesi Capital Travelling (Pty) Ltd is a subsidiary of NMT Group.

In July 2019 and August 2019, NMT Capital repaid R47 million and R4 million respectively reflecting the full repayment of the outstanding preference shareholding in NMT Capital as well as arrear preference share dividends. During January 2020, NMT Capital bought back OMLACSA's ordinary shareholding of R14 million. In addition, the Group received R20 million as full settlement of the preference shareholding in RZT Zelpy 4971, RZT Zelpy 4973 and STS Capital. The investments in the NMT companies have been valued based on a directors' valuation. The negotiations to exit the remaining investments are in early stages and the timing and mechanism of the realisation is yet to be determined. The valuation of this investment will continue to be monitored as negotiations progress.

#### (e) Investments in the Kutana group of companies

Thoko Mokgosi-Mwantembe, a non-executive director of the Company and OMLACSA, a wholly owned subsidiary of the Group, is also the Chief Executive Officer and sole equity holder of Kutana Capital (Pty) Ltd (Kutana).

During the period, Old Mutual Specialised Finance provided preference share funding to Luxanio 220 (RF) (Pty) Ltd, a wholly owned subsidiary of Kutana. In light of this investment, we also reviewed where Kutana had significant influence in the wider structure and provided additional information in respect of these relationships.

The Group, through various of its operating subsidiaries has provided debt funding as part of a consortium of lenders, to In2Food Group (Pty) Ltd through an entity called Middle Road Packers (Middle Road), an entity in which Kutana has an effective ownership of 35%.

The Group indirectly holds a 31% minority stake in Middle Road alongside Kutana's 35% interest, which was acquired by the Old Mutual Private Equity Fund IV (Fund IV) prior to Thoko Mokgosi-Mwantembe having been appointed as a non-executive director of the Company and OMLACSA. Fund IV is a limited liability partnership and the Group holds c.88% of the interest in Fund IV. In line with the nature of this structure, the Group has no influence over the investment decisions of this fund. These structures within the Group ensure that the independence of our asset management businesses is maintained. The underlying assets and liabilities of Fund IV have been consolidated into the Group's results and financial position as if it were a subsidiary in compliance with IFRS 10.

# Notes to the summary consolidated financial statements

For the year ended 31 December 2019

## G: Other notes

### G1: Related parties

#### (e) Investments in the Kutana group of companies

The transactions concluded with the Kutana Group of companies arose in the ordinary course of business and were conducted on the same commercial terms, including interest rates and security, as comparable transactions with third party counterparties. The transactions did not involve more than the normal risk of repayment, nor do they present any other unfavourable features to the Group.

Year ended 31 December Rm	2019	2018
<b>Debt instruments held</b>		
Preference shareholding – Luxanio 220 (RF) (Pty) Ltd	226	–
Mezzanine debt – In2Food Group (Pty) Ltd	37	43

Term loan B – In2Food Group (Pty) Ltd	120	139
<b>Income earned</b>		
Preference dividends accrued – Luxanio 220 (RF) (Pty) Ltd	25	–
Mezzanine debt interest accrued – In2Food Group (Pty) Ltd	1	1
Term loan A interest accrued – In2Food Group (Pty) Ltd	1	1
Term loan B interest accrued – In2Food Group (Pty) Ltd	1	1

### G2: Contingent liabilities

The Group has provided certain guarantees for specific client obligations, in return for which the Group has received a fee. The Group has evaluated the extent of the possibility of the guarantees being called on and has provided appropriately.

#### Contingent liabilities – legal proceedings

The Group operates in a legal and regulatory environment that exposes it to litigation risks. As a result, the Group is involved in disputes and legal proceedings that arise in the ordinary course of business. Legal expenses incurred in respect of these disputes and legal proceedings are expensed as incurred. Claims, if any, cannot be reasonably estimated at this time but the Group does not expect the ultimate resolution of any of the proceedings to which it is party to have a significant adverse effect on the financial position of the Group.

During the period the Group managed two ongoing litigation matters in which the Chairman of Old Mutual Limited is named. These matters had both reputational and strategic execution consequences specific to the Group and whilst the Chairman is named in these matters, the decision to incur these costs was made in the interests of the Group. Legal fees paid in respect of these matters for the year ended 31 December 2019 were approximately R930,000 (December 2018: R920,000).

The Group is currently pursuing litigation in relation to the decision made to terminate Peter Moyo's employment contract. The Group does not expect the ultimate resolution of these proceedings to have a significant adverse effect on the financial position of the Group.

#### Tax

The Revenue authorities in the principal jurisdictions in which the Group operates routinely review historic transactions undertaken and tax law interpretations made by the Group. The Group is committed to conducting its tax affairs in accordance with the tax legislation of the jurisdictions in which it operates. All interpretations made by management are made with reference to the specific facts and circumstances of the transaction and the relevant legislation.

There are occasions where the Group's interpretation of tax law may be challenged by the Revenue authorities. The financial statements include provisions that reflect the Group's assessment of liabilities which might reasonably be expected to materialise as part of their review. The Board is satisfied that adequate provisions have been made to cater for the resolution of tax uncertainties and that the resources required to fund such potential settlements are sufficient.

Due to the level of estimation required in determining tax provisions amounts eventually payable may differ from the provision recognised.

#### Consumer protection

The Group is committed to treating customers fairly and supporting its customers in meeting their lifetime goals is central to how our businesses operate. We routinely engage with customers and regulators to ensure that we meet this commitment, but there is the risk of regulatory intervention across various jurisdictions, giving rise to the potential for customer redress which can result in retrospective changes to policyholder benefits, penalties or fines. The Group monitors the exposure to these actions and makes provision for the related costs as appropriate.

#### Outcome of Zimbabwean Commission Enquiry

On 31 December 2016, the Zimbabwean Government concluded its enquiry into the loss in value for certain policyholders and beneficiaries upon the conversion of pension and insurance benefits after the dollarisation of the economy in 2009. On 9 March 2018, the results of the Zimbabwean Government's enquiry were made public.

Although the Commission believes that policyholders may have been prejudiced, and that government, regulators and the insurance industry played a role in the loss of value, this finding is subject to review by the President and Cabinet. Furthermore, the Commission did not determine a methodology for quantifying or allocating responsibility for this prejudice and recommended that this be the subject of a further independent process to determine criteria for assessing prejudice as well as a basis for compensation which will also take into account the need to maintain stability and confidence in the industry. As such we are not currently able to establish what impact the Commission's findings will have on Old Mutual Zimbabwe.

#### Old Mutual Limited's intragroup guarantee of Travelers indemnification

In September 2001, Old Mutual plc, now a wholly owned subsidiary of Old Mutual Limited, entered into an indemnity agreement with Fidelity and Guaranty Life Insurance Company (F&G), United States Fidelity and Guaranty Company, St. Paul Fire and Marine Insurance Company and Travelers Companies Inc. (the Indemnity Agreement). In terms of this Indemnity Agreement, Old Mutual plc agreed to indemnify Travelers Companies Inc. and certain of its group companies (the Travelers Guarantors) against any and all claims that may be brought against the Travelers Guarantors under the historic guarantees given by the Travelers Guarantors for various obligations under certain life insurance policies and annuities issued by F&G, which obligations include a guarantee issued by the Travelers Guarantors. The liability in respect of this arrangement was limited to \$480 million. F&G has since signed a release agreement to agree they will not call on the guarantee in respect of these insurance policies and annuities.

In March 2018, Old Mutual Limited agreed to provide an intragroup guarantee to Old Mutual plc in the circumstances where Old Mutual plc is unable to satisfy its obligations in respect of the Indemnity Agreement. The likelihood of any material obligations arising under the Indemnity Agreement is considered to be remote given the release agreement entered into between Old Mutual plc and F&G, as well as the current financial strength and regulatory capital position of F&G, a licensed US life insurer.

### G3: Commitments

#### Capital commitments

The Group's management is confident that future net revenues and existing funding arrangements will be sufficient to cover these commitments.

At 31 December Rm	2019	2018
Investment property	620	682
Property, plant and equipment	–	99
Intangible assets	206	2,010

#### Potential future commitments

##### Enterprise development commitments

In accordance with the Framework Agreement entered into in relation to Managed Separation concluded with the Department of Economic Development (the Framework Agreement), the Group has undertaken that, in addition to its existing enterprise development programs, it shall, over a period of three years following the Managed Separation Implementation Date, allocate an incremental amount of R500 million to a ring-fenced perpetual Enterprise Supplier Development Fund (the Fund). Funding extended by the Fund is intended and anticipated to generate additional jobs in the company's Ecosystem. The Group's participation in the Fund shall be managed and administered by a specially created function with oversight from the office of the CEO, which function shall also be responsible for the measurement of compliance by the Group with the Amended FSC and the Group's broader commitment to transformation in South Africa.

Although the fund is developmental in nature, it is management's intention and belief that, in aggregate, the Group will return a profit on the instruments used to meet the requirements of the Framework Agreement. Nevertheless, as with any commitment to advance funding, the Group will be subject to credit and counterparty risk in relation to this arrangement. This risk will be assessed as funds are advanced, expected credit losses will be calculated, and appropriate provisions for impairment will be raised.

During the current financial year, R30 million has been distributed through loan funding mechanisms and two tranches of equity investments have been made to the value of R50 million.

## Notes to the summary consolidated financial statements

For the year ended 31 December 2019

### G: Other notes

#### G3: Commitments

##### Old Mutual Finance (Pty) Ltd put option

The Group and the Business Doctor Consortium Limited and its associates (Business Doctor) established Old Mutual Finance (Pty) Ltd (Old Mutual Finance) as a 50/50 start-up strategic alliance in 2008. The Group increased its shareholding in Old Mutual Finance from 50% to 75% in 2014 by acquiring an additional 25% shareholding from Business Doctor for R1.1 billion. The Group has a call option to acquire the remaining 25% shareholding in Old Mutual Finance held by Business Doctor at market value under certain circumstances, inter alia in the event of a change of control within Business Doctor and on the eighth and tenth anniversary of the effective date of the Old Mutual Finance shareholders' agreement (i.e. in 2022 and 2024 respectively). Business Doctor has a put option to sell its remaining 25% shareholding in Old Mutual Finance to the Group at market value under certain circumstances, inter alia in the event of a change of control within the Group and on the eighth and tenth anniversary of the effective date of the Old Mutual Finance shareholders' agreement (i.e. in 2022 and 2024 respectively).

Following the listing of Old Mutual Limited on 26 June 2018, Business Doctor became entitled to exercise the option to put the remaining shares to Old Mutual Limited. The Group received written confirmation on 22 July 2018 from Business Doctor that the put option would not be exercised.

##### Commitments under derivative instruments

The Group enters into option contracts, financial features contracts, forward rate and interest rate swap agreements, and other financial agreements in the normal course of business.

The Group has options to acquire further stakes in businesses dependent on various circumstances which are regarded by the Group as collectively and individually immaterial.

##### Other commitments

OMLACSA has entered into agreements where it has committed to provide capital to funds and partnerships that it has invested in. The total undrawn commitment is R8,300 million at 31 December 2019 (2018: R8,788 million).

#### G4: Events after the reporting date

##### NMT

During January 2020, NMT Capital bought back OMLACSA's ordinary shareholding of R14 million. In addition, the Group received R20 million as full settlement of the preference shareholding in RZT Zelpy 4971, RZT Zelpy 4973 and STS Capital.

##### COVID-19

On 11 March 2020, COVID-19 was declared as a pandemic due to the rising rate and scale of infection observed. The rapid spread of this virus has caused significant disruption in global equity markets.

We model the impact of 'perfect storm' scenarios on our solvency capital and liquidity levels. These stress tests have shown we remain sufficiently capitalised with appropriate liquidity levels through these scenarios.

- <sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.
- <sup>2</sup> Gross flows have been restated to reflect flows on the Money Account on a net basis. This reduces volatility in reported gross flows due to customers moving funds between their transactional account and save pocket within the same month. The change in basis has no impact on NCCF.
- <sup>3</sup> We have identified a portion of our book where cancellations were not treated in line with our Group policies. Life APE sales for the current and comparative periods have been adjusted to reflect this.

## 1. Key Metrics

### 1.3 Supplementary Income Statement

Rm (unless otherwise stated)	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
Mass and Foundation Cluster	3,527	1,512	398	13%	3,129	1,534

Non-controlling interests	(135)	(58)	102	43%	(237)	(65)
<b>Adjusted Headline Earnings</b>	<b>9,856</b>	<b>5,211</b>	<b>460</b>	<b>5%</b>	<b>9,396</b>	<b>4,750</b>

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

<sup>2</sup> Income from associates includes our remaining stake in Nedbank and our investment in China.

### 1.4 Per Share Measures

Millions (unless otherwise stated)	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
<b>Weighted average number of ordinary shares in issue</b>	<b>4,828</b>	<b>4,894</b>	<b>(110)</b>	<b>(2%)</b>	<b>4,938</b>	<b>4,934</b>
Shares held in charitable foundations and trusts	(19)	(19)	-	-	(19)	(19)
Shares held in ESOP and similar trusts	(100)	(101)	4	4%	(104)	(114)
<b>Adjusted weighted average number of ordinary shares<sup>1</sup></b>	<b>4,709</b>	<b>4,774</b>	<b>(106)</b>	<b>(2%)</b>	<b>4,815</b>	<b>4,801</b>
Shares held in policyholder and consolidated investment funds	(192)	(196)	(19)	(11%)	(173)	(159)
Shares held in Black Economic Empowerment trust	(10)	(9)	(8)	(>100%)	(2)	(1)
<b>Weighted average number of ordinary shares used to calculate basic earnings per share</b>	<b>4,507</b>	<b>4,569</b>	<b>(133)</b>	<b>(3%)</b>	<b>4,640</b>	<b>4,641</b>
Adjusted Headline Earnings per share (cents) <sup>2</sup>	209.3	109.1	14.2	7%	195.1	98.9
Group equity value per share (cents) <sup>3</sup>	2,474	2,416	(7)	(0.3%)	2,481	-

<sup>1</sup> Adjusted to reflect the Group's BBE shares and shares held in policyholder and consolidated investment funds, consistent with the treatment of the related revenue in AHE. Refer to note C1(a) in the summary consolidated interim financial statements.

<sup>2</sup> Calculated as the Adjusted Headline Earnings divided by the adjusted weighted average number of ordinary shares.

<sup>3</sup> Calculated as Group Equity Value divided by the closing number of ordinary shares, with comparatives also restated for this. Both periods exclude the results of Zimbabwe.

## 1. Key Metrics

### 1.5 Invested Shareholder Assets

Rm (unless otherwise stated)	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
<b>Shareholder investment return (Rm)<sup>1</sup></b>	<b>2,102</b>	<b>1,060</b>	<b>914</b>	<b>77%</b>	<b>1,188</b>	<b>791</b>

<b>Free Surplus Generated from Operations<sup>1</sup></b>	<b>3,739</b>	<b>5,211</b>	<b>72%</b>	<b>268</b>	<b>8%</b>	<b>3,471</b>	<b>4,750</b>	<b>73%</b>

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

### 1.8 Group Solvency Position

Rm (unless otherwise stated)	FY 2019	Change (FY 2019 vs FY 2018)		FY 2018 <sup>1</sup>
		Value	%	
Eligible own funds	98,877	(2,082)	(2%)	100,959
Solvency capital requirement	61,298	1,259	2%	60,039
Solvency ratio (%) <sup>1</sup>	161%	–	(700 bps)	168%

<sup>1</sup> FY 2018 amounts have been re-presented to align to the final submission made to the Prudential Authority.

## 1. Key Metrics

### 1.9 Key Components of the Group Solvency Position

Rm (unless otherwise stated)	FY 2019						Group
	OMLACSA <sup>1,2</sup>	Nedbank <sup>3</sup>	Old Mutual Insure <sup>4</sup>	Residual plc <sup>5</sup>	Other <sup>6</sup>	Consolidation Adjustments <sup>7</sup>	
Eligible own funds <sup>8</sup>	79,168	21,166	3,823	1,994	27,389	(34,663)	98,877
Solvency capital requirement	36,685	16,250	2,665	1,044	16,853	(12,199)	61,298
Solvency ratio (%) <sup>9</sup>	216%	130%	143%	191%	163%	N/A	161%

Rm (unless otherwise stated)	FY 2018 <sup>10</sup>						Group
	OMLACSA <sup>1,2</sup>	Nedbank <sup>3</sup>	Old Mutual Insure <sup>4</sup>	Residual plc <sup>5</sup>	Other <sup>6</sup>	Consolidation Adjustments <sup>7</sup>	
Eligible own funds <sup>8</sup>	76,080	18,317	3,559	3,239	31,874	(32,110)	100,959
Solvency capital requirement	33,362	13,336	2,536	2,095	19,958	(11,248)	60,039
Solvency ratio (%) <sup>9</sup>	228%	137%	140%	155%	160%	N/A	168%

<sup>1</sup> The standard formula under the Prudential Standards is used for OMLACSA.

<sup>2</sup> The OMLACSA position includes OMLACSA's holding in strategic assets.

<sup>3</sup> Our remaining stake in Nedbank is included on a Basel III basis in Group solvency. This is different to the treatment in the OMLACSA calculation where the holding is included in the Own Funds at the market value of the shares, with an equity stress applied to calculate the SCR. The policyholder holding in Nedbank has been included as prescribed by the Prudential Standards.

<sup>4</sup> The standard formula under the Prudential Standards is used for Old Mutual Insure.

<sup>5</sup> It has been assumed that surplus arising in Residual plc operations is non-fungible under the Prudential Standards, with the exception of surplus deemed non-fungible by the Court Scheme.

<sup>6</sup> This category includes the balance of the Group, including holding companies, asset managers, Rest of Africa, China and smaller lending businesses.

<sup>7</sup> Includes:

(i) elimination of double counting between entities e.g. the investment of a holding company in a subsidiary

(ii) OMLACSA's investment holding of Nedbank

(iii) fungibility restrictions where the Own Funds for certain entities are restricted to the solvency capital requirement of that entity (calculated according to the Prudential Standards). The most material non-fungible surplus relates to Zimbabwe and Residual plc

(iv) diversification of risks within entities subject to accounting consolidation, most importantly between OMLACSA and Old Mutual Insure

<sup>8</sup> Refer to table 3.3. for a reconciliation between IFRS NAV to Group Own Funds.

<sup>9</sup> Due to rounding of Own Funds and SCR, the ratio presented could differ when recalculated.

<sup>10</sup> FY 2018 amounts have been re-presented to align to the final submission made to the Prudential Authority.

### 1.10 Debt Summary

Rm (unless otherwise stated)	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
<b>Gearing<sup>1</sup></b>						
IFRS value of subordinated debt <sup>2</sup>	7,622	8,640	1,074	16%	6,548	6,495
IFRS equity attributable to operating segments <sup>3</sup>	48,276	46,090	4,580	11%	43,696	41,210
Gearing ratio (%)	13.6%	15.8%	–	60 bps	13.0%	13.6%
<b>Interest cover<sup>3</sup></b>						
Finance costs	737	309	136	23%	601	337
AHE before tax and non-controlling interests and debt service costs	13,602	7,003	682	5%	12,920	6,596
Interest cover	18.5	22.7	(3.0)	(14%)	21.5	19.6

<sup>1</sup> Debt ratios are calculated based on the IFRS value of debt that supports the capital structure and excludes non-qualifying debt.

<sup>2</sup> Refer to table 3.6 for the reconciliation of IFRS book value of subordinated debt to IFRS borrowed funds as disclosed in the IFRS balance sheet.

<sup>3</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

## 2. Segment Key Performance Indicators

### 2.1 Mass and Foundation Cluster

#### 2.1.1 Key performance indicators

Rm (unless otherwise stated)	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
<b>Results from Operations</b>	<b>3,527</b>	1,512	398	13%	3,129	1,534
<b>Gross flows<sup>1</sup></b>	<b>13,336</b>	6,478	668	5%	12,668	6,159
<b>Life APE sales</b>	<b>4,191</b>	1,917	(157)	(4%)	4,348	2,038

### 3. Other Disclosures and Reconciliations

#### 3.2 Solo Solvency Position

Rm (unless otherwise stated)	FY 2019	Change (FY 2019 vs FY 2018)		FY 2018
		Value	%	
<b>OMLACSA<sup>1</sup></b>				
Eligible own funds	<b>79,168</b>	3,088	4%	76,080
Solvency capital requirement (SCR)	<b>36,685</b>	3,323	10%	33,362
Solvency ratio (%) <sup>2</sup>	<b>216%</b>	–	(1 200 bps)	228%
<b>Old Mutual Insure</b>				
Eligible own funds	<b>3,823</b>	264	7%	3,559
Solvency capital requirement (SCR)	<b>2,665</b>	129	5%	2,536
Solvency ratio (%) <sup>2</sup>	<b>143%</b>	–	300 bps	140%

<sup>1</sup> FY 2018 amounts have been re-presented to align to the final submission made to the Prudential Authority.

<sup>2</sup> Due to rounding of Own Funds and SCR, the ratio could differ when recalculated.

#### 3.3 IFRS NAV to Group Own Funds

Rm (unless otherwise stated)	FY 2019	Change (FY 2019 vs FY 2018)		FY 2018 <sup>1</sup>
		Value	%	
<b>IFRS Equity</b>	<b>74,763</b>	(3,258)	(4%)	78,021
Scoping adjustment <sup>2,3</sup>	<b>(3,272)</b>	(6,224)	(>100%)	2,952
Treasury shares <sup>2,4</sup>	<b>4,209</b>	(1,042)	(20%)	5,251
Nedbank adjustments for Basel III <sup>5</sup>	<b>(4,906)</b>	1,537	24%	(6,443)
Goodwill and other intangibles <sup>6</sup>	<b>(6,241)</b>	(410)	(7%)	(5,831)
Technical provisions (net of deferred tax) <sup>7</sup>	<b>36,090</b>	4,124	13%	31,966
Subordinated debt <sup>8</sup>	<b>7,622</b>	1,074	16%	6,548
Fungibility and eligibility adjustment <sup>9</sup>	<b>(5,856)</b>	2,091	26%	(7,947)
Foreseeable dividend	<b>(3,532)</b>	26	1%	(3,558)
<b>Group Own Funds</b>	<b>98,877</b>	(2,082)	(2%)	100,959

<sup>1</sup> Prior year has been re-presented to reflect the Group Own Funds submitted to the Prudential Authority in 2019.

<sup>2</sup> Treasury shares in the comparative have been re-presented to reflect OML shares owned by out of scope share trusts. This re-presentation affects the treasury shares and scoping adjustment line items.

<sup>3</sup> Adjustment for entities included in IFRS reporting but not in scope for Group Solvency reporting. Included in this line item is the valuation adjustment required for OMLACSA policyholder participations as prescribed by the Prudential Standards.

<sup>4</sup> These are Old Mutual Limited shares that are eliminated per IFRS requirements but not under Prudential Standards.

<sup>5</sup> This represents the adjustment required to reflect Nedbank on a Basel III basis. The effective percentage shareholding at which Nedbank is accounted for in 2019 increased to include OMLACSA policyholder investments in Nedbank listed equity.

<sup>6</sup> Goodwill and other intangibles are assets that are recognised per IFRS requirements, however, they are deemed inadmissible for solvency reporting purposes.

<sup>7</sup> Prudential Standards use a best estimate liability basis to measure insurance liabilities. This effectively recognises an earnings component within the liabilities and results in an increase in capital requirements.

<sup>8</sup> OMLACSA and Old Mutual Insure subordinated debt comprises tier 2 debt instruments counting towards the solvency position.

<sup>9</sup> Restricted surplus includes excess Own Funds mainly from Residual plc and Zimbabwe. Further adjustments are made for eligibility requirements and the removal of inadmissible items.

### 3. Other Disclosures and Reconciliations

#### 3.4 Adjusted Headline Earnings to IFRS Profit After Tax

Rm	FY 2019	H1 2019	Change (FY 2019 vs FY 2018)		FY 2018	H1 2018
			Value	%		
<b>Adjusted Headline Earnings</b>	<b>9,856</b>	5,211	460	5%	9,396	4,750
Investment return for Group equity and debt instruments in life funds	<b>474</b>	(214)	693	>100%	(219)	620
Impact of restructuring	<b>(580)</b>	(114)	120	17%	(700)	(450)
Discontinued operations	<b>74</b>	74	(8,055)	(99%)	8,129	5,584
Income from associates <sup>1</sup>	–	–	2,132	100%	(2,132)	(1,398)
Operations in hyperinflationary economies <sup>2</sup>	<b>441</b>	594	(1,675)	(79%)	2,116	643
Residual plc	<b>376</b>	303	2,725	>100%	(2,349)	(901)
<b>Headline Earnings</b>	<b>10,641</b>	5,854	(3,600)	(25%)	14,241	8,848
Impairment of goodwill and other intangible assets and property, plant and equipment	<b>(395)</b>	(62)	232	37%	(627)	(21)
Impairment of associated undertakings	<b>(869)</b>	–	(604)	(>100%)	(265)	–
Profit on disposal of property, plant and equipment	–	–	(51)	(100%)	51	14
Profit on disposal of subsidiaries and associated undertakings	<b>9</b>	25	(23,157)	(100%)	23,166	4,026
<b>Profit after tax for the financial period attributable to ordinary equity holders of the parent</b>	<b>9,386</b>	5,817	(27,179)	(74%)	36,566	12,867

<sup>1</sup> This adjustment is no longer required due to the fact that there is no longer a mismatch in the presentation of our remaining stake in Nedbank between AHE and Profit after tax attributable to ordinary equity holders of the parent.

<sup>2</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

Equity attributable to operating segments	48.3	4.6	11%	43.7
Equity attributable to our stake in Nedbank <sup>4</sup>	19.2	0.6	3%	18.6
<b>Closing Adjusted IFRS equity</b>	<b>67.5</b>	<b>5.2</b>	<b>8%</b>	<b>62.3</b>

<sup>1</sup> This represents our remaining stake in Nedbank at carrying value at 31 December 2019.

<sup>2</sup> Due to the volatility that hyperinflation introduces to Zimbabwe's results and the barriers to access capital by way of dividends, we have excluded the results in Group Adjusted IFRS Equity. Comparatives have been re-presented to reflect this.

<sup>3</sup> Consolidation adjustments reflecting own shares held by consolidated funds have been included in equity in respect of non-core operations.

<sup>4</sup> This represents our remaining stake in Nedbank at book value which is the basis on which we include Nedbank in RoNAV.

#### 3.8 Residual plc IFRS NAV to Economic Value

£m	FY 2019	Change (FY 2019 vs FY 2018)		FY 2018
		Value	%	
UK gilts and cash	115	(120)	(51%)	235
Other assets and liabilities	44	7	19%	37
Investment in Old Mutual Bermuda	2	(1)	(33%)	3
Residual plc IFRS NAV	161	(114)	(41%)	275
Prefunding of plc Head office costs	(4)	2	33%	(6)
Other <sup>1</sup>	(38)	10	21%	(48)
<b>Residual plc Economic NAV</b>	<b>119</b>	<b>(102)</b>	<b>(46%)</b>	<b>221</b>

<sup>1</sup> Includes Nedbank and Quilter shares held for purposes of remuneration schemes in Residual plc and therefore not included in the economic NAV.

- Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the operating businesses and disclosed separately. Comparatives have been re-presented to reflect this.
- Group Equity Values (GEV) represents management's view of the equity value of the Group. Material covered businesses were valued at Embedded Value (refer to section 4 of the Additional Disclosures for more details) and material non covered businesses were valued at fair value. Fair value was calculated using a combination of valuation approaches including: Discounted Cash Flow (DCF), P/E multiples, P/B multiples and NAV. Actual results for the year ended 31 December 2019 were applied to valuation date multiples and forecast results were applied to forward multiples and DCFs. P/B was calculated using the latest available book values. Listed peer multiples were used and adjusted for differences in size, marketability and control where relevant. The CAPM model was used to calculate discount rates for DCFs. The different valuation methods were weighted based on their relevance to the underlying businesses and the reliability of information available. Remaining businesses were included at IFRS NAV.
- The table above excludes the earnings related to Residual plc as this business is excluded from the perimeter of AHE. Refer to table 3.8 for more details.
- Covered business comprises business classified as Life and Savings and was valued using the Embedded Value methodology set out in section 4 of the Additional Disclosures.
- Material entities include Old Mutual Investment Group and Old Mutual Wealth which were valued using a combination of a DCF and peer P/E multiples. Remaining entities were included at IFRS NAV. Range of multiples: P/E 9.6 – 12.6.
- Material entities include Specialised Finance and Old Mutual Finance which were valued using a combination of a DCF, peer P/E multiples and peer P/B multiples. Remaining entities were included at IFRS NAV. Range of multiples: P/E 6.0 – 11.9; P/B 1.1 – 2.3.
- Material entities include Old Mutual Insure and UAP which were valued using a combination of a DCF, peer P/E multiples and peer P/B multiples. Remaining entities were included at IFRS NAV. Range of multiples: P/E 7.7 – 9.6; P/B 1.1 – 2.2.
- Other includes the IFRS NAV of holding companies (including cash), present value of central costs and our joint venture in China at fair value. In the current period, subordinated debt has been accounted for in the operating businesses.
- Nedbank's value is based on the higher of its carrying value and market value. Refer to note 12 of the Consolidated Financial Statements for more details.
- The Residual plc contribution to GEV is based on the realisable economic value of approximately £119 million at 31 December 2019, translated at the closing exchange rate on 31 December 2019. Refer to table 3.8 for a reconciliation from IFRS NAV to economic value.
- For the purposes of GEV, Zimbabwe's equity value has been calculated by applying a 20% liquidity discount to IFRS NAV.
- Calculated as GEV divided by the closing number of shares at 31 December 2019 of 4,709 million.

### 4. Embedded Value

#### 4.1 Components of Embedded Value

Rm	FY 2019	FY 2018
<b>Adjusted net worth (ANW)</b>	<b>38,248</b>	32,789
Free surplus <sup>1</sup>	14,376	10,112
Required capital <sup>2</sup>	23,872	22,677
<b>Value of in-force (VIF)</b>	<b>34,049</b>	31,357
Present value of future profits (PVFP)	40,008	37,704
Frictional costs <sup>3</sup>	(2,855)	(3,292)
Cost of residual non-hedgeable risks (CNHR) <sup>4</sup>	(3,104)	(3,055)
<b>Embedded value</b>	<b>72,297</b>	64,146

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been re-presented to reflect this.

<sup>2</sup> Required capital has increased since 2018 mainly due to growth in book.

<sup>3</sup> Frictional costs have reduced due to the implementation of a new Financial Management Framework and refinements to capital run-off methodology.

<sup>4</sup> The cost of residual non-hedgeable risks (CNHR) increased over the period due to year end assumption and model changes. The amount of diversified capital held in respect of residual non-hedgeable risks is R24,795 million at December 2019 (December 2018: R24,152 million).

#### 4.2 Analysis of Change in Embedded Value

Rm (unless otherwise stated)	Note	FY 2019				
		Free surplus	Required capital	Adjusted net worth	Value of in-force	EV
<b>Opening EV</b>		10,112	22,677	32,789	31,357	64,146
New business value	4.3	(2,967)	1,934	(1,033)	2,898	1,865
Expected existing business contribution (reference rate)		622	1,406	2,028	3,170	5,198
Expected existing business contribution (in excess of reference rate)		(88)	84	(4)	379	375
Transfers from VIF and required capital to free surplus		7,704	(2,879)	4,825	(4,825)	-
Experience variances	4.4	(176)	219	43	(167)	(124)
Development cost variances <sup>1</sup>		(222)	-	(222)	-	(222)
Assumption and model changes	4.5	(293)	217	(76)	1,099	1,023
<b>Operating EV earnings</b>		<b>4,580</b>	<b>981</b>	<b>5,561</b>	<b>2,554</b>	<b>8,115</b>
Economic variances	4.6	489	217	706	138	844
Non-operating variances <sup>2</sup>		(523)	-	(523)	-	(523)
<b>Total EV earnings</b>		<b>4,546</b>	<b>1,198</b>	<b>5,744</b>	<b>2,692</b>	<b>8,436</b>
Closing adjustments		(282)	(3)	(285)	-	(285)
Capital and dividend flows		(66)	17	(49)	-	(49)
Foreign exchange variance <sup>3</sup>		(216)	(20)	(236)	-	(236)
<b>Closing EV<sup>4</sup></b>		<b>14,376</b>	<b>23,872</b>	<b>38,248</b>	<b>34,049</b>	<b>72,297</b>
<b>Return on EV (RoEV) per annum<sup>5</sup> (%)</b>						<b>12.7%</b>

<sup>1</sup> The development cost variances in 2019 represent investment in strategic initiatives.

<sup>2</sup> Non-operating variances include tax changes, regulatory changes and any other changes that are not part of normal operations. In 2019 this relates to restructuring impacts associated with the migration of Old Mutual International business to Old Mutual Wealth.

<sup>3</sup> The foreign exchange variance in 2019 mostly relates to the impact of currency movements in the Rest of Africa.

<sup>4</sup> All EV results are after tax and non-controlling interests, unless otherwise stated.

<sup>5</sup> Return on EV is calculated as the operating EV earnings after tax divided by opening EV.

## 4. Embedded Value

### 4.2 Analysis of Change in Embedded Value

Rm (unless otherwise stated)	Note	FY 2018				
		Free surplus	Required capital	Adjusted net worth	Value of in-force	EV
<b>Opening EV</b>		5,021	21,083	26,104	32,644	58,748

### 4.3 New Business

#### 4.3.1 Drivers of New Business Profitability

%	FY 2019 <sup>1</sup>	FY 2018 <sup>1</sup>
<b>VNB margin at the end of comparative reporting period</b>	<b>3.2%</b>	3.4%
Change in volume and new business expenses <sup>2</sup>	(0.1%)	–
Change in country and product mix <sup>3</sup>	(0.4%)	(0.3%)
Change in assumptions and models	0.0%	0.1%
Change in economic assumptions	(0.1%)	–
<b>VNB margin at the end of the reporting period</b>	<b>2.6%</b>	3.2%

<sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been restated to reflect this.

<sup>2</sup> The growth in sales volumes was slightly below the growth in new business expenses.

<sup>3</sup> Please refer to Segment Reviews on pages 36 through 50 for detailed segment commentary. In addition, intersegment mix has shifted more towards lower margin Old Mutual Corporate from higher margin Mass and Foundation Cluster.

## 4. Embedded Value

### 4.3 New Business

#### 4.3.2 Value of New Business and New Business Profitability

Rm (unless otherwise stated)	FY 2019					
	Annualised recurring premiums	Single premiums	PVNB	PVNB capitalisation <sup>1</sup>	VNB	VNB margin

<b>Group</b>	<b>8,202</b>	<b>36,983</b>	<b>72,192</b>	<b>4.3</b>	<b>1,865</b>	<b>2.6%</b>

<sup>1</sup> The PVNB capitalisation factors are calculated as follows: (PVNB – single premiums)/annualised recurring premiums.

<sup>2</sup> Annualised recurring premiums used in the calculation of PVNB for Mass and Foundation Cluster excludes the short term pocket of the savings product that is included in Life APE Sales. Following the enhancements that were made to the savings product in 2019, all flows are included in PVNB.

<sup>3</sup> Sales of Old Mutual Corporate products through the retail platform are included in Personal Finance, Wealth and Investments as well as Old Mutual Corporate sales, but are eliminated on consolidation.

Rm (unless otherwise stated)	FY 2018					
	Annualised recurring premiums	Single premiums	PVNB	PVNB capitalisation	VNB	VNB margin
<b>South Africa</b>	<b>6,488</b>	<b>37,691</b>	<b>62,390</b>	<b>3.8</b>	<b>2,066</b>	<b>3.3%</b>

<sup>1</sup> Annualised recurring premiums used in the calculation of PVNB for Mass and Foundation Cluster excludes the short term pocket of the savings product that is included in Life APE Sales.

## 4. Embedded Value

### 4.4 Experience Variances

Rm (unless otherwise stated)	FY 2019			FY 2018		
	ANW	VIF	EV	ANW	VIF	EV
Persistency <sup>1</sup>	(15)	(267)	(282)	63	(640)	(577)
Risk <sup>2</sup>	158	53	211	(42)	35	(7)
Expenses <sup>3</sup>	225	68	293	401	83	484
Other <sup>4</sup>	(325)	(21)	(346)	185	(15)	170
<b>Experience variances</b>	<b>43</b>	<b>(167)</b>	<b>(124)</b>	<b>607</b>	<b>(537)</b>	<b>70</b>

- <sup>1</sup> The overall persistency result improved relative to prior year due to a strengthening of the basis at the last year end and improved experience in Old Mutual Corporate (higher than expected organic growth in premiums). Persistency losses in 2019 were driven by unfavourable experience in Mass and Foundation Cluster.
- <sup>2</sup> Claims experience improved in 2019 as a result of favourable mortality experience in Mass and Foundation Cluster and favourable morbidity experience in Personal Finance.
- <sup>3</sup> Expense profits in 2019 reflect continuing expense management across the business, however lower than prior year due to once-off release of provisions in 2018.
- <sup>4</sup> Other experience items deteriorated mainly due to higher than anticipated tax and relatively lower premium and cover increases in the Mass and Foundation Cluster (was above expectations in prior year, but normalised in 2019).

### 4.5 Assumption and Model Changes

Rm	FY 2019			FY 2018		
	ANW	VIF	EV	ANW	VIF	EV
Persistency <sup>1</sup>	(1,162)	381	(781)	(50)	(630)	(680)
Risk <sup>2</sup>	313	436	749	-	(55)	(55)
Expenses <sup>3</sup>	(152)	87	(65)	108	(65)	43
Model and other changes <sup>4</sup>	925	195	1,120	(98)	907	809
<b>Assumption and model changes</b>	<b>(76)</b>	<b>1,099</b>	<b>1,023</b>	<b>(40)</b>	<b>157</b>	<b>117</b>

- <sup>1</sup> In light of recent poor experience in Mass and Foundation Cluster, and the current position in the economic cycle, a short term provision has been established to allow for higher than expected lapses in the next three years. Personal Finance revised lapse rates for longer duration Greenlight policies.
- <sup>2</sup> The mortality basis for risk products in Personal Finance and Mass and Foundation Cluster have been revised in light of recent experience.
- <sup>3</sup> Old Mutual Corporate expense assumptions were rebased to take into account expense efficiencies achieved over the past year. This was partially offset by an increase in provisions for enterprise project costs.
- <sup>4</sup> Model and other changes includes changes to Personal Finance risk product reserving to allow for future premium rate reviews at the end of the premium guarantee period.

### 4.6 Economic Variances

Rm	FY 2019			FY 2018		
	ANW	VIF	EV	ANW	VIF	EV
Investment variance on in-force business <sup>1</sup>	525	(556)	(31)	541	(1,991)	(1,450)
Investment variance on adjusted net worth <sup>2</sup>	(563)	-	(563)	(1,448)	-	(1,448)
Impact of economic assumption changes <sup>3</sup>	744	694	1,438	(1)	(132)	(133)
<b>Economic variances</b>	<b>706</b>	<b>138</b>	<b>844</b>	<b>(908)</b>	<b>(2,123)</b>	<b>(3,031)</b>

- <sup>1</sup> Actual investment returns on policyholder funds exceeded the returns expected, increasing the level of asset based fee income anticipated. This was offset by the contraction of illiquidity premiums on annuities.
- <sup>2</sup> Lower than expected investment return on ANW led to a negative investment variance. The asset base used to calculate expected return includes invested shareholder assets and other shareholder assets such as working capital cash balances in holding companies. The return on these other shareholder assets are not reported as investment return.
- <sup>3</sup> The impact of economic assumption changes primarily relates to impact of bond curve movements, reduction in volatility parameters as well as lower levels of expected inflation.

## 4. Embedded Value

### 4.7 Embedded Value Reconciliations

#### 4.7.1 Reconciliation of IFRS equity to Embedded Value

Rm	FY 2019 <sup>1</sup>	FY 2018 <sup>1</sup>
<b>IFRS equity attributable to operating segments<sup>1</sup></b>	<b>48,276</b>	43,696
Less IFRS equity for non covered business	(10,086)	(16,478)
<b>IFRS equity for covered business</b>	<b>38,190</b>	27,218
Adjustment to remove intangible assets <sup>2</sup>	(1,115)	(1,083)
Inclusion of Group equity and debt instruments held in life funds	1,173	6,654
<b>Adjusted net worth attributable to ordinary equity holders of the parent</b>	<b>38,248</b>	32,789
Value of in-force business	34,049	31,357
<b>EV</b>	<b>72,297</b>	64,146

- <sup>1</sup> Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period. Comparatives have been re-presented to reflect this.
- <sup>2</sup> The adjustment reflects removing deferred acquisition costs and deferred tax differences.

#### 4.7.2 Reconciliation of Adjusted Headline Earnings to Total Embedded Value Earnings

Rm	FY 2019	FY 2018
<b>Adjusted Headline Earnings after tax and non-controlling interests<sup>1</sup></b>	<b>9,856</b>	9,396
Less AHE after tax and non-controlling interests on other lines of business	(3,571)	(3,794)
<b>Life and Savings AHE after tax and non-controlling interests</b>	<b>6,285</b>	5,602
Restructuring costs <sup>2</sup>	(523)	-
Other adjustments <sup>3</sup>	(18)	22
<b>Adjusted net worth total earnings</b>	<b>5,744</b>	5,624
<b>Other value of in-force total earnings<sup>4</sup></b>	<b>2,692</b>	(1,287)
<b>Covered business EV total earnings</b>	<b>8,436</b>	4,337

- <sup>1</sup> The increase in Life and Savings AHE compared to prior year is mainly due to increased shareholder investment return.
- <sup>2</sup> Restructuring costs include migration costs and data provisions related to the IT platform migration from Quilter plc to South Africa.
- <sup>3</sup> Other adjustments comprise the exclusion of non-covered operations in China partly offset by changes to intangible assets.
- <sup>4</sup> The increase in VIF total earnings compared to prior year largely reflects the impact of favourable economic variances and assumption and model changes.

### 4.8 Expected return for the following period

The following table sets out the expected existing business contribution for the year ending 31 December 2020, based on the 31 December 2019 closing MCEV.

Rm	Year ended 31 December 2020				
	Free surplus	Required capital	Adjusted net worth	Value of in-force	EV
Expected existing business contribution (reference rate)	749	1,328	2,077	3,099	5,176
Expected existing business contribution (in excess of reference rate)	(75)	307	232	402	634
<b>Assumption and model changes</b>	<b>674</b>	<b>1,635</b>	<b>2,309</b>	<b>3,501</b>	<b>5,810</b>

## 4. Embedded Value

### 4.9 Embedded Value Sensitivities

For each sensitivity illustrated, all other assumptions have been left unchanged except where they are directly affected by the revised conditions. Sensitivity scenarios therefore include consistent changes in cash flows directly affected by the changed assumption(s), for example future bonus participation in changed economic scenarios.

Rm (unless otherwise stated)	FY 2019		
	EV	VIF	VNB
Central assumptions	<b>72,297</b>	<b>34,049</b>	<b>1,865</b>
Value given changes in:			
Economic assumptions 100 bps increase <sup>1</sup>	<b>72,171</b>	<b>33,923</b>	<b>1,733</b>
Economic assumptions 100 bps decrease <sup>1</sup>	<b>72,218</b>	<b>33,970</b>	<b>2,022</b>
Equity/property market value 10% increase <sup>2</sup>	<b>74,337</b>	<b>35,420</b>	<b>1,865</b>
Equity/property market value 10% decrease <sup>2</sup>	<b>70,213</b>	<b>32,635</b>	<b>1,865</b>
10 bps increase of liquidity spreads <sup>3</sup>	<b>72,466</b>	<b>34,218</b>	<b>1,898</b>
50 bps contraction on corporate bond spreads <sup>4</sup>	<b>72,667</b>	<b>34,049</b>	<b>1,889</b>
25% increase in equity/property implied volatilities <sup>5</sup>	<b>71,662</b>	<b>33,414</b>	<b>1,865</b>
25% increase in swaption implied volatilities <sup>6</sup>	<b>72,105</b>	<b>33,857</b>	<b>1,865</b>
10% decrease in discontinuance rates <sup>7</sup>	<b>74,314</b>	<b>36,066</b>	<b>2,471</b>
10% decrease in maintenance expenses <sup>8</sup>	<b>74,044</b>	<b>35,796</b>	<b>2,070</b>
5% decrease in mortality/morbidity rates <sup>9</sup>	<b>75,136</b>	<b>36,888</b>	<b>2,062</b>
5% decrease in annuitant mortality assumption <sup>10</sup>	<b>71,985</b>	<b>33,737</b>	<b>1,803</b>

<sup>1</sup> Economic assumptions 100 bps increase/decrease: Increasing/decreasing all pre-tax investment and economic assumptions (projected shareholder investment returns and inflation) by 100 bps, with credited rates and discount rates changing commensurately.

<sup>2</sup> Equity/property market value 10% increase/decrease: Equity and property market value increasing/decreasing by 10%, with all pre-tax investment and economic assumptions unchanged.

<sup>3</sup> 10 bps increase in liquidity spreads: Recognising the present value of an additional 10bps of liquidity spreads assumed on corporate bonds over the lifetime of the liabilities (annuities only), with credited rates and discount rates changing commensurately.

<sup>4</sup> 50 bps contraction on corporate bond spreads.

<sup>5</sup> 25% increase in equity/property implied volatilities: 25% multiplicative increase in implied volatilities.

<sup>6</sup> 25% increase in swaption implied volatilities: 25% multiplicative increase in implied volatilities.

<sup>7</sup> 10% decrease in discontinuance rate.

<sup>8</sup> 10% decrease in maintenance expenses: Maintenance expense levels decreasing by 10%, with no corresponding decrease in policy charges.

<sup>9</sup> 5% decrease in mortality/morbidity rates: Mortality and morbidity assumptions for assurances decreasing by 5%, with no corresponding decrease in policy charges.

<sup>10</sup> 5% decrease in annuitant mortality assumption: Mortality assumption for annuities decreasing by 5%, with no corresponding increase in policy charges.

## 4. Embedded Value

### 4.10 Embedded Value Methodology and Assumptions

The methodology used to calculate embedded value and the manner of determining embedded value assumptions at 31 December 2019 is consistent with 31 December 2018 unless explicitly noted in this disclosure.

#### 4.10.1 Methodology

The Market Consistent Embedded Value principles (Copyright © Stichting CFO Forum Foundation 2008) issued in June 2008 and updated in May 2016 by the CFO Forum (the Principles or MCEV principles) have been used as the basis for preparing the MCEV disclosure information for the covered business. We have not changed our MCEV methodology in light of the May 2016 updates to the CFO Forum MCEV principles, which allows (but does not require) the alignment of MCEV and Solvency II methodologies and assumptions.

Apart from Principle 14 the Principles have been materially complied with in the preparation of MCEV information at 31 December 2019. Principle 14 requires the use of a swap curve as the reference curve, however a government bond curve has been used predominantly as the reference curve in South Africa for consistency with the new regulatory solvency reporting regime (based on the Prudential Standards) which uses a government bond curve as the default risk-free rate. Where the liabilities are hedged with swaps, the risk-free rate will remain the swap rate which is allowed under Prudential Standards requirements with prior Prudential Authority approval. This is however only a small percentage of covered business. The reference curve and resulting embedded value is still considered to be market consistent as it is derived directly from market indicators. Namibia uses the same reference curves as South Africa.

The covered business within certain African entities (Kenya, Uganda, Malawi, eSwatini, Nigeria, Ghana and Botswana) has been included in MCEV at their respective ANW values only. No VIF for these entities has been recognised. However, the VNB for these entities has been calculated allowing for VIF.

The covered business includes, where material, any contracts that are regarded by local insurance supervisors as long term life insurance business, and other business, where material, directly related to such long term life assurance business where the profits are included in the IFRS long term business profits in the primary financial statements. For the life businesses in entities where the covered business is not material, the treatment within this supplementary information is the same as in the primary IFRS financial statements (i.e. expected future profits for this business are not capitalised for MCEV reporting purposes). Due to the lack of ability to access capital by way of dividends, our business in Zimbabwe is managed on a ring fenced basis. It has been excluded from the Group's key performance indicators for the current period and comparatives have been restated to reflect this.

Some types of business are legally written by a life company but are classified as asset management under IFRS because 'long term business' only serves as a wrapper. This business is excluded from covered business.

The EV consists of the sum of the ANW excluding intangibles and goodwill, plus the VIF covered business. The ANW consists of the free surplus and the required capital to support the business. The VIF covered business consists of the present value of future profits (PVFP), less the time value of financial options and guarantees, less frictional costs of required capital, less cost of non-hedgeable risk (CNHR).

The ANW is the market value of shareholder assets with respect to covered business after allowing for liabilities on an IFRS basis after the removal of intangibles. The liability to repay and finance the subordinated debt allocated to the covered business has been allowed for in the ANW.

The required capital is determined with reference to internal management objectives. Required capital is calculated on the Prudential Standards basis using the Group's preferred methodology where methodological choices are available. The Group's preferred methodology remains subject to Prudential Authority approval.

The PVFP is calculated as the discounted value of future distributable earnings (taking account of local statutory reserving requirements) that are expected to emerge from the in-force covered business, including the value of contractual renewal of in-force business, on a best estimate basis where assumed earned rates of return and discount rates are equal to the risk-free reference rates.

## 4. Embedded Value

### 4.10 Embedded value methodology and assumptions

#### 4.10.1 Methodology

Allowance is made in the determination of EV for the potential impact of variability of shareholder investment returns (i.e. asymmetric impact) on future shareholder cash flows of policyholder financial options and guarantees within the in-force covered business. The time value of financial options and guarantees describes that part of the value of financial options and guarantees that arises from the variability of future shareholder investment returns on assets to the extent that it is not already included in the local statutory reserves. The full market consistent value of financial options and guarantees is already reflected in the local statutory reserves, so no additional allowance is required. The calculation of the value of financial options and guarantees (including the allowance in ANW and VIF components of EV) is based on market consistent stochastic modelling techniques. In the generated economic scenarios, allowance is made, where appropriate, for the effect of dynamic management and/or policyholder actions in different circumstances.

An allowance has been made for the frictional costs in respect of the taxation on investment return and investment costs on the assets backing the required capital for covered business, where material. The run-off pattern of the required capital is projected on an approximate basis over the lifetime of the underlying risks.

An allowance is made in the CNHR to reflect uncertainty in the best estimate of shareholder cash flows as a result of both symmetric and asymmetric non-hedgeable risks since these risks cannot be hedged in deep and liquid capital markets and are managed, inter alia, by holding risk capital. CNHR is calculated using a cost of capital approach, i.e. it is determined as the present value of capital charges for all future non-hedgeable risk capital requirements. A cost of capital charge of 2.0% has been applied to non-hedgeable capital over the life of the contracts. The risks considered include mortality and morbidity, persistency and expense risk (among others), but excludes market risks.

For participating business, the method of valuation makes assumptions about future bonus rates and the determination of profit allocation between policyholders and shareholders. These assumptions are made on a basis consistent with other projection assumptions, especially the projected future risk-free shareholder investment returns, established Company practice (with due consideration of the PPFM for South African business), past external communication, any payout smoothing strategy, local market practice, regulatory/contractual restrictions and bonus participation rules. Where current benefit levels are higher than can be supported by the existing fund assets together with projected shareholder investment returns, a downward 'glide path' in benefit levels is projected so that the policyholder fund would be exhausted on payment of the last benefit.

In valuing shareholders' cash flows, allowance is made in the cash flow projections for taxes in the relevant jurisdiction affecting the covered business. Tax assumptions are based on best estimate assumptions, applying current local corporate tax legislation and practice together with known future changes and taking credit for any deferred tax assets. The value of deferred tax assets is partly recognised in the EV. Typically those tax assets are expected to be utilised in future by being offset against expected tax liabilities that are generated on expected profits emerging from in-force business.

The market consistent VNB measures the value of the future profits expected to emerge from all new business sold, and in certain cases from premium increases to existing contracts, during the reporting period after allowance for the time value of financial options and guarantees, frictional costs and the cost of residual non-hedgeable risks associated with writing the new business. VNB includes contractual renewals and voluntary increments that are not allowed for in PVFP. Where increases are allowed for in PVFP, variations from this expectation are classified as experience variance, rather than new business. The key principles applied in calculating VNB are noted below:

- Economic assumptions at the start of the reporting period are used, except for OMLACSA's non-profit annuity products where point of sale assumptions are used that are consistent with the pricing basis.
- Demographic and operating assumptions at the end of the reporting period are used.
- VNB is calculated at point of sale and rolled forward to the end of the reporting period.
- Generally a standalone approach is used unless a marginal approach would better reflect the additional value to shareholders created through the activity of writing new business.
- Expense allowances include all acquisition expenses, including any acquisition expense overruns. Strategic business development expenses are excluded.
- VNB is calculated net of tax, reinsurance and non-controlling interests.
- Economic and operating variances are not attributed to VNB.
- PVNBP is calculated at point of sale using premiums before reinsurance and applying a valuation approach that is consistent with the calculation of VNB.

## 4. Embedded Value

### 4.10 Embedded value methodology and assumptions

#### 4.10.2 Assumptions

##### 4.10.2.1 Economic assumptions

The risk free reference rates, reinvestment rates and discount rates are determined as set out in the basis of preparation. The swap yield curve is sourced internally (based on market data from the Bond Exchange of South Africa) and compared to the Bloomberg swap yield curve, for reasonability. The government bond curve is published by the Prudential Authority in South Africa and validated internally.

Expense inflation rates have been derived by comparing real rates of return against nominal risk free rates, with adjustments for higher anticipated inflation rates where appropriate.

Real world economic assumptions are determined with reference to one-year forward risk free reference rates applicable to the currency of the liabilities at the start of the reporting period. The expected asset returns, in excess of the risk free reference rates, only impact the calculation of the expected existing business contribution in the analysis of EV earnings.

The cash return equals the one year risk free reference rate.

The bond return equals the one year risk free reference rate (plus the liquidity premium for applicable product portfolios).

All other economic assumptions, for example future bonus rates, are set at levels consistent with the real world investment return assumptions.

The economic assumptions in non South African entities were set with reference to local economic conditions.

	31 December 2019	31 December 2018
<b>South African risk free reference spot yields<sup>1</sup> and expense inflation</b>		
Risk free (based on bond curve)		
1 year	6.8%	7.6%
5 years	8.0%	8.6%
10 years	9.6%	9.8%
20 years	11.2%	10.6%
Expense inflation (based on bond curve)		
1 year	4.0%	5.3%
5 years	4.2%	5.7%
10 years	5.6%	6.5%
20 years	7.0%	7.2%

	31 December 2019	31 December 2018
<b>Pre-tax real world economic assumptions</b>		
Personal Finance illiquidity premium <sup>2</sup>	0.5%	0.7%
Old Mutual Corporate illiquidity premium (inflation linked annuities) <sup>2</sup>	0.3%	0.5%
Old Mutual Corporate illiquidity premium (non-profit annuities) <sup>2</sup>	0.8%	1.2%
Equity risk premium	3.7%	3.7%
Property risk premium	1.5%	1.5%
Weighted average effective tax rate	27.3%	27.4%

<sup>1</sup> Excluding illiquidity adjustments.

<sup>2</sup> An illiquidity premium adjustment has been added to the reference rates of OMLACSA's immediate annuity business (Personal Finance and Old Mutual Corporate immediate annuities) for setting investment return and discounting assumptions.

## 4. Embedded Value

### 4.10 Embedded value methodology and assumptions

#### 4.10.2 Assumptions

##### 4.10.2.2 Non-economic assumptions

The non-economic assumptions are determined using best estimate assumptions of future cash flows and have regard to past, current and expected future experience where sufficient evidence exists (entity-specific and industry data).

These assumptions are based on the covered business being part of a going concern. Favourable changes in maintenance expenses are generally not included beyond what has been achieved by the end of the reporting period.

All expected maintenance expense overruns affecting the covered business are allowed for in the calculations at the time identified.

The EV makes provision for future development costs and one-off expenses relating to in-force covered business that are known with sufficient certainty, based on three-year business plans.

## 5. Glossary

Defined Term	Description
Residual plc	Holding company subsidiaries that formed part of the Old Mutual plc Group which now form part of Old Mutual Limited. These subsidiaries are in wind down and not considered part of the core operations of the Group. The perimeter includes Old Mutual Bermuda, Old Mutual (Netherlands) BV and Old Mutual plc which was re-registered as OM Residual UK Limited in February 2019.
Results from Operations	The primary measure of the business performance of the operating segments. Calculated as Adjusted Headline Earnings before shareholder tax and non-controlling interests, excluding net investment return on shareholder assets and finance costs.
Adjusted Headline Earnings	The Group profit measure that adjusts headline earnings, as defined by SAICA Circular 01/2019, for the impact of material transactions, non-core operations and any IFRS accounting treatments that do not fairly reflect the economic performance of the business.
Return on Net Asset Value	RoNAV is calculated as AHE divided by average Adjusted IFRS Equity. Adjusted IFRS Equity is calculated as IFRS equity attributable to operating segments before adjustments related to the consolidation of funds. It excludes equity related to the Residual plc, discontinued operations and operations in hyperinflationary economies. It is further adjusted to remove the one-off fair value adjustment that arose on the unbundling of Nedbank. This adjustment reflects the difference between the carrying value and the net asset value of our retained interest in Nedbank on the date of unbundling.
Free Surplus Generated from Operations	Free Surplus Generated from Operations represents the net cash generated from the operations that contribute to AHE after allowing for normal course investment in the business and the impact of any fungibility constraints.
Group Solvency ratio	Group eligible Own Funds (OF) divided by the solvency capital requirement (SCR) calculated on the Prudential Standards.
Gross flows	The gross cash flows received from customers during the period by Group businesses engaged in Life and Savings and Asset Management.
Life APE sales	A standardised measure of the volume of new life insurance business written. It is calculated as the sum of new business recurring premiums (annualised) and 10% of the new single premiums written in an annual reporting period.
NCCF	The difference between gross flows and cash returned to customers (e.g. claims, surrenders, maturities) during the period.
FUM	The total market value of funds managed by the Group on behalf of customers, at the point at which funds flow into the Group.
Invested shareholder assets	A portfolio of assets invested and managed with the intention to generate an investment return for shareholders. The portfolio has a clearly defined mandate and support the Group's capital requirements.
VNB	The discounted value of expected future profits arising from new life insurance business sold in the reporting period.
VNB margin	VNB divided by PVNBP, where PVNBP is the discounted value of expected future life insurance premiums from new recurring premium business, plus 100% of new single premiums. The VNB margin reflects how much of future profits are expected from each future life insurance premium and therefore measures the profitability of new business sold.
Gross written premiums	The value of premiums that a Property and Casualty insurer is entitled to receive from its insurance business in a period, before adjustments for reinsurance premiums. It is a measure of sales performance in Group businesses engaged in Property and Casualty.
Underwriting margin	Underwriting result as a percentage of net earned premiums. It is calculated for the Property and Casualty businesses across the Group.
Loans and advances	The balance of gross loans and advances for Group businesses engaged in Banking and Lending. The amounts are gross of impairments on all performing, arrears and default loans.
Net lending margin	Net interest income plus non-interest revenue minus credit losses, as a percentage of average loans and advances over the period.
